JG Myers

Native Mice and Rats Bill Breed, Fred Ford, 2007 Details the diversity, evolution and ecology of this much neglected group of animals, and describes their range of reproductive strategies and dietary adaptations. The book includes a chapter on rodent diseases, the impact of human settlement, and the efforts that are being made to conserve key species.

Amphibian and Reptile Adaptations to the Environment Denis Vieira de Andrade, Catherine R. Bevier, José Eduardo de Carvalho, 2017-12-19 Despite their diversity, amphibians and reptiles share many physiological traits, such as their dependence on external heat sources for body temperature regulation, that are of pivotal importance to their ability to cope with the environment. Considerable variation in physiological capabilities exists in these groups and often can be related to seasonal and geographic differences in environmental parameters. This book provides a comprehensive and integrative view of the interplay between physiology and behavior in amphibians and reptiles, leading to a better understanding of the subject. The book covers topics that have recently been in the spotlight for scientific research on the physiology, behavior, and conservation of amphibians and reptiles. It brings together recent information from a range of disciplines that address critical topics for understanding their biology. As these studies are scattered across articles in specialized journals, this book provides a single and expanded source summarizing such advancements. *Amphibian and Reptile Adaptations to the Environment: Interplay Between Physiology and Behavior* maintains a solid scientific basis for the biological topics covered. However, it presents the material in a clear and direct manner so that it is accessible even to non-biologists interested in the basic biology, behavior, and ecology of these animals as well as how these elements are connected to their conservation.

Desert Biomes Joyce A. Quinn, 2008-12-30 This volume in the Greenwood Guides to Biomes of the World focuses on deserts, the seemingly desolate—but actually quite lively—regions that are home to some of the most interesting and beautiful flora and fauna in the world. *Desert Biomes* examines three different types of biomes: warm/hot deserts (such as the Mojave and Sahara deserts), cold deserts (such as Patagonia in South America), and the West Coast Fog Desert biomes, which occur on certain regions of the western edge of major continents. The volume examines how these biomes are unique in terms of their vegetation, geographical distribution, soil, challenges posed by the environment, adaptation of the plants and animals to the environment, and conservation efforts. Maps, photos, diagrams, drawings, and tables accompany the text, as do sidebars that highlight habitats, species, and ecological relationships. The volume includes a bibliography of accessible

resources for further research.

Molecular Physiology of Water Balance in the Spinifex Hopping Mouse Ray Bartolo, 2007 Many animals live in the deserts of Australia and survive without drinking water. This research examined desert adaptations in the Spinifex hopping mouse (*Notomys alexis*), and is the first study to demonstrate how many genes and enzymes in the kidney are controlled to maintain water balance in the absence of drinking water.

Encyclopedia of the Biosphere: Deserts Ramon Folch i Guillén, Josep Maria Camarasa, 2000 The Encyclopedia of the Biosphere features comprehensive coverage of the earth's greatest ecosystems, their characteristics and their operations. The Encyclopedia explains how these ecosystems have been transformed by human activity, while presenting the main species inhabiting each region. The text in each volume is clearly organized into four distinct sections covering the ecosystem's environmental factors, plants and animal ecology, human influences and biosphere reserves. Eleven fully-illustrated, 4-color volumes present in a contemporary, dynamic manner, the earth's principal ecosystems and the better known species of flora and fauna.

Ocean Shores to Desert Dunes David Andrew Keith,2004 'Ocean Shores to Desert Dunes' is an award-winning book that takes the reader on a journey through the landscapes of New South Wales and the Australian Capital Territory, describing the 12 broad formations - or types - of vegetation, and 99 vegetation classes. Each vegetation class is comprehensively described, including where each occurs and why, interesting aspects of its ecology, evolution, history and development, as well as current conservation and management challenges. This spectacularly illustrated book includes more than 100 maps and 400 colour photographs, species lists for each of the vegetation classes, and extensive botanical and general indexes. 'Ocean Shores to Desert Dunes' is the perfect companion to the many plant identification guides currently available, and is based on a significant new state-wide map and vegetation classification by the author.

Spinifex Mouse Norma MacDonald,2017-03 Age range 3 to 8 Spinifex Mouse is the heartwarming tale of Cheeky, a spinifex hopping mouse, who lives in the Pilbara region of Western Australia. Cheeky is an adventurous little mouse who loves to leap high into the air and practice acrobatic tricks. Every morning, when his family have returned to their burrow to sleep after a night's foraging, Cheeky sneaks out again to look for more food and practice his flips. Each day, he ventures a little further from the burrow. One morning, when Cheeky is far from home, he shows off his clever tricks in front of a hungry snake and becomes swept up in a heart-stopping and very risky adventure.

Lucky and Spike ,2019 Spinifex hopping mouse, Lucky and Spike, have another risky nighttime adventure when they are pursued by a greedy feral cat and a hungry owl. We first met these two delightful mice in the celebrated book 'Spinifex Mouse' (Magabala Books 2013).
