Cine (y) digital Jorge La Ferla, 2014-09-01 Volver a pensar la idea de lenguaje cinematográfico implica reconsiderar algunos aspectos de la historia del cine en sus paulatinas combinaciones desde la máquina específica electromecánica y foto química original a sus paulatinas combinaciones, reemplazos y simulaciones por las tecnologías electrónicas y digitales. El objetivo de este libro es reflexionar sobre una posible idea de cine digital, una entelequia por cierto, a partir de la irrupción de las nuevas tecnologías, intentando aplicar conceptos de creación y puesta en escena para los formatos de ficción clásicos, el documental y las producciones inmersivas e interactivas híbridas experimentales. El intento es trazar un panorama analítico sobre las prácticas de realización que surgen de esta combinación entre el cine y la computadora. Asimismo este proceso nos lleva a reflexionar sobre ciertos mitos, que fueron signando la historia de las máquinas cinematográficas, y sobre una idea de puesta en escena a partir de las prácticas de realización y experimentación que permiten trazar un panorama sobre las posibilidades del cine digital. Esta publicación está pensada para docentes, estudiantes e investigadores de cine, medios y comunicación, y para un público general interesado en un tema clave como es el cruce de dos sistemas que predominan en las artes y el espectáculo audiovisual; una paradoja por no estar aún planteada la digitalización de los medios como tema fundamental en los estudios de la práctica cinematográfica y la crítica especializada.
