Los diez libros de arquitectura Marco Lucio Vitruvio, 2013-05-01 Los diez libros de arquitectura de Vitruvio (probablemente concebido entre los años 23 y 27 adC) es el primer tratado escrito sobre arquitectura que se conoce. Marco Vitruvio Polión (Marcus Vitruvius Pollio) fue un arquitecto, escritor, ingeniero y tratadista romano del siglo I adC. Inspirada en teóricos helenísticos, la obra trata sobre órdenes, materiales, técnicas decorativas, construcción, tipos de edificios, hidráulica y mecánica. Los diez libros de arquitectura, conocido y empleado en la Edad Media, se reeditó en Roma en 1486. Ofreció a los artistas del Renacimiento, imbuidos de la admiración por las virtudes de la cultura clásica propia de la época, un canal privilegiado mediante el que reproducir las formas arquitectónicas de la antigüedad greco-latina. Todavía hoy constituye una fuente documental insustituible, también por las informaciones que aporta sobre la pintura y la escultura griegas y romanas. El famoso dibujo de Leonardo da Vinci sobre las proporciones humanas, conocido como el Hombre Vitruviano, está basado en las indicaciones dadas en esta obra. Vitruvio también trabajó para el ejército de Julio César como ingeniero constructor de maquinaria de guerra. Así viajó con las legiones romanas en campañas por Galia y España. El punto de partida de esta edición de Los diez libros de arquitectura ha sido la traducción del latín de 1787, publicada en la Imprenta real, bajo la dirección de Joseph Ortiz y Sanz, presbítero. Los grabados que acompañaban al texto se imprimieron al final de la obra. Hemos creído conveniente insertar las ilustraciones entre el texto, con el fin de facilitar al máximo la lectura del mismo. Además se han realizado ciertas unificaciones siguiendo el libro de estilo que aplicamos a los títulos clásicos publicados en Linkgua que así lo requieran.

Los Diez Libros de Arquitectura, 1992-10-13 En los últimos años, los estudios sobre Vitruvio y la fortuna de su *De Architectura* han conocido un auge importantísimo, coincidiendo con el renovado, polémico y a veces arbitrario esfuerzo de muchos arquitectos por establecer un coloquio sin prejuicios con la tradición clásica. En ese contexto, la magnífica edición que en 1787 realizara la Imprenta Real constituye una aportación fundamental a una hipotética imagen canónica de la arquitectura entendida desde supuestos normativos. El enorme esfuerzo historiográfico y filológico llevado a cabo por Ortiz y Sanz plantea la necesidad, compartida por muchos arquitectos y teóricos de la Real Academia de Bellas Artes de San Fernando, de encontrar un método de formalización y codificación del proyecto y del lenguaje arquitectónico. El texto de Vitruvio es, de esa forma, entendido más como portador de leyes universales que como testimonio de la idea de la

arquitectura en una época determinada.

Ángela Ruíz Robles y la invención del libro mecánico (PDF) Ministerio de Economía y Competitividad, 2012-12-01 El principal deseo de Ángela Ruíz Robles era facilitar el aprendizaje a los estudiantes que tuvieron la oportunidad de beneficiarse de su magisterio. Dicha aspiración, unida a su afán por educar de una manera menos tradicional y más interactiva y a su inusual comprensión del lenguaje del futuro, propiciaron que, en los difíciles años inmediatamente posteriores a la Guerra Civil española, fuera capaz de idear y llevar a la práctica un prototipo de «libro mecánico» estrechamente emparentado con los actuales soportes electrónicos de lectura. Esta obra pretende situar en el lugar que merecen los innovadores trabajos de Ángela Ruíz Robles, abordándolos desde diferentes puntos de vista, que van desde el carácter pedagógico hasta el sociológico y tecnológico, sin dejar de lado la semblanza personal de la autora.

Lecciones de arquitectura moderna Anton Capitel, 2021-06-01 El presente libro reúne una serie muy diversa de textos que se han dividido en tres grandes apartados temáticos. El primero es el dedicado a la arquitectura de los grandes maestros, y que insiste sobre todo en tres autores que siguen siendo claves de nuestro panorama y de nuestro quehacer, Le Corbusier, Mies van der Rohe y Alvar Aalto, completados también con Scharoun y con los arquitectos nórdicos más famosos entendidos como un trabajo colectivo. Todos los textos indagan fundamentalmente acerca de la forma de hacer arquitectura - de la forma de proyectar- de estos importantes personajes, lo que quiere decir también, consecuentemente, acerca del concepto y de la naturaleza que han tenido sobre esta disciplina. Otro apartado, más pequeño, se dedica a la arquitectura española. Se han incluido tan sólo dos textos, uno de ellos muy completo y general, El siglo XX español: notas para una síntesis, capaz de dar, como promete, una visión completa y resumida de la arquitectura española durante todo el siglo moderno. El otro, La aventura moderna de la arquitectura madrileña, es una visión crítica, más incisiva, de las ideas y la obra de los arquitectos modernos de la capital española durante el franquismo (1950-1970). El tercer apartado está dedicado a la arquitectura contemporánea y, más concretamente, a la producción de Siza Vieira, Rafael Moneo, Juan Navarro Baldeweg y Frank O. Gehry, mediante textos que analizan obras muy específicas, y que representan la dedicación a la crítica cotidiana escribiendo para diversas revistas. Se completa con un texto mucho más general, De Kahn a Kolhaas. Apuntes rápidos sobre la arquitectura en el último tercio del siglo XX. Nada más. Los lectores tienen, pues, en sus manos, una abundante síntesis de una constante dedicación a la crítica y a la reflexión acerca de la arquitectura moderna

Papeles de crítica Anton Capitel, 2021-06-01 Los textos escritos con una prosa de denso y riguroso estilo literario, tienden siempre a ser lecciones didácticas en las que al discurso racional y metódico se une el discurso irracional que, señalando lo anómalo y lo contradictorio de gran parte de las realizaciones monumentales, recalca la duplicidad de la condición

estructural y atemporal de la arquitectura Con sus obras teóricas y didascálicas contribuye a difundir el conocimiento acerca del arte de la edificación, siguiendo la tradición que desde Vitruvio, pasando por Alberti hasta Le Corbusier, ha constituido un corpus de pensamiento de orden conceptual. Antón Capitel, ensayista y crítico imbuido del espíritu ecléctico y relativista propio de nuestro tiempo, es un autor opuesto a todo dogmatismo, aunque firme en sus convicciones. Su discurso, contrario a los obsoletos preceptos academicistas, es el de un profesional que cree en la capacidad creadora de la arquitectura. Sus libros y textos son una prueba perseverante de su constante dedicación a la enseñanza y a la difusión de sus ideas.

Research Tracks in Urbanism: Dynamics, Planning and Design in Contemporary Urban Territories Alessia Allegri, Angélica Benatti Alvim, Eunice Helena Abascal, Joaquin Sabaté, João Pedro Costa, Maria Cristina Schicchi, 2021-09-13
Maybe the Global Village metaphor has never been more accurate than it is today, where societies join forces in the fight against the COVID 19 pandemic, in a global coordinated effort, possibly never tested before in the known history of Humankind. Although we are sure that in the past some other shared demands have united the different peoples of the world, this has never been so strongly necessary, mainly in what the global scientific community is concerned. This is a fight for the survival of a society. However, we should not lose sight of what we are fighting for. We fight together for people. Not just for the abstract value of Human life, but for life in society as a whole, including its moral and ethical aspects. The topics of this book are based on this claim, on what makes it possible. We do not build our lives in a vacuum, or in distant Invisible Cities, but through a higher value, which represents physical life in society: the City, built by the discipline of Urbanism. This book is a spin-off of the International Research Seminar on Urbanism_SIIU2020. Inspired by the contents of twelve research seminars, a group of researchers from the universities of Barcelona, Lisbon and São Paulo discuss the contemporary agenda of research in Urbanism. Following the conference, a selection of 35 original double-blind peer-reviewed research papers were brought together with different perspectives about such an agenda.

Oracle 12c Olivier Heurtel, 2015 Este libro sobre Oracle 12c, está dirigido a cualquier profesional de la informática que quiera dominar las tareas de administración de las bases de datos Oracle. Después de una presentación general de la arquitectura interna de un servidor Oracle (memoria y procesos), este libro detalla las diferentes tareas de administración de una base de datos: instalación (en Windows y Linux), configuración de Oracle Net, creación de una nueva base de datos, gestión de la memoria, gestión del almacenamiento, gestión de los usuarios y sus permisos y copias de seguridad y restauraciones con RMAN (Recovery Manager). Se presta particular atención a las nuevas funcionalidades de Oracle 12c, que facilitan el trabajo del administrador: mover, en caliente, archivos de datos, limitar el tamaño de la PGA, gestión de la anulación para las tablas temporales, nuevos permisos de administración para las operaciones de copia de seguridad y restauración, seguridad basada en código, etc. El libro contiene muchos consejos prácticos y recomendaciones y presenta las posibles soluciones a los problemas más habituales. Conservation in Chilean Patagonia Juan Carlos Castilla,Juan J. Armesto Zamudio,María José Martínez-Harms,David Tecklin,2024-01-03 Chilean Patagonia, located at the southwestern tip of South America, is one of the last regions on earth where highly intact environments predominate. With a coastline that extends along some 100,000 km of fjords, channels, and islands, it has one of the world's most extensive marine-terrestrial interfaces. Local place-based and Indigenous cultures and management practices are a vital presence across the region, while the long and rich history of conservation efforts have resulted in officially protected areas covering over 50% of the land and 41% of the coastal-marine area. However, Chilean Patagonia is increasingly facing anthropogenic pressures associated with increased infrastructure and access, salmon aquaculture, extractive industries, and the spread of invasive exotic species. Despite widespread recognition that Chilean Patagonia represents a unique global reservoir of socio-natural heritage, to date there has been no region-wide assessment of the scientific evidence of the conservation status of its ecosystems or the priorities for their effective conservation. Conservation in Chilean Patagonia: Assessing the state of knowledge, opportunities, and challenges is the first book to gather and synthesize the available scientific and socio-environmental information related to Patagonian conservation. It presents the collaborative work of 68 researchers and local experts, representing a range of specialties and perspectives, including: biology, ecology, socio-ecology, fisheries, aquaculture, anthropology, economics, geography, tourism, cryosphere, oceanography, climate and global change. The book's 18 chapters focus on the status of key ecosystems and conservation tools, and provide recommendations toward the construction of a renewed, inclusive, and integrated conservation agenda for the Chilean Patagonian region. It provides an essential primer for anyone interested in the future of this ecologically vital region, as well as lessons on interdisciplinary collaboration and integrated analysis of conservation issues useful for

conservation practitioners and scholars. This is an open access book. This book is a translation of an original Spanish edition. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation.

Building Children's Worlds Torsten Schmiedeknecht,Jill Rudd,Emma Hayward,2023-03-28 Children are the future architects, clients and users of our buildings. The kinds of architectural worlds they are exposed to in picturebooks during their formative years may be assumed to influence how they regard such architecture as adults. Contemporary urban environments the world over represent the various stages of modernism in architecture. This book reads that history through picturebooks and considers the kinds of national identities and histories they construct. Twelve specialist essays from international scholars address questions such as: Is modern architecture used to construct specific narratives of childhood? Is it taken to support 'negative' narratives of alienation on the one hand and 'positive' narratives of happiness on the other? Do images of modern architecture support ideas of 'community'? Reinforce 'family values'? If so, what kinds of architecture, community and family? How is modern architecture placed vis-à-vis the promotion of diversity (ethnic, religious, gender etc.)? How might the use of architecture in comic strips or the presence of specific kinds of building in fiction aimed at younger adults be related to the groundwork laid in picturebooks for younger readers? This book reveals what stories are told about modern architecture and shows how those stories affect future attitudes towards and expectations of the built environment.

Otras épocas, otros mundos, un continuum María Isabel Viforcós Marinas,María Dolores Campos Sánchez-Bordona,2010 Esta obra reúne un conjunto de trabajos independientes, aunque vinculados por el común interés del humanismo y la tradición clásica y humanística. Se estructura en dos grandes bloques. El primero gira en torno al humanismo y los humanistas, abarcando un amplio abanico de cuestiones, que incluyen precisiones conceptuales, reflexiones sobre sus implicaciones políticas y sobre las vinculaciones del humanismo español y europeo, sin olvidar algunos nombres propios, como Alonso de Herrera, fr. Luis de León, Lorenzo de Zamora p Arias Montano. El segundo bloque se dedica a la tradición clásica y humanística, abordando la temática desde una doble óptica: los instrumentos de conservación, transmisión y difusión -impresión, teatro, arte e imágenes-, y su proyección al otro lado del Atlántico -cronistas, bibliotecas y editores-.

Breaking the Dead Silence Christina Horvath,Richard S. White,2024-06-21 An Open Access edition will be available on publication. The murder of George Floyd in 2020, the renewed international take up of the cry Black Lives Matter and the

subsequent toppling of a statue commemorating slave-merchant-turned-philanthropist Edward Colston in Bristol provoked urgent questions on memorialisation, white privilege, social justice and repair. Debates on how legacies of colonialism and empire in Britain should be addressed spilled out of the scholarly world into the public discourse. In the immediate wake of the statue toppling this book offers a unique, distinctive and timely contribution to those debates: a series of voices and experiences are offered as critical commentaries and accounts of recent interventions on an official heritage narrative. It sets out to break the 'dead silence', by bringing together diverse perspectives from academics, artists, activists, heritage professionals and tourist guides. The book offers fresh insights, referencing work attending to the impacts and legacies of colonisation primarily in Bath and Bristol, augmented with comparative contributions from Lancaster and Mexico offering significant and pertinent resonances. A range of strategies are explored towards enabling silenced voices to be heard and engage in conversations about how the past is represented, including Co-Creation, new agonistic museum practices, innovative creative and somatic approaches.
