The New Lunar Society David A. Mindell,2025-02-25 How to create our industrial future with inspiration and lessons from the originators of the industrial revolution. Climate change, global disruption, and labor scarcity are forcing us to rethink the underlying principles of industrial society. In *The New Lunar Society*, David Mindell envisions this new industrialism from the fundamentals, drawing on the eighteenth century when first principles were formed at the founding of the Industrial Revolution. While outlining the new industrialism, he tells the story of the Lunar Society, a group of engineers, scientists, and industrialists who came together to apply the principles of the Enlightenment to industrial processes. Those principles were collaboration, the marriage of practical and scientific knowledge, and the belief that the world could progress through making things. The Lunar Society included pioneers like James Watt, Benjamin Franklin, and Josiah Wedgwood, and their conversations no less than ignited the Industrial Revolution and shaped the founding of the United States. Telling the stories of these makers in parallel with those of our current moment of crisis on multiple fronts, Mindell argues for a new industrialism. He asks: What does industry look like when it strives to optimize for the lowest carbon footprint as well as the greatest profit? When it values resilience as much as efficiency? When it upholds dignified, inclusive, sustainable work? Optimistic but not utopian about our ability to build the world, *The New Lunar Society* shines a light on how a new generation can reanimate the best ideas of our thinking doer forebears and begin to build a future that is both realistic and human-centered.

Creative Selection Ken Kocienda, 2018-09-04 An insider's account of Apple's creative process during the golden years of Steve Jobs, revealing the symbiotic relationship between software and product development. Hundreds of millions of people use Apple products every day; several thousand work on Apple's campus in Cupertino, California; but only a handful sit at the drawing board. *Creative Selection* recounts the life of one of the few who worked behind the scenes, a highly-respected software engineer who worked in the final years of the Steve Jobs era—the Golden Age of Apple. Ken Kocienda offers an inside look at Apple's creative process. For fifteen years, he was on the ground floor of the company as a specialist, directly responsible for experimenting with novel user interface concepts and writing powerful, easy-to-use software for products including the iPhone, the iPad, and the Safari web browser. His stories explain the symbiotic relationship between software and product development for those who have never dreamed of programming a computer, and reveal what it was like to work on the cutting edge of technology at one of the world's most admired companies. Kocienda shares moments of struggle and success, crisis and collaboration, illuminating each with lessons learned over his Apple career. He introduces the essential elements of innovation—inspiration, collaboration, craft, diligence, decisiveness, taste, and empathy—and uses these as a lens through which to understand productive work culture. An insider's tale of creativity and innovation at Apple, *Creative Selection* shows readers how a small group of people developed an evolutionary design model, and how they used this methodology to make groundbreaking and intuitive software which countless millions use every day.
