Anna Collar, Troels Myrup Kristensen

Egypt, Greece and Rome: Civilizations of the Ancient Mediterranean Charles Freeman, 2004-01-29 Egypt, Greece and Rome is regarded as one of the best general histories of the ancient world. It is written for the general reader and the student coming to the subject for the first time and provides a reliable and highly accessible point of entry to the period. The volume begins with the early civilizations of Sumer (modern Iraq) and continues through to the Islamic invasions and the birth of modern Europe after the collapse of the western Roman empire. The book ranges beyond political history to cover philosophy, art and literature. A wide range of maps, illustrations and photographs complements the text. The second edition incorporates new chapters on the ancient Mediterranean and the Ancient Near East, as well as extended coverage of Egypt.

Civilization of the Ancient Mediterranean Michael Grant, Rachel Kitzinger, 1988 Essays covering the full range of topics on the people, customs, government, religion and arts of the ancient world.

Daughters of Gaia Bella Vivante, 2007 From their personal lives at home to their roles in the realms of religion, health, economics, governance, war, philosophy, and poetry, this is the story of ancient women in all their aspects. Vivante explores women's lives in four ancient civilizations of the Mediterranean: Egypt, Mesopotamia, Greece, and Rome. While the experiences of women in ancient cultures were certainly very different from those of most women today, a tendency to focus too much on negative or restrictive images has until now provided readers with a rather incomplete picture. Looking at this important era from a female-oriented perspective, Vivante widens the perceptual lens and makes it possible to highlight the fundamental empowered aspects of women's activities in order to present them in balance with the various limits imposed on their societal participation. Beginning with powerful images of goddesses and women's roles in the religious sphere, Vivante details the foundation for women's activities in all other social realms. While these four Mediterranean civilizations were distinctive, they also influenced each other through various forms of contact—trade, colonization, and war. Both the similarities and the differences permit richer comparisons and promote a deeper understanding of the lives of women in each.

The Ancient Mediterranean Michael Grant, 1988-09-01 Written by eminent classical scholar Michael Grant. The Ancient Mediterranean is a wonderfully revealing, unusually comprehensive history of all the peoples who lived around the Mediterranean from about 15,000 B.C. to the time of Constantine (306-337 A.D.). Many volumes, including Professor Grant's

own previous works, trace the histories of the great civilizations of Greece and Rome. But this unique work looks at the influences and cultures of the entire region, including Egypt, Israel, Crete, Carthage, Ionia and the Eastern colonies. Syria, and the Etruscans, as well as the Greek and Roman states. Drawing on archaeology, geography, anthropology, and economics. Professor Grant shows how the great Oriental civilizations—Egypt, Assyria, Babylonia, Persia—originated attitudes and institutions ultimately passed on to the West. He describes the effect on the people and their achievements of the long, irregular coastline, the mountainous terrain surrounding small fertile plains, the typical plant life of olive and grape, and the rapidly changing weather. Further, he investigates how the demographic factors around this deep and stormy sea caused or influenced the great periods of ancient history, such as that of fifth-century Athens and of Rome in the first century A.D. Appealing and fascinating reading, this impeccably researched history brings a fresh perspective to understanding our ancient heritage.

The Ancient Mediterranean Environment between Science and History William V. Harris, 2013-07-25 Scientists, historians and archaeologists are at last beginning to collaborate seriously on studies of the long-term history of the environment. The fruit of an international conference held in Rome in 2011, *The Ancient Mediterranean Environment between Science and History* brings together scientists and scholars who are interested in the interaction of their several disciplines as well as in specific problems such as the effects of climate change and other environmental factors on historical developments and events, the sources of the energy and fuel used in ancient civilizations, and the effects of humans on the lands around the Mediterranean. The collection balances broad Mediterranean-wide studies and tightly focused studies of particular regions in Italy and Jordan.

The Ancient Mediterranean World Robin W. Winks, Susan P. Mattern, 2004 A whirlwind tour for general readers by historians Winks (Yale U.) and Mattern-Parkes (U. of Georgia) of pre-classical eastern Mediterranean civilizations, Greece through the Hellenistic period, Rome from villages to empire, and Christianity to the rise of Islam. Environmental Problems of the Greeks and Romans Johnson Donald Hughes, 2014-02-15 How did ancient societies change the environment and how do their actions continue to affect us today? In this dramatically revised and expanded second edition of the work entitled *Pan's Travail*, J. Donald Hughes examines the environmental history of the classical period and argues that the decline of ancient civilizations resulted in part from their exploitation of the natural world. Focusing on Greece and Rome, as well as areas subject to their influences, Hughes offers a detailed look at the impact of humans and their technologies on the ecology of the Mediterranean basin. Evidence of deforestation in ancient Greece, the remains of Roman aqueducts and mines, and paintings on centuries-old pottery that depict agricultural activities document ancient

actions that resulted in detrimental consequences to the environment. Hughes compares the ancient world's environmental problems to other persistent social problems and discusses attitudes toward nature expressed in Greek and Latin literature. In addition to extensive revisions based on the latest research, this new edition includes photographs from Hughes's worldwide excursions, a new chapter on warfare and the environment, and an updated bibliography.

Trees and Timber in the Ancient Mediterranean World Russell Meiggs, 1982 This is the first comprehensive study of timber supply and demand in the Near East and the world of ancient Greece and Rome. Drawing from a wide range of literary, epigraphic, and archaeological sources, Meiggs traces changing patterns in their historical setting, and examines the timber requirements of fleets and armies, building, agriculture, and sculpture and furniture. He also draws a tentative outline of the structure of the timber trade, with special emphasis on transport, and determines that the part played by Greece and Rome in deforestation has been greatly exaggerated.

Ships of the Ancient Mediterranean David Blackman, Boris Rankov, Kalliopi Baika, Henrik Gerding, Jari Pakkanen, 2013 This is the first detailed and comprehensive study of the ships which were a defining symbol of naval power in the ancient Mediterranean.

The Open Sea J. G. Manning, 2018-04-03 A major new economic history of the ancient Mediterranean world In *The Open Sea*, J. G. Manning offers a major new history of economic life in the Mediterranean world in the Iron Age, from Phoenician trading down to the Hellenistic era and the beginning of Rome's imperial supremacy. Drawing on a wide range of ancient sources and the latest social theory, Manning suggests that a search for an illusory single ancient economy has obscured the diversity of lived experience in the Mediterranean world, including both changes in political economies over time and differences in cultural conceptions of property and money. At the same time, he shows how the region's economies became increasingly interconnected during this period. *The Open Sea* argues that the keys to understanding the region's rapid social and economic change during the Iron Age are the variety of economic and political solutions its different cultures devised, the patterns of cross-cultural exchange, and the sharp environmental contrasts between Egypt, the Near East, and Greece and Rome. The book examines long-run drivers of change, such as climate, together with the most important economic institutions of the premodern Mediterranean--coinage, money, agriculture, and private property. It also explores the role of economic growth, states, and legal institutions in the region's various economies. A groundbreaking economic history of the ancient Mediterranean world, *The Open Sea* shows that the origins of the modern economy extend far beyond Greece and Rome.

A Companion to Ethnicity in the Ancient Mediterranean Jeremy McInerney, 2014-06-13 A Companion to Ethnicity in

the Ancient Mediterranean presents a comprehensive collection of essays contributed by Classical Studies scholars that explore questions relating to ethnicity in the ancient Mediterranean world. Covers topics of ethnicity in civilizations ranging from ancient Egypt and Israel, to Greece and Rome, and into Late Antiquity Features cutting-edge research on ethnicity relating to Philistine, Etruscan, and Phoenician identities Reveals the explicit relationships between ancient and modern ethnicities Introduces an interpretation of ethnicity as an active component of social identity Represents a fundamental questioning of formally accepted and fixed categories in the field

Religious Convergence in the Ancient Mediterranean Sandra Blakely, Billie Jean Collins, 2019-12-15 This volume brings together scholars in religion, archaeology, philology, and history to explore case studies and theoretical models of converging religions. The twenty-four essays offered in this volume, which derive from Hittite, Cilician, Lydian, Phoenician, Greek, and Roman cultural settings, focus on encounters at the boundaries of cultures, landscapes, chronologies, social class and status, the imaginary, and the materially operative. Broad patterns ultimately emerge that reach across these boundaries, and suggest the state of the question on the study of convergence, and the potential fruitfulness for comparative and interdisciplinary studies as models continue to evolve.

Pilgrimage and Economy in the Ancient Mediterranean Anna Collar, Troels Myrup Kristensen, 2020-07-13 In *Pilgrimage and Economy in the Ancient Mediterranean*, Anna Collar and Troels Myrup Kristensen bring together diverse scholarship to explore the socioeconomic dynamics of ancient Mediterranean pilgrimage from archaic Greece to Late Antiquity, the Greek mainland to Egypt and the Near East. This broad chronological and geographical canvas demonstrates how our modern concepts of religion and economy were entangled in the ancient world. By taking material culture as a starting point, the volume examines the ways that landscapes, architecture, and objects shaped the pilgrim's experiences, and the manifold ways in which economy, belief and ritual behaviour intertwined, specifically through the processes and practices that were part of ancient Mediterranean pilgrimage over the course of more than 1,500 years.

A Small Greek World Irad Malkin, 2011-10-18 Greek civilization and identity crystallized not when Greeks were close together but when they came to be far apart. It emerged during the Archaic period when Greeks founded coastal city states and trading stations in ever-widening horizons from the Ukraine to Spain. No center directed their diffusion: mother cities were numerous and the new settlements (colonies) would often engender more settlements. The Greek center was at sea; it was formed through back-ripple effects of cultural convergence, following the physical divergence of independent settlements. The shores of Greece are like hems stitched onto the lands of Barbarian peoples (Cicero). Overall, and regardless of distance, settlement practices became Greek in the making and Greek communities far more resembled each other than any of their particular neighbors like the Etruscans, Iberians, Scythians, or Libyans. The contrast between center and periphery hardly mattered (all was peri-, around), nor was a bi-polar contrast with Barbarians of much significance.

Should we admire the Greeks for having created their civilization in spite of the enormous distances and discontinuous territories separating their independent communities? Or did the salient aspects of their civilization form and crystallize because of its architecture as a de-centralized network? This book claims that the answer lies in network attributes shaping a Small Greek World, where separation is measured by degrees of contact rather than by physical dimensions.

The Ancient Mediterranean Sea in Modern Visual and Performing Arts Rosario Rovira Guardiola, 2017-12-14 When thinking about the Mediterranean, Fernand Braudel's haunting words resound like an echo of the sea and its millenary history. From Prehistory until today, the Mediterranean has been setting, witness and protagonist of mythical adventures, of encounters with the Other, of battles and the rise and fall of cultures and empires, of the destinies of humans. Braudel's appeal for a long durée history of the Mediterranean challenged traditional views that often present it as a sea fragmented and divided through periods. This volume proposes a journey into the bright and dark sides of the ancient Mediterranean through the kaleidoscopic gaze of artists who from the Renaissance to the 21st century have been inspired by its myths and history. The view of those who imagined and recreated the past of the sea has largely contributed to the shaping of modern cultures which are inexorably rooted and embedded in Mediterranean traditions. The contributions look at modern visual reinterpretations of ancient myths, fiction and history and pay particular attention to the theme of sea travel and travellers, which since Homer's Odyssey has become the epitome of the discovery of new worlds, of cultural exchanges and a metaphor of personal developments and metamorphoses.

The Hellenistic West Jonathan R. W. Prag, Josephine Crawley Quinn, 2013-10-24 Pathbreaking essays challenging the traditional focus on the eastern Mediterranean in the Hellenistic period and on Rome in the West.

Lived Religion in the Ancient Mediterranean World Valentino Gasparini, Maik Patzelt, Rubina Raja, Anna-Katharina Rieger, Jörg Rüpke, Emiliano Urciuoli, 2020-04-06 The Lived Ancient Religion project has radically changed perspectives on ancient religions and their supposedly personal or public character. This volume applies and further develops these methodological tools, new perspectives and new questions. The religious transformations of the Roman Imperial period appear in new light and more nuances by comparative confrontation and the integration of many disciplines. The contributions are written by specialists from a variety of disciplinary contexts (Jewish Studies, Theology, Classics, Early Christian Studies) dealing with the history of religion of the Mediterranean, West-Asian, and European area from the (late) Hellenistic period to the (early) Middle Ages and shaped by their intensive exchange. From the point of view of their respective fields of research, the contributors engage with discourses on agency, embodiment, appropriation and experience. They present innovative research in four fields also of theoretical debate, which are "Experiencing the Religious", "Switching the Code", „A Thing Called Body“ and "Commemorating the Moment".
