**Language, Migration and Social Inequalities** Alexandre Duchene,Melissa Moyer,Celia Roberts,2013-11-12 Migration and the mobility of citizens around the globe pose important challenges to the linguistic and cultural homogeneity that nation-states rely on for defining their physical boundaries and identity, as well as the rights and obligations of their citizens. A new social order resulting from neoliberal economic practices, globalisation and outsourcing also challenges traditional ways the nation-state has organized its control over the people who have typically travelled to a new country looking for work or better life chances. This collection provides an account of the ways language addresses core questions concerning power and the place of migrants in various institutional and workplace settings. It brings together contributions from a range of geographical settings to understand better how linguistic inequality is (re)produced in this new economic order.

**The Life of Ernst Chain** Ronald Clark,2011-10-28 A Jew who left Germany when Hitler came to power, Sir Ernst Chain was a winner, with Sir Alexander Fleming and Lord Florey, of the Nobel Prize for Physiology and Medicine in 1945. Later he was a significant figure in the use of the semi-synthetic penicillins which, from the mid-1950s onwards, revolutionized the use of the antibiotic in more than one field of medicine. Born in Berlin in 1906, of a Russian emigre father and a German mother, Chain left Germany for England on 30 January 1933. Working first with Sir Frederick Gowland Hopkins in Cambridge, then with Professor Howard Florey in Oxford, Chain studied the biochemical processes by which bacteriolytic agents operate. Writing up his results, he studied Fleming's neglected original report of the bacteria-inhibiting properties of penicillin, and with Florey's support embarked on a major investigation of how penicillin could be made and purified.
