Learn to Read Latin Andrew Keller, Stephanie Russell, 2015-01-01 One of the most popular Latin texts on the market, *Learn to Read Latin* helps high school and college students acquire the skills to read and appreciate the great works of Latin literature. It not only presents basic Latin morphology and syntax with clear explanations and examples, but also offers direct access to original, unaltered Latin texts. As beginning students learn basic forms and grammar, they also gain familiarity with patterns of Latin word order and other features of style. This second edition which now combines the first and second parts into a single textbook improves upon an already strong foundation by streamlining grammatical explanations, increasing the number of syntax and morphology drills, and offering additional short and longer readings in Latin prose and poetry.

Starting to Teach Latin Steven Hunt, 2023-03-09 This book for teachers provides both practical, up-to-date guidance and a theoretical overview on a number of key topics in Latin teaching. Updated throughout, this new edition includes information about and analysis of recent Latin textbook publications and curriculum developments across the globe. Using a wealth of interviews, observations and pupil transcripts, Steven Hunt utilizes case-study evidence of excellent practice in teaching and learning from a wide variety of institutions: from outreach programmes, community schools and academies in

the UK and USA. Offering practical advice on topics such as essay writing, teaching controversial topics including women, slavery, ethnicity and social hierarchy, making use of primary sources and using ICT to advance language skills, this book also engages with broader questions of approach and theory. These include a survey of the three main approaches to Latin teaching: grammar-translation, communicative and reading approaches; explanation of cognitive and social approaches to learning; and analysis of the differences between intrinsic and extrinsic motivation. Moreover, traditional arguments about the value and purpose of learning Latin at school level are re-examined in the light of current educational thinking and government policy-making. This book is invaluable for trainees, newly qualified teachers and more experienced practitioners looking for practical ideas and strategies to motivate and engage learners of Latin.

Research on Emotion and Learning: Contributions from Latin America Camilo Hurtado-Parrado, Carlos Gantiva, Leonardo A. Ortega, Alexander Gómez-A, Lucas Cuenya, Javier Leonardo Rico, 2020-05-11 Latin America has increased its share of world scientific publications by nearly twofold during the last two decades (approximately from 2 to 4%). Despite this positive trend, the scholarly impact of scientific research produced in the region - measured in terms of citation rate - remains low. Two interrelated factors that contribute to this situation is that most research groups tend to work in isolation or in local sporadic collaboration, and results are often published in journals that are not indexed in major citation databases (e.g., SCOPUS, or Web of Science). Ultimately, part of Latin American high-quality research seems to remain hidden from the rest of the world. Over the last decades, an important number of Latin American scientists have developed fruitful research agendas on questions on learning and emotion, focusing on basic and/or translational research with humans and other animal models, and implementing diverse methodologies. Notwithstanding the important contributions of these research programs, Latin American research on emotion and learning has followed the overall trend of other research fields throughout the region; namely, remaining partially hidden from the large scientific community of the world. This Research Topic aimed to engage researchers from Latin America to share their empirical and conceptual work on learning and emotion. Ultimately, this effort was expected to strengthen and integrate our regional community of experts, enhance global networking, and establish new challenges and developments for future investigation.

Transitions to School: Perspectives and Experiences from Latin America Angel Urbina-García, Bob Perry, Sue Dockett, Divya Jindal-Snape, Benilde García-Cabrero, 2022-08-02 This book showcases the quality work that Latin American researchers have done on transition to school in Latin American countries by offering the English-speaking world, first-hand access to some Latin American transitions research, practices, and policies. This book shows the work carried out in countries such as Brazil, Chile, Cuba, and Mexico with regards to the way in which the transition to primary school is experienced from different stakeholders' perspectives, and how Latin American educational policies and cultural practices

shape such an important process for stakeholders. This book was importantly framed by the COVID-19 pandemic which placed the world in a global health emergency, and it is our hope that this book will trigger future international collaborations between researchers, policy makers, and practitioners interested in transitions which could help produce a wealth of empirical evidence to inform educational policies and transitions practices across the world. Building networks where diverse experiences are valued and respected, as well as analysed, can help provide a platform that supports educators and researchers as they continue their work and branch out in new and challenging directions.

Inside the World's Major East Asian Collections Patrick Lo,Dickson KW Chiu,Allan Cho,2017-05-03 Inside the World's Major East Asian Collections examines the rise of the LAM, an acronym that stands for libraries, archives and museums. In doing so, this book profiles leading experts—librarians, archivists and museum curators—who specialise in East Asian collections from across the world. In examining the dynamically shifting role of the cultural institution in the context of managing information and collections, this book provides important themes offered by these cultural experts in understanding the necessary professional skills, knowledge and personalities that are required for working in such environments of varying size, scope and composition in LAMs. As galleries, LAMs manage preservation and access of history and culture, and their missions and goals as cultural institutions continue to converge. As collecting institutions, LAMs share the common mandate to preserve and make accessible primary resources valuable for researchers and professionals, as well as the public. LAMs are mostly publicly funded, publicly accountable institutions collecting cultural heritage materials. Another aim of this book is to enhance the visibility and recognise the efforts of the LAM professionals as cultural institution leaders, since much of their great contributions in the respective fields to preserving our cultural and documentary heritages have gone unnoticed outside their parent institutions. - Examines the roles and goals of cultural institutions - Brings collections to life through interviews with LAM experts - Presents LAMs with a focus on East Asia - Serves as a platform for

LAM professionals to share and exchange experiences and insights

Teaching in the Middle and Secondary Schools Richard Dean Kellough, Jioanna Carjuzaa, 2009 This practical, performance based methods text for middle and second school pre-service teachers is organized around four developmental components: Why-gives the rationale to support the components that follow What-what you will be teaching How-how you will teach it How well-how well you are teaching it. Organized into four parts that are then split up into ten modules, the text begins with a history of education going back to colonial times. The modules then cover the many and varied aspects of teaching pre and early adolescents, such as teaching students with exceptionalities, classroom management, diversity, instructional planning, using technology in the classroom, assessing student achievement, and self-assessment and continued professional development. The authors contend that the best teacher is one who has an eclectic style and can monitor their own progress and make changes and adapt their strategies if they are not succeeding. The ninth edition has been carefully updated to reflect the diversity and current topics in the field today. The book is a valuable resource for students today and as a reference for many years to come. New To This Edition: NEW! Improved balance of content between middle and secondary schools-this emphasizes that middle school is uniquely different from both high school and the traditional junior high school and that pre-and early adolescence is different from late adolescence. NEW! Technology has been integrated throughout every module of the book-New features including "Teaching Scenarios," "Activities," and "Technology Rich" features were added to all modules. NEW! Contributions from pre-service and in-service middle and secondary school teachers, teacher educators, and educational researchers have been added--to strengthen the tie between theory and practice.
