Maternal Newborn Nursing Care Plans Carol J. Green, Judith M. Wilkinson, 2004 *Maternal Newborn Nursing Care Plans* provides students with a necessary care plan reference that includes a strong nursing process approach and comprehensive coverage of maternity nursing content. The goal of the book is to provide interventions for both collaborative problems and nursing diagnoses. It emphasizes the use of standardized nursing languages, including NANDA diagnoses, NIC interventions, and NOC outcomes in each care plan. Includes over 65 of the most common normal and high risk care plans associated with maternal newborn nursing care. UNIQUE! Lists the collaborative problems or potential complications for every condition covered. Incorporates a consistent format presentation for each content area that includes: 1) Focus on Collaborative Practice - definition, etiology, physical findings, diagnostic studies; 2) Collaborative Problems - list of collaborative problems and focus assessments; 3) Nursing Diagnosis Care Plans - list of each diagnosis, care plan for each nursing diagnosis that links NANDA, NIC, and NOC; and 4) Teaching/Collaborative Activities. Emphasizes collaboration throughout to show students how to use standardized approaches such as Critical Paths and individualized approaches (Nursing Care Plans) focusing on individualized care much the same as nurses do in practice. UNIQUE! Includes Care Plans from a wellness perspective to provide a greater emphasis on health promotion and prevention and to provide students with the necessary tools for care for areas other than just the problem. Maternity and Women's Health Care - E-Book Kathryn Rhodes Alden, Deitra Leonard Lowdermilk, Mary Catherine Cashion, Shannon E. Perry, 2013-12-27 With comprehensive coverage of maternal, newborn, and women's health nursing, *Maternity & Women's Health Care*, 10th Edition provides evidence-based coverage of everything you need to know about caring for women of childbearing age. It's the #1 maternity book in the market -- and now respected authors Dr. Deitra Leonard Lowdermilk, Dr. Shannon E. Perry, Kitty Cashion, and Kathryn R. Alden have improved readability and provided a more focused approach! Not only does this text emphasize childbearing issues and concerns, including care of the newborn, it addresses wellness promotion and management of common women's health problems. In describing the continuum of care, it integrates the importance of understanding family, culture, and community-based care. New to this edition is the most current information on care of the late preterm infant and the 2008 updated fetal monitoring standards from the National Institute of Child Health and Human Development. A logical organization builds understanding by presenting wellness content first, then complications. Critical Reasoning exercises offer real-life situations in which you can develop analytical skills and apply their knowledge. Teaching for Self-Management boxes offer a guide to communicating follow-up care to patients and their families. Signs of Potential Complications boxes help you recognize the signs and symptoms of complications and provide immediate interventions. Procedure boxes offer easy-to-use, step-by-step instructions for maternity skills and procedures. Emergency boxes may be used for quick reference in critical situations. Medication Guide boxes provide an important reference for common drugs and their interactions. Cultural Considerations boxes stress the importance of considering the beliefs and health practices of patients from various cultures when providing care. Family content emphasizes the importance of including family in the continuum of care. Nursing Care Plans include specific guidelines and rationales for interventions for delivering effective nursing care. Community Activity exercises introduce activities and nursing care in a variety of local settings. Student resources on the companion Evolve website include

assessment and childbirth videos, animations, case studies, critical thinking exercises with answers, nursing skills, anatomy reviews, a care plan constructor, review questions, an audio glossary, and more.
