EXPOSING CHAMELEONS WITHIN THE RANKS Dr. Michael A. Burts ,2025-03-27 Exposing Chameleon Within the Ranks: A Voice Beyond the Badge is a raw and revealing look at the dark side of leadership in law enforcement. This book uncovers the devastating impact of toxic leadership—how deception, favoritism, and political agendas erode trust, break morale, and compromise the mental health of officers. Through personal experiences and leadership theory, it examines how dysfunctional leadership creates a toxic organizational culture, leading to burnout, ethical dilemmas, and a dangerous divide between those who serve with integrity and those who manipulate power for personal gain. More than just an exposé, this book provides actionable strategies for recognizing, confronting, and overcoming toxic leadership—empowering officers and leaders to reclaim integrity, foster resilience, and rebuild a culture of trust within the ranks. A must-read for those who refuse to let bad leadership define the badge.

Injured Brains of Medical Minds II Narinder Kapur,Vaughan Bell,Daniel Friedland,Steven Kemp,2024-10-17 There are three aims of *Injured Brains of Medical Minds II* - Firstly, to provide perceptive accounts of symptoms and the natural history of brain disorders by people specially trained in the art of observing and reporting, thus yielding unique insights into the lived experience of what it is like to be a patient and to be disabled. Secondly, to offer insights into how the brain works, since the articles are written by patients who are uniquely privileged in view of their understanding of the brain. Climate Change Challenge: Adaptation to Climate Change Giuseppe Carrus, Chiara Massullo, Lorenza Tiberio, Christoph Steinebach, Lina Fusaro, 2025-10-24 Climate change is globally recognized among the most crucial (if not the most crucial) emergencies that human societies and the entire planet are facing in current times. Accordingly, notable efforts are being made at the political, scientific and public opinion levels to counter global environmental change (and in particular to lower the pace of global warming, through a significant reduction of carbon emissions at the global level). In this scenario, psychological science can contribute not only to understand how human societies can shift from more to less carbon-intensive but also to better understand how individuals, groups and communities may adapt to ongoing global environmental change in their daily lives. The “Adaptation to climate change” Research Topic involves processes of both assimilation and accommodation. In both, it serves optimal development under more difficult conditions. Adaptation to climate change requires empirical research on the psychological aspects, interdisciplinary dialogue with other sciences as well as reflection on the changed self-image of psychology as a science and a profession. Processes of adaptation can be found e.g. in the shift of focus ... ● from individual and community to environment, ● from concepts and theories to measurement, ● from more general and macro factors to micro factors, ● from general to diverse impact, ● from urban and rural to environmental factors, ● from bouncing back to growth, ● from segmented to an integrative approach. Specifically, for the “Adaptation to Climate Change” research topic, the Topic Editors welcome themes such as: ● Adaptation of perception: General and special conditions of environmental perception. ● Reorientation of education: Shaping the social and physical environment to promote positive development. ● Strengthening the sense of responsibility: Conditions for environmentally friendly behaviour. ● Realignment of intervention: Environment as a specific means of promoting mental health. ● Reshaping the environment: Designing the environment to meet sustainable living conditions. Any other related themes, even if not specifically mentioned here, will be welcome as well.

An Introduction to High-Frequency Finance Ramazan Gençay, Michel Dacorogna, Ulrich A. Muller, Olivier Pictet, Richard Olsen, 2001-05-29 Liquid markets generate hundreds or thousands of ticks (the minimum change in price a security can have, either up or down) every business day. Data vendors such as Reuters transmit more than 275,000 prices per day for foreign exchange spot rates alone. Thus, high-frequency data can be a fundamental object of study, as traders make decisions by observing high-frequency or tick-by-tick data. Yet most studies published in financial literature deal with low frequency, regularly spaced data. For a variety of reasons, high-frequency data are becoming a way for understanding market microstructure. This book discusses the best mathematical models and tools for dealing with such vast amounts of data. This

book provides a framework for the analysis, modeling, and inference of high frequency financial time series. With particular emphasis on foreign exchange markets, as well as currency, interest rate, and bond futures markets, this unified view of high frequency time series methods investigates the price formation process and concludes by reviewing techniques for constructing systematic trading models for financial assets.
