The Grants Register 2026 Palgrave Macmillan,2025-09-18 The Grants Register 2026 is the most authoritative and comprehensive guide available of postgraduate and professional funding worldwide. It contains international coverage of grants in almost 60 countries, both English and non-English speaking; information on subject areas, level of study, eligibility and value of awards; and information on over 5,100 awards provided by over 1,300 awarding bodies. Awarding bodies are arranged alphabetically with a full list of awards to allow for comprehensive reading. The Register contains full contact details including telephone, fax, email and websites as well as details of application procedures and closing dates. It is updated annually to ensure accurate information.

Teaching Sandy Tasker,2005 A teacher's life can be demanding at times, but the dynamic world of the classroom can also be very rewarding. If you like working with young people and want to follow in the footsteps of your favourite teacher, this book can help you get there.

The Psychologically Literate Citizen Dana Dunn,2013-01-01 The concepts of psychological literacy and the psychologically literate citizen promise to invigorate a new global approach to psychology education. They pose a basic question: What attributes and capabilities should undergraduate psychology majors acquire? Many psychological organizations have defined psychological literacy by guidelines and lists of student learning outcomes, but although psychology educators across the globe have been working towards helping students to acquire these attributes over the past 50 years, educators have only recently explicitly delineated attributes and learning outcomes, and sought to develop appropriate learning, teaching, and assessment strategies, including whole program approaches. The contributors to this volume argue that psychological literacy is the most important outcome of an undergraduate psychology education and that psychologically literate citizens use their knowledge of psychology to problem-solve in ethical and socially responsible ways that directly benefit their communities. In this book, a rich variety of international perspectives contribute to the development of the two key concepts of psychological literacy and the psychologically literate citizen. Authors provide practical guidance for classroom psychology educators, as well as curriculum developers and reviewers. Ultimately, they make the case for a paradigm shift in psychology education.

Cultures of Work, the Neoliberal Environment and Music in Higher Education Sally Macarthur,Julja Szuster,Paul

Watt,2024-03-29 This edited book considers the impact of neoliberalism on music teaching, research and scholarship in a higher education context. As a subject that bears little resemblance to other university practical disciplines, and fares poorly in a model driven by economics, the book considers whether musicology is a 'public good' or a threatened species. It contemplates what musicology can usefully contribute to a paradigm driven by economics, and questions whether it is ever possible to recover an ideal civil subject in neoliberal music academia. Contributions investigate what it means to build music research capacity in innovative ways, such as forging cross-cultural relationships, subverting conventional notions of quality and value, replacing them with knowledges and values that guide Indigenous intellectual traditions, and whether interventions into the legacy of colonialism are truly ever possible in neoliberal higher education institutions that celebrate difference and diversity while reinforcing social inequities. The book also explores the relationships between gender and music, music research training and scholarship, and whether the interdisciplinarity championed by the university is ever workable. Finally, it undertakes a cross-disciplinary, new materialist reading of a canonical musical work, offering a radically new perspective. The book will appeal to students and scholars of music education, musicology, higher education studies and the creative arts more broadly.

Children's Ethnic Socialization Jean S. Phinney,M. J. Rotherham,Mary Jane Rotheram-Borus,1987-03 Published in cooperation with the Society for Research in Child Development Most children, whether from majority or minority ethnic groups, have contact with groups other than their own and must learn to live with ethnic diversity. How do children respond to and deal with the differences among groups, in both the observable characteristics and in the less obvious values and norms? How do children come to understand the meaning of their own and others' ethnic group membership? How does the impact of ethnicity change with development? These are some of the questions that this book addresses. The aim of this edited volume is to provide an integration of existing research and theory about the process by which ethnicity affects children and the ways in which children come to understand their own and others' ethnicity. Research in this area contributes to the understanding of developmental processes that shape children's self-concept and self-esteem, their attitudes and behaviors toward their own and other groups, as well as the way they are evaluated by others. Understanding such processes may suggest methods of facilitating a child's personal development and promoting positive cross-ethnic interactions. This book is an excellent reference source for professionals working in the areas of developmental psychology,

education, social work, and ethnic studies. The development of child ethnic identity and cognizance of ethnic difference is well covered in this collection of seminal essays by psychologists and other professionals concerned with ethnicity and its manifestations. . . . The collection as a whole stresses the conclusions that ethnic group differences have a significant impact on development, and that this impact varies with the age of the child. . . . The collection will serve as a basic source for investigators into childhood ethnicity. . . .Upper-division undergraduates and above. --Choice The book will benefit therapists and researchers engaged with minority populations. Teachers of developmental psychology and human behavior would also find it useful. --Readings: A Journal of Reviews and Commentary in Mental Health Phinney and Rotheram provide a valuable summary of ethnic differences along the dimensions of group versus individual orientation; active versus passive coping style; attitudes toward authority; and expressive versus restrained communication. Readers will obtain some valuable insights on children's ethnic attitudes and identification from this book. --Contemporary Psychology
