Systems in Mechanical Engineering Anup Goel,2021-01-01 Mechanical engineering, as its name suggests, deals with the mechanics of operation of mechanical systems. This is the branch of engineering which includes design, manufacturing,

analysis and maintenance of mechanical systems. It combines engineering physics and mathematics principles with material science to design, analyse, manufacture and maintain mechanical systems. This book covers the field requires an understanding of core areas including thermodynamics, material science, manufacturing, energy conversion systems, power transmission systems and mechanisms. This book includes basic knowledge of various mechanical systems used in day to day life. My hope is that this book, through its careful explanations of concepts, practical examples and figures bridges the gap between knowledge and proper application of that knowledge.

Advanced Materials Processing and Manufacturing Amogelang Sylvester Bolokang, Maria Ntsoaki

Mathabathe, 2023-10-02 This book describes the operations and industrial processes related to the production of advanced materials including ingot and powder metallurgy processing routes. It outlines the deformation processing mechanisms inducing failure at both ambient and high temperatures. Further, it embodies practical knowledge and engineering mechanisms of traditional and unorthodox material disposal approaches, concurrently with gear cutting/ manufacturing and computer numerically controlled machining. The surface fusion of metals in the production of coatings via the process of laser cladding is also covered. Features: Covers novel and multi-variety techniques of materials processing and manufacturing. Reports on the significant variables of the processes and basic operations of advanced materials. Discusses fundamental and engineering machining analysis. Includes novel fabrication of TiAl alloys using both powder and ingot metallurgy routes. Enables critical thinking through technical problem solving of local service manufacturers. This book is aimed at researchers and graduate students in materials and manufacturing engineering.
