ISO 31000 - 2018 Enterprise Risk Management Greg Hutchins, 2018-05-28 The key idea of this book is ISO 31000:2018 is a standard that certified companies, consultants, and management system auditors need to know. Why? ISO has integrated risk into ISO 9001:2015 and has adopted the tagline 'Risk Based Thinking' (RBT). All organizations regardless if they are public or private, for profit or not for profit, large or small face uncertainty. Uncertainty results in risks. More organizations will face uncertainty in the design, implementation, and assurance of their Quality Management System (QMS), Environmental Management System (EMS), Information Security Management System (ISMS), and most ISO management systems. The critical organizational challenge over the next decade is how organizations will address and treat the risks that result from the uncertainty. ISO 31000:2018 was developed to address this growing uncertainty. ISO 31000:2018 consists of risk management principles, framework and process that have been adopted as a national risk management standard by more than 60 countries. The ISO 31000:2018 process can be used to: ÷ Support ISO 9000:2015 in the design and implementation of Risk Based Thinking (RBT). ÷ Form the basis for Risk Based Problem Solving (RBPS) and Risk Based Decision Making (RBDM). ÷ Establish the basis and foundation for ISO 31000:2018 Enterprise Risk Management (ERM). ÷ Become the basis for the organization's risk management principles, framework, and process. ÷ Identify risk stakeholders, customers, and other interested parties. ÷ Identify stakeholder risk requirements, needs, and expectations. ÷ Identify and establish the context for designing, implementing, and assuring a risk management process. ÷ Evolve as the guideline to evaluate and manage upside risk and downside risk. ÷ Design and implement a risk management process. ÷ Treat and manage risks. ÷ Report and document the results and effectiveness of risk treatment and risk management. ÷ Communicate the effectiveness of the ISO 31000:2018 risk management framework and process to stakeholders, customers, and interested parties. ÷ Monitor and review risks based on organizational risk criteria and risk appetite.
