Octavia E. Butler

Dawn Octavia E. Butler, 2014-03-27 'One of the most significant literary artists of the twentieth century' JUNOT DIAZ 'Octavia Butler was playing out our very real possibilities as humans. I think she can help each of us to do the same' GLORIA STEINEM One woman is called upon to reconstruct humanity in this hopeful, thought-provoking novel by the bestselling, award-winning author. For readers of Margaret Atwood, Toni Morrison and Ursula K. Le Guin. When Lilith Iyapo wakes in a small white room with no doors or windows, she remembers a devastating war, and a husband and child long lost to her. She finds herself living among the Oankali, a strange race who intervened in the fate of humanity hundreds of years before. They spared those they could from the ruined Earth, and suspended them in a long, deep sleep. Over centuries, the Oankali learned from the past, cured disease and healed the world. Now they want Lilith to lead her people back home. But salvation comes at a price - to restore humanity, it must be changed forever... PRAISE FOR OCTAVIA E. BUTLER, THE NEW YORK TIMES BESTSELLING AUTHOR 'In the ongoing contest over which dystopian classic is most applicable to our time... for sheer peculiar prescience, Butler's novel may be unmatched' NEW YORKER 'Butler's prose, always pared back to the bone, delineates the painful paradoxes of metamorphosis with compelling precision' GUARDIAN 'Octavia Butler was a visionary' VIOLA DAVIS 'Her evocative, often troubling, novels explore far-reaching issues of race, sex, power and, ultimately, what it means to be human' NEW YORK TIMES 'An icon of the Afrofuturism world, envisioning literary realms that placed black characters front and center' VANITY FAIR 'Butler writes with such a familiarity that the alien is welcome and intriguing. She really artfully exposes our human impulse to self-destruct' LUPITA NYONG'O

Reading Octavia E. Butler: 'Xenogenesis' / 'Lilith's Brood' John Lennard, *Xenogenesis* (retitled *Lilith's Brood* in 2000) is one of Butler's most important works, and comprises the novels *Dawn* (1987), *Adulthood Rites* (1988), and *Imago* (1989). The Notes cover Octavia Butler's life and work; the background and structure of the trilogy; (Black) SF in relation to race and gender; the tradition of dystopias; and the work in genetics that is central to the plot. The Annotations pay special attention to the feminist and racial critique of human behaviour, and to the scientific and religious themes that develop throughout the trilogy. Each of the three novels is dealt with book-by-book and chapter-by-chapter. An Essay, called 'The Strange Determination of Octavia Butler', considers the trilogy's two very different umbrella-titles and Butler's unusual use of genetic science, especially the discovery of mitochondrial DNA, to critique racial essentialism. It also argues for her use of cellular

organelles as an metaphor for the African Diaspora driven by slavery. The Bibliography provides a complete listing of works by Octavia Butler, including short stories and work published on-line. It also has sections detailing works about ' Octavia Butler and SF' and ' Useful Reference Works'.

Of Modern Dragons; and other essays on Genre Fiction: John Lennard,2016-10-09 A volume of essays exploring some of the best genre fiction of the last 40 years.

Care and Disability D. Christopher Gabbard,Talia Schaffer,2025-02-12 Care and Disability is an edited collection offering critical perspectives on representations of care and disability, by emerging and established scholars across multiple periods, regions, and genres of literary studies. The authors demonstrate the range of fields in which care ethics can elucidate alternative cultural and social dynamics, including Indigenous, African American, and Asian texts, and historical eras that predate the modern medical profession. This collection is committed to drawing out the changing racial, gendered, classed, and sexual elements of care, emphasizing how care communities develop as alternatives to the heteronormative couple and the nuclear family. Drawing from the care ethics and disability theory, the work in this volume demonstrates the possibilities inherent in this new cutting-edge field. It will be of interest to all scholars and students of disability studies, care ethics, sociology, narrative medicine, Romanticism, eighteenth-century studies, transatlantic nineteenth-century studies, film, and

contemporary race studies.

Teaching Girls on Fire Sarah Hentges, Sean P. Connors, 2020-06-01 The rise of YA dystopian literature has seen an explosion of female protagonists who are stirring young people's interest in social and political topics, awakening their civic imagination, and inspiring them to work for change. These Girls on Fire are intersectional and multidimensional characters. They are leaders in their communities and they challenge injustice and limited representations. The Girl on Fire fights for herself and for those who are oppressed, voiceless, or powerless. She is the hope for our shared future. This collection of new essays brings together teachers and students from a variety of educational contexts to explore how to harness the cultural power of the Girl on Fire as we educate real-world students. Each essay provides both theoretical foundations as well as practical, hands-on teaching tools that can be used with diverse groups of students, in formal as well as informal educational settings. This volume challenges readers to realize the symbolic power the Girl on Fire has to raise consciousness and inform action and to keep that fire burning.

Octavia E. Butler Mary Ellen Snodgrass, 2023-01-04 Slow to rise in the literary world, Octavia Estelle Butler cultivated musings on earth's future, reaching massive critical acclaim in the process. This companion will complement book club discussions and classroom lessons for the closest possible readings of Butler's science fiction and her texts on racism and pollution. A maven of speculative fiction so prescient that it hovers between tocsin and prophecy, Butler survives through her print stories, essays, novels and musings on individualism and compromise. This book guides the reader on a variety of Butler pieces, from her most obscure titles to her historical entries and pieces that speculate upon science, metaphysics, linguistics, psychology, writing and religion. The text serves as a guide through the depths of Octavia Butler's works and reinforces the reasons for which her name so often appears on reading lists for higher learning.

Blurring the Boundaries of Religion and Popular Culture Karen Trimble Alliaume, Maryellen Davis Collett, 2025-11-27 Employing theoretical lenses of implicit theology and secular spirituality, this book blurs the boundaries between religion and popular culture.

Science Fiction, 2007

The Ex-Human Michael Bérubé, 2024-05-28 Facing threats like climate change and nuclear warfare, science fiction authors have conjured apocalyptic scenarios of human extinction. Can such gloomy fates help us make sense of our contemporary crises? How important is the survival of our species if we wind up battling for an Earth that has become an uninhabitable hellscape? What other possible futures do narratives of the end of humanity allow us to imagine? Michael Bérubé explores the surprising insights of classic and contemporary works of SF that depict civilizational collapse and contemplate the fate of Homo sapiens. In a lively, conversational style, he considers novels by writers including Ursula K. Le Guin, Margaret Atwood, Liu Cixin, Philip K. Dick, and Octavia Butler, as well as films that feature hostile artificial intelligence, such

as 2001: A Space Odyssey, Blade Runner, and the Terminator and Matrix franchises. Bérubé argues that these works portray a future in which we have become able to see ourselves from the vantage point of something other than the human. Though framed by the possibility of human extinction, they are driven by a vision of the “ex-human”—a desire to imagine that another species is possible. For all science fiction readers worried about the fate of humanity, *The Ex-Human* is an entertaining yet sobering account of how key novels and films envision the world without us.

Future West William Henry Katerberg, 2008 What is the future of the American West? This book looks at works of utopian, dystopian, and apocalyptic science fiction to show how narratives of the past and future powerfully shape our understanding of the present-day West.

The Role of Nature in the Works of Octavia Butler Robin Rockensüß, 2008-12 Examination Thesis from the year 2008 in the subject American Studies - Literature, grade: 1,3, University of Dortmund, 67 entries in the bibliography, language: English, abstract: The science fiction (SF) writer Octavia Estelle Butler (1947-2006) was a pioneer in many ways. She won several Hugo and Nebula awards and was critically acclaimed as the most successful and most gifted female African-American author in a genre that is still mostly dominated by white males. Butler had been publishing stories since the early 1970s, imaginatively addressing issues such as slavery, race and gender in a science fiction environment - including elements of time traveling as in *Kindred* (1979) and telepathy and extraterrestrials in the *Patternist* series (1976-1984), which is made up of five novels and was republished in 2007 as the compilation *Seed to Harvest*. The *Patternist* stories already contain references to biological alterations of bodies and somatic mutations. 1987 marks the publication of *Dawn*, the first volume of the *Xenogenesis* trilogy which was also republished after Butler's death in the compilation *Lilith's Brood*. The series advances the idea of biological engineering to modern genetics in the same year when a committee of the National Academy of Sciences stated that organisms altered or created by the combination of genes between species pose no hazards to the

natural environment and are virtually risk free or have risk-to-benefit ratios well within acceptable bounds (Schmeck 1987). Within the next two years, Dawn was followed by the sequels Adulthood Rites (1988) and Imago (1989). The two novels continued the scenario of a post-apocalyptic civilization and a world controlled by peaceful, yet intrusive extraterrestrial hybrids. In the trilogy Butler considered the overall consequences for nature, humanity and civilization by extrapolating from actual scientific and social developments. This approach can also be detected in the near-future dystopia of the Parable

Black Literature Criticism Jelena O. Krstovic,2008 Focuses on writers and works published since 1950. The majority of the authors surveyed are African American, but representative African and Caribbean authors are also included.

American Writers Leonard Unger,1974 The four volume set consists of ninety-seven of the pamphlets originally published as the University of Minnesota pamphlets on American writers. Some have been revised and updated.
