Clinical Integration of Neuropsychological Test Results Charles J. Golden,Ryan Bennett,2024-09-13 The interpretation of neuropsychological tests is a complex process which requires recognition of the multiple skills required to complete even the simplest tests. The purpose of this volume is to explore the various interpretive strategies used with a wide variety of commonly used tests in order to see beyond the skills suggested by the test title. By integrating these possible interpretations across multiple tests, the neuropsychologist can pinpoint those deficits which lie at the core of a client's pattern of test results. It is intended for both professionals and for students starting to learn the clinical practice of neuropsychology.

A Casebook of Mental Capacity in US Legislation Lynn A. Schaefer,Thomas J. Farrer,2022-06-30 A Casebook of Mental Capacity in US Legislation: Assessment and Legal Commentary employs an applied and accessible approach to the assessment of mental capacity. Through the use of rich vignettes and case examples, the text provides legal commentary to illustrate state laws and ethical principles from varied decision-making capacities in distinct settings to fortify its assessment. The text begins by providing a background about decision-making capacity as a construct. It also provides practical guidance on capacity assessment germane to a broad range of clinical settings, including geropsychology, health psychology, and neuropsychology. It moves on to reviewing decision-making rights that make up capacity, and provides ethical guidelines while drawing the practitioner's attention to the common pitfalls. The case presentations and legal commentary underline key areas such as the capacity to consent to medical treatment, make welfare decisions, enter into a sexual relationship, make financial decisions, create or revoke a will, litigate and contract, and stand trial. It also includes a chapter focusing on integrating culture and diversity in capacity evaluations with the aim of increasing the practitioner's competence. This casebook will be useful for clinical psychologists in practice, researchers and students seeking to understand how to perform capacity assessments, as well as other related healthcare professionals. It is further aimed at legal professionals to utilize as

a reference that details how individual types of capacity are defined and assessed.

This Research Topic aims to enhance understanding of the psychological and social consequences of brain tumour and other cancers impacting neurocognitive function.
