The EU's Conceptualisation of the Rule of Law in its External Relations Lisa Louwerse,2023-09-04 This book explores the question of how the EU understands the ‘rule of law’ in its external relations, with a particular focus on development cooperation and enlargement. Although the EU’s commitment to the rule of law is strong, the relevant concept remains nebulous. On the basis of a detailed analysis of two key EU external policy areas, the main argument advanced is that the Union has adopted a mostly ‘institutional’ approach to the concept by focussing largely on judicial reform. By testing the relevant practice against the background of the constitutional traditions of the Member States and legal theory, the book attests to the significance of developing a comprehensive approach to the rule of law in EU external relations.

Seeking Sustainable Development on a Level Playing Field Mark Everard,2023-12-21 Back Cover Copy Humans have exploited a huge diversity of materials throughout history. Today's conflict between rising demands and dwindling resources raises searching questions about how optimally to meet humanity's needs efficiently and safely, challenging common assumptions. Plastics support many facets of modern life yet raise associated problems, whilst 'natural' materials may be far from benign when inputs extending their longevity are considered. PVC (polyvinyl chloride) is a plastic with adaptable, durable and other properties used in diverse construction, medical, information technology, domestic and many applications besides. However, PVC has faced significant NGO pressure relating to its chlorine content and the range of additives conferring desirable properties. Yet, unlike organochlorine pesticides, PVC plastic is inert and recyclable after providing long service life. This book is not 'pro-PVC', but draws on lessons learned from how the PVC value chain, particularly across Europe, has engaged with problems and made further progress under voluntary commitments to sustainable development. The book advocates a 'level playing field' of common sustainability principles for assessment of the benefits and risks of the use of all materials in the context of their incorporation within whole product life cycles, from raw material extraction to beyond end-of-life. The use of every material raises specific challenges, but also shares common problems arising from society's legacy of wasteful, linear resource use. Activities surrounding the PVC value chain have generated novel ideas, assessment techniques and reconsideration of regulatory approaches relevant to sustainability assessment of the use of all materials in the context of whole product life cycles on a common 'level playing field', which best supports the meeting of the diversity of human needs in the safest and most efficient manner. This book is aimed at industry, regulatory and NGO audiences and influence on wider media.

Occupational Therapy in East Asia Hector Wing Hong Tsang,Stella Wai Chee Cheng,David Wai Kwong Man,2025-10-21 This is the first major textbook on occupational therapy (OT) aimed at students and practitioners based in Asia. Written by a team of authors mainly based in Hong Kong, the book is divided into four sections. Section I presents the history of OT in the region as well as those key theories which underpin it. Section II introduces the essentials of OT practice. From assessment through to evaluation and intervention, these chapters cover five key therapeutic areas in which occupational therapists work: providing support for sensory and motor functions, providing support for cognitive and perceptual issues, providing support for psychosocial issues, providing support for returning to home and the community (including the use of assistive technology), and providing support for returning to the workplace. Section III then details a range of case studies to show occupational therapists in action, while Section IV looks at how the field is developing, including the increasing use of AI and

other technologies. Throughout the book, cultural factors specific to the region are highlighted. An ideal resource for any student in Hong Kong, mainland China, Taiwan, or Singapore, this outstanding text is also a key reference work for practitioners in the region.
