Worlds to Shatter, Shattered Worlds Paul Payack, 2003-07 *Worlds to Shatter, Shattered Worlds* is a classically styled dramatic work often compared to the style and substance of Tom Stoppard's *Rosencrantz and Guildenstern are Dead*. In *Worlds to Shatter*, you will encounter the all-too-strange world inhabited by such denizens as Sea-faring Time-worshippers and the Keeper of the Nothingness. Paul JJ Payack is a Silicon Valley marketing executive by day but by night he constructs the elaborate all-too-strange worlds such as that found in *Worlds to Shatter, Shattered Worlds*. Over his career as a writer, Payack has created hundreds of 'metafictions,' in the various forms of novella, short stories, 'polyplays,' essays, and 'collage narratives' that have been published in some dozen collections and hundreds of reviews and anthologies around the world, including *The Paris Review*, *New Letters*, *Creative Computing*, and *Boulevard*. At the same time, Payack has served as a senior executive for some of the world's leading high technology companies. Currently, Payack serves as Chairman, President & The WordMan at yourDictionary.com, the leading global language portal. According to Sylvia Berkman, What continues to even more forcefully distinguish Paul Payack's later work is the nature of the creative intelligence from which it stems. This is an intelligence cool yet engaged, composed, witty, immensely concerned with the broad pivotal elements of the human experience.

The Poets of Alexandria Susan A. Stephens, 2018-03-13 *Alexandria* was the greatest of the new cities founded by Alexander the Great as his armies swept eastward. It was ruled by his successors, the Ptolemies, who presided over one of the richest and most productive periods in the whole of Greek literature. Susan A Stephens here reveals a cultural world in transition: reverential of the compositions of the past (especially after construction of the great library, repository for all previous Greek oeuvres), but at the same time forward-looking and experimental, willing to make use of previous forms of writing in exciting new ways. The author examines Alexandria's poets in turn. She discusses the strikingly avant-garde Aetia of Callimachus; the idealized pastoral forms of Theocritus (which anticipated the invention of fiction); and the neo-Homeric epic of Apollonius, the *Argonautica*, with its impressive combination of narrative grandeur and psychological acuity. She shows that all three poets were innovators, even while they looked to the past for inspiration: drawing upon Homer, Hesiod, Pindar and the lyric poets, they emphasized stories and material that were entirely relevant to their own progressive cosmopolitan environment.

Classical Literature on Screen Martin M. Winkler, 2017-09-14 Martin M. Winkler argues for a new approach to various creative affinities between ancient verbal and modern visual narratives. He examines screen adaptations of classical epic, tragedy, comedy, myth, and history, exploring, for example, how ancient rhetorical principles regarding the emotions apply to moving images and how Aristotle's perspective on thrilling plot-turns can recur on screen. He also interprets several popular films, such as *300* and *Nero*, and analyzes works by international directors, among them Pier Paolo Pasolini (*Oedipus Rex*, *Medea*), Jean Cocteau (*The Testament of Orpheus*), Mai Zetterling (*The Girls*), Lars von Trier (*Medea*), Arturo Ripstein (*Such Is Life*), John Ford (westerns), Alfred Hitchcock (*Psycho*), and Spike Lee (*Chi-Raq*). The book demonstrates the undiminished vitality of classical myth and literature in our visual media, as with screen portrayals of Helen of Troy. It is important for all classicists and scholars and students of film, literature, and history.

Visual Voyages Daniela Bleichmar, 2017-01-01 An unprecedented visual exploration of the intertwined histories of art and science, of the old world and the new From the voyages of Christopher Columbus to those of Alexander von Humboldt and Charles Darwin, the depiction of the natural world played a central role in shaping how people on both sides of the Atlantic understood and imaged the region we now know as Latin America. Nature provided incentives for exploration, commodities for trade, specimens for scientific investigation, and manifestations of divine forces. It also yielded a rich trove of representations, created both by natives to the region and visitors, which are the subject of this lushly illustrated book. Author Daniela Bleichmar shows that these images were not only works of art but also instruments for the production of knowledge, with scientific, social, and political repercussions. Early depictions of Latin American nature introduced European audiences to native medicines and religious practices. By the 17th century, revelatory accounts of tobacco, chocolate, and cochineal reshaped science, trade, and empire around the globe. In the 18th and 19th centuries, collections and scientific expeditions produced both patriotic and imperial visions of Latin America. Through an interdisciplinary examination of more than 150 maps, illustrated manuscripts, still lifes, and landscape paintings spanning four hundred years, *Visual Voyages* establishes Latin America as a critical site for scientific and artistic exploration, affirming that region's transformation and the transformation of Europe as vitally connected histories.
