*How Qualitative Data Analysis Happens* Áine M Humble,M. Elise Radina,2018-12-07 Winner of the 2020 Anselm Strauss Award for Qualitative Family Research, National Council on Family Relations. How is qualitative data actually collected, analyzed, and accomplished? Real stories of How Qualitative Data Analysis Occurs: Moving Beyond Themes Emerged offers an in-depth look into how qualitative social science researchers studying family issues and dynamics approach their data analyses. It moves beyond the usual vague statement of themes emerged from the data to show readers how researchers actively and consciously arrive at their themes and conclusions, revealing the complexity and time involved in making sense of thousands of pages of interview data, multiple data sources, and diverse types of data. How Qualitative Data Analysis Occurs focuses on a diversity of topics in family research across the life course. The various authors provide detailed narratives into how they analyzed their data from previous publications, and what methodologies they used, ranging from arts-based research, autoethnography, community-based participatory research, ethnography, grounded theory, to narrative analysis. Supplemental figures, images, and screenshots which are referred to in the chapters, are included in an

accompanying eResource, as well as links to the previously published work on which the chapters are based. This book is an invaluable resource for experienced and novice qualitative researchers throughout the social sciences.

**Primate Vocal Communication** Dietmar Todt, Philipp Goedeeking, David Symmes, 2012-12-06 Communication is both a prerequisite and manifestation of social organization and in this sense several chapters of this volume are aimed to investigate the way vocal communication serves its ultimate function of maintaining social organization. Although manifold parallels exist to vocal communication in birds, additional mechanisms of vocalization are found in primates. Treating the various psychological, ecological, behavioral, and neurobiological aspects of vocalization this book provides an interdisciplinary approach for the understanding of biocommunication in primates including humans. Conceptual as well as methodological considerations are given in a balanced way. The addition of a comprehensive glossary gives an overview also to nonspecialists in this field.

**Impacts of COVID-19 on International Students and the Future of Student Mobility** Krishna Bista, Ryan M. Allen, Roy Y. Chan, 2021-09-28 This volume uses case studies and students' lived experiences to document the impacts of coronavirus (COVID-19) on international students and explore future challenges and opportunities for student mobility within higher education. Responding to the growing need for new insights and perspectives to improve higher education policy and practice in the era of COVID-19, this text analyses the changing roles and responsibilities of institutions and international education leaders post-2020. Initial chapters highlight key issues for students that have arisen as a result of the global health crisis such as learning, well-being, and the changed emotional, legal, and financial implications of study abroad. Subsequent chapters confront potential longer-term implications of students' experiences during COVID-19, and provide critical reflection on internationalization and the opportunities that COVID-19 has presented for tertiary education systems around the world to learn from one another. This timely volume will benefit researchers, academics, and educators with an interest in online teaching and e-learning, curriculum design, and more specifically those involved with international and comparative education. Those involved with educational policy and practice, specifically related to pandemic education, will also benefit from this volume.

**The Internationalization of East Asian Higher Education** J. Palmer, A. Roberts, Y. Cho, G. Ching, 2011-11-09 Develops new and intriguing insights into globalization theory and internationalization practice, expanding the investigation of East Asian values and contexts in comparison and separate from Western-dominant thoughts of globalization and internationalization in higher education.

relations and dependencies, and drawing according conclusions. Based on the analysed data a theoretical model emerged, defining the motivation for any leisure travel activities as psychological escape, an instinctive reflex to a temporary dissatisfaction caused by a variety of influences.
