Making Content Comprehensible for English Learners Jana Echevarria,MaryEllen Vogt,Deborah Short,2004 Like no other text on the market, Making Content Comprehensible presents an empirically validated model of sheltered instruction. This text contains the Sheltered Instruction Observation Protocol (SIOP) model, which provides school administrators, staff developers, teachers, teacher candidates, university faculty, and field experience supervisors with a tool for observing and quantifying a teacher''s implementation of quality sheltered instruction. New to This Edition A new, additional chapter addresses the issue ofEnglish learners who are struggling readers and/or students with disabilities by including detailed information about learning disabilities and delayed development in reading (Ch. 10). Revised vignettes present teaching scenarios where three teachers teaching the same grade level and content attempt to include the focal SIOP indicators, with varying degrees of success. Complete lesson descriptors allow readers to score the three teaching scenarios and help readers develop a degree of inter-rater reliability. New pedagogy! Each chapter contains: A graphic organizer that provides an overview of the chapter. Background Sections that include descriptions of the 8 sections and 30 indicators of the SIOP to help readers plan and prepare effective sheltered lessons. Background Discussion Questions appropriate for portfolio development in pre-service and graduate classes, for professional development workshops, or for reflection. The new, larger trim size facilitates using in the classroom the SIOP long and short versions and the lesson plan forms and rating the vignettes. Includes both the full SIOP and an abbreviated version for the reader''s use. Two different SIOP lesson plan formats that can be used for planning and preparation, depending on your needs. An Appendix contains the results of studies that demonstrate that English learners whose teachers used the SIOP model outperformed similar students whose teachers did not implement the model. Making Content Comprehensible is very practical and right on target for strategies in the field of ELLs. Professor Gerald McCain, Southern Oregon University What clearly distinguishes Making Content Comprehensible from others in the field is that it provides an easy-to-use, powerful, field-tested protocol for effective lesson planning, delivery and assessment. Professor Karen L. Newman, Indiana University The strength of Making Content Comprehensible is the clear picture it provides of instruction and the teaching scenarios. The discussion of the teaching techniques and evaluation

of each of the three teachers provides invaluable examples for the student. Professor Judith B. Making Content Comprehensible for English Learners Jana Echevarria,MaryEllen Vogt,Deborah J. Short,2012-05 The aim of this series is to bring together important recent writings in major areas of philosophical inquiry, selected from a variety of sources, mostly periodicals, which may not be conveniently available to the university student or the general reader. The editor of each volume contributes an introductory essay on the items chosen and on the questions with which they deal. A selective bibliography is appended as a guide to further reading. The newest addition to the successful Oxford Readings in Philosophy series, The Philosophy of Science contains the most important contributions to the recent philosophical debate on the authority of scientific theory. The contributors ask whether we are justified in believing scientific theories and what attitude we should take to them if we are not. Although few philosophers seriously question the existence of everyday objects like trees and tables, many have real doubts about viruses, electrons, and gravitational waves. Thelast two decades have seen important new work in the philosophy of science, stimulated by sceptical attitudes towards scientific theories. Scientific realist have in turn countered with arguments of their own, resulting in a wide-ranging debate drawing from many different philosophical disciplines. The Philosophy of Science bridges the gap between both sides of the argument, including articles on different species of realism and anti-realism, the underdetermination of theory by evidence,the lessons of the history of science, naturalized epistemology of science, and Bayesian methodology.
