Conciliation of Construction Industry Disputes Brian Bond,2023-10-31 Conciliation of Construction Industry Disputes describes Conciliation as it has evolved and been practised in Ireland for the past 25 years and provides readers with practical guidance on this Alternative Dispute Resolution (ADR) method. Conciliation combines advantages of both mediation and adjudication and has been very widely practiced in Ireland over the last 25 years. It is low cost, quick and has been hugely successful. It continues to be the most used and preferred method of resolution of disputes in Irish construction contracts despite the introduction of statutory adjudication. The book includes a comparison of the various methods of ADR and will assess how Conciliation fits into them, noting the pros and cons of each. Conciliation is described in detail and the reasons for its success are analysed. This book provides comprehensive guidance on how conciliation should be conducted to maximise its chance of being successful. Drawing on his wide experience of resolving disputes by conciliation, Brian Bond illustrates the problems which can be encountered and how they may be overcome. This book will be useful reading for all involved in construction contracts, construction managers, lawyers and legal advisers, conciliators, those aspiring to become conciliators and anyone looking for an alternative dispute resolution method to a construction contracts dispute.

The Law of Building, Engineering, and Ship Building Contracts Alfred Arthur Hudson,1907

Contracts for Infrastructure Projects Philip Loots,Donald Charrett,2022-05-18 Contracts for Infrastructure Projects: An International Guide provides a guide to the law relating to construction contracts for infrastructure projects; it is intended

for the use of engineers and other professionals who are involved in the negotiation and administration of construction contracts, to enable them to understand the risks involved, and how to minimise them. The principles of construction law outlined in this book apply to small construction contracts as well as very large contracts for which the contract sum may be in the billions of dollars. The focus of the book is on construction contracts entered into by commercial organisations operating in a business environment. Contract law generally assumes that such parties are of equal bargaining power and puts relatively few fetters on their ability to agree on the terms of their bargain. However, where legislation impacts on the execution of construction projects or the operation of construction contracts it may be of major importance in protecting the rights of weaker parties or third parties. It is assumed that the users of this book will be familiar with the general concepts of tendering and contracting for engineering and construction projects but may not have any formal knowledge of the law. To the extent possible, the emphasis is on general principles of contract law that are widely accepted in many jurisdictions. Examples are drawn from case law in a number of common law jurisdictions, as well as from civil codes.
