What Is Life? Jay Phelan, 2009-03-02

The Archaeology of Animals Simon J. M. Davis, 2012-11-12 Ever since the discovery of fossil remains of extinct animals associated with flint implements, bones and other animal remains have been providing invaluable information to the archaeologist. In the last 20 years many archaeologists and zoologists have taken to studying such archaeofaunal remains, and the science of zoo-archaeology has come into being. What was the nature of the environment in which our ancestors lived? In which season were sites occupied? When did our earliest ancestors start to hunt big game, and how efficient were they as hunters? Were early humans responsible for the extinction of so many species of large mammals 10-20,000 years ago? When, where and why were certain animals first domesticated? When did milking and horse-riding begin? Did the Romans influence our eating habits? What were sanitary conditions like in medieval England? And could the terrible pestilence which afflicted the English in the seventh century AD have been plague? These are some of the questions dealt with in this book. The book also describes the nature and development of bones and teeth, and some of the methods used in zoo-archaeology.

What Is Life? A Guide to Biology W/Prep-U Jay Phelan,2009-04-30 Jay Phelan's What is Life? A Guide to Biology is written in a delightfully readable style that communicates complex ideas to non-biology majors in a clear and approachable manner. Science and Technology Erica Duran,Lauren Mecucci Springer,2019-08-06 Science and Technology explores questions

around the central concepts of STEM fields: How do we interact with science and technology on a daily basis? Is technology surpassing biology? What are the ethics of science and technology? Does technology rule our economy? How is the internet changing society? Readings by biologists, climate scientists, journalists, ethicists, novelists, engineers, and others take up these questions and more. Questions and assignments for each selection provide a range of activities for students. The Bedford Spotlight Reader Series is an exciting line of single-theme readers, each reflecting Bedford's trademark care and quality. An editorial board of a dozen compositionists at schools with courses focusing on specific themes assists in the development of the series. Each reader collects thoughtfully chosen selections sufficient for an entire writing course—about 35 pieces—to allow instructors to provide carefully developed, high-quality instruction at an affordable price. Bedford Spotlight Readers are designed to help students from all majors make sustained inquiries from multiple perspectives, opening up topics such as borders, food, gender, happiness, humor, language, monsters, music, subcultures, and sustainability, to critical analysis. The readers are flexibly arranged in thematic chapters, with each chapter focusing in depth on a different facet of the central topic. The instructor resource tab of each reader's catalog page includes instructor support with sample syllabi and additional teaching resources.

The Workingman's Guide and the Laborer's Friend and Advocate, 1886 ... written expressly for the people, especially the workingmen, that is, the farmers, mechanics, laborers, and necessary traders and useful mental workers, and in open hostility to drones, and useless and wasteful, and idle and unnecessary aristocracy, that is living on the vitals of the people, and giving no good in return--Page 5

Native Americans and the Environment Michael E. Harkin,David Rich Lewis,2007-03 Native Americans and the Environment brings together an interdisciplinary group of prominent scholars whose works continue and complicate the conversations that Shepard Krech started in *The Ecological Indian*. Hailed as a masterful synthesis and yet assailed as a problematic political tract, Shepard Krech's work prompted significant discussions in scholarly communities and among Native Americans. Rather than provide an explicit assessment of Krech's thesis, the contributors to this volume explore related historical and contemporary themes and subjects involving Native Americans and the environment, reflecting their own research and experience. At the same time, they also assess the larger issue of representation. The essays examine topics as divergent as Pleistocene extinctions and the problem of storing nuclear waste on modern reservations. They also address the image of the "ecological Indian" and its use in natural history displays alongside a consideration of the utility and consequences of employing such a powerful stereotype for political purposes. The nature and evolution of traditional ecological knowledge is examined, as is the divergence between belief and practice in Native resource management. Geographically, the focus extends from the eastern Subarctic to the Northwest Coast, from the Great Lakes to the Great Plains to the Great Basin.
