*Pilauco: A Late Pleistocene Archaeo-paleontological Site* Mario Pino, Giselle A. Astorga, 2019-07-26 This volume combines 10 years of accomplished research at the Pilauco site. The studies are focused on a variety of scientific areas including geological, sedimentological, geomorphological and paleobotanical topics, as well as paleontology of vertebrata and invertebrata, micropaleontology, archaeology, biochemistry, taxonomy, taphonomy, astrophysics and the development of some particular touristic aspects. In 18 chapters a variety of authors describe the excavation and investigation of this unique location. The book presents Pilauco as an example for the natural laboratory which can be found in South America, a testing ground for many of the hypotheses regarding migrations of animals and humans. In this context the study of topics, such as the paleozoography, the role of megafauna species for the architecture of the forests, the animal extinctions or the early human settlements, is extremely important on a global scale. The Pilauco site features paleontological and archaeological evidences and is contemporaneous with the Monte Verde site (~ 15,000 cal. yr AP). It is located 100 km north from Monte Verde and lies within the Intermediate Depression in northwestern Chilean Patagonia. It was discovered by chance in 1986 and has been excavated and investigated since 2007.

**Radiocarbon Dating** R.E. Taylor, Ofer Bar-Yosef, 2016-06-03 This volume is a major revision and expansion of Taylor's seminal book *Radiocarbon Dating: An Archaeological Perspective*. It covers the major advances and accomplishments of the  $^{14}\text{C}$  method in archaeology and analyzes factors that affect the accuracy and precision of  $^{14}\text{C}$ -based age estimates. In addition to reviewing the basic principles of the method, it examines  $^{14}\text{C}$  dating anomalies and means to resolve them, and considers the critical application of  $^{14}\text{C}$  data as a dating isotope with special emphasis on issues in Old and New World archaeology and late Quaternary paleoanthropology. This volume, again a benchmark for  $^{14}\text{C}$  dating, critically reflects on the method and data that underpins, in so many cases, the validity of the chronologies used to understand the prehistoric archaeological record.

*The Bloomsbury Handbook of Apocalypticism and Millennialism* Tristan Sturm, Andrew Crome, 2025-10-16 In an age shadowed by pandemics, climate catastrophe, authoritarian resurgence, and existential technological threats, *The Bloomsbury Handbook of Apocalypticism and Millennialism* offers a timely and indispensable exploration of how societies make sense of their Ends-and their hoped-for new beginnings. This ground-breaking volume gathers leading scholars to trace

the evolution, meanings, and enduring potency of apocalyptic and millennial ideas across religious, secular, and cultural landscapes. From ancient revelatory texts to contemporary political movements and popular culture, the book dissects how these concepts function not just as prophecies of doom, but as frameworks for resistance, renewal, and transformation. Through meticulous historical analysis and bold theoretical interventions, the contributors interrogate core debates—from the distinctions between apocalypticism and millennialism to their radical entanglements with justice, space, temporality, and morality. This volume dismantles simplistic portrayals of End Times thinking, revealing instead its nuanced, world-shaping logic. Whether manifest in religious movements or global politics, apocalypse is no longer a marginal concern—it is the defining hermeneutic of our times. Scholarly, provocative, and urgent, this Handbook is essential reading for researchers, students, and anyone seeking to understand how humanity envisions and enacts its endings, and potentially, new beginnings.

Origins of the Sphinx Robert M. Schoch, Robert Bauval, 2017-03-16 New research and evidence that the Sphinx is thousands of years older than previously thought • Contrasts what Egyptologists claim about the Sphinx with historical accounts and new research including reanalysis of seismic studies and updates to Schoch's water weathering research and Bauval's Orion Correlation Theory • Examines how the Sphinx is contemporaneous with Göbekli Tepe, aligned with the constellation Leo, and was recarved during the Old Kingdom era of Egypt • Reveals that the Sphinx was built during the actual historical Golden Age of ancient Egypt, the period known in legend as Zep Tepi No other monument in the world evokes mystery like the Great Sphinx of Giza. It has survived the harsh climate of Egypt for thousands of years and will remain long after our own civilization is gone. According to orthodox Egyptology, the Sphinx was built around 2500 BCE as a memorial to the pharaoh Khafre. Yet this "fact" has scant to no supportive evidence. When was the Sphinx really built and, most importantly, why? In this provocative collaboration from two Egyptology outsiders, Robert M. Schoch, Ph.D., and Robert Bauval combine their decades of research to show how the Sphinx is thousands of years older than the conventional Egyptological timeline and was built by a long forgotten pre-Pharaonic civilization. They examine the known history of the Sphinx, contrasting what Egyptologists claim with prominent historical accounts and new research, including updates to Schoch's geological water weathering research and reanalysis of seismic studies. Building on Bauval's Orion Correlation Theory, they investigate the archaeoastronomical alignments of the monuments of the Giza Plateau and reveal how the pyramids and Sphinx were built to align with the constellations of Orion and Leo. Analyzing the evidence for a significantly older construction phase at Giza and the restoration and recarving of the Sphinx during the Old Kingdom era, they assert that the Sphinx was first built by an advanced pre-Pharaonic civilization that existed circa 12,000 years ago on the Giza Plateau, contemporaneous with the sophisticated Göbekli Tepe complex. The authors examine how the monuments at Giza memorialize Zep Tepi, the Golden Age of legend shown here to be an actual historical time period from roughly 10,500 BCE through 9700 BCE. Moving us closer to an understanding of the true age and purpose of the Great Sphinx, Schoch and

Bauval provide evidence of an early high civilization witnessed by the Great Sphinx before the end of the last ice age.

*Burning Planet* Andrew C. Scott, 2018-03-13 Raging wildfires have devastated vast areas of California and Australia in recent years, and predictions are that we will see more of the same in coming years, as a result of climate change. But this is nothing new. Since the dawn of life on land, large-scale fires have played their part in shaping life on Earth. Andrew Scott tells the whole story of fire's impact on our planet's atmosphere, climate, vegetation, ecology, and the evolution of plant and animal life. It has caused mass extinctions, and it has propelled the spread of flowering plants. The exciting evidence we can now draw on has been preserved in fossilized charcoal, found in rocks hundreds of millions of years old, from all over the world. These reveal incredibly fine details of prehistoric plants, and tell us about climates from deep in earth's history. They also give us insight into how early hominids and humans tamed fire and used it. Looking at the impact of wildfires in our own time, Scott also looks forward to how we might better manage them in future, as climate change has an increasing effect on our world.

**Magicians of the Gods** Graham Hancock, 2015-09-10 \*Ten-year anniversary edition with new introduction from the author\* Star Reader Reviews - Captivating, necessary and enlightening. Essential. Wonderfully researched. This book is as good, if not better, than Fingerprints of the Gods. Read this book. Change your perspective. Graham Hancock - star of Netflix's ANCIENT APOCALYPSE - is author of the global bestseller Fingerprints of the Gods. A book which remains an astonishing, deeply controversial, wide-ranging investigation of the mysteries of our past and the evidence for Earth's lost civilization. *Magicians of the Gods*, the sequel to his seminal work, explores how, at the end of the last ice age, fragments from a giant comet caused a global cataclysm, on a scale unseen since the extinction of the dinosaurs, wiping out an advanced civilization from the earth. Making us a species with amnesia, forced to begin again like children with no memory of what went before. This book is filled with completely new evidence, new travels to the world's most mysterious archaeological sites, new insights based on the latest scientific evidence. The impacts, from the comet fragments (a mile wide approaching at more than 60,000 miles an hour) generated huge amounts of heat which instantly liquidized millions of square kilometers of ice, destabilizing the Earth's crust and causing the global deluge that is remembered in myths all around the world. A second series of impacts, equally devastating, causing further cataclysmic flooding, occurred 11,600 years ago, the exact date that Plato gives for the destruction and submergence of Atlantis. But there were survivors - known to later cultures by names such as 'the Sages', 'the Magicians', 'the Shining Ones', and 'the Mystery Teachers of Heaven'. They travelled the world in their great ships doing all in their power to keep the spark of civilization burning, settling at key locations: Gobekli Tepe in Turkey, Baalbek in the Lebanon, Giza in Egypt, ancient Sumer, Mexico, Peru and across the Pacific. Everywhere they went these 'Magicians of the Gods' brought with them the memory of a time when mankind had fallen out of harmony with the universe and paid a heavy price. A memory and a warning to the future... For the

comet that wrought such destruction may not be done with us yet. Astronomers believe that a 20-mile wide 'dark' fragment of the original giant comet remains hidden within its debris stream and threatens the Earth. An astronomical message encoded at Gobekli Tepe, and in the Sphinx and the pyramids of Egypt, warns that the 'Great Return' will occur in our time...

*European Glacial Landscapes* David Palacios, Philip D. Hughes, Jose M. Garcia-Ruiz, Nuria de Andrés, 2022-09-16 *European Glacial Landscapes: Last Deglaciation* brings together relevant experts on the history of glaciers and their impact on the landscape of the main European regions. Soon after the Last Glacial Maximum, a rapid process of the glacial retreat began throughout Europe. This was interrupted several times by abrupt climate cooling, which caused rapid, although moderate, re-advance of the glaciers, until the beginning of the Holocene when the climate became relatively stable and warm. These successive glacial advances and retreats during the Last Deglaciation have shaped much of the European landscape, reflecting abrupt climatic fluctuations. As our knowledge of abrupt climate changes since the Last Glacial Maximum progresses, new uncertainties arise. These are critical for understanding how climate changes disseminate through Europe, such as the lag between climate changes and the expansion or contraction of glaciers as well as the role of the large continental ice sheets on the European climate. All these contributions are included in the book, which is an invaluable resource for geographers, geologists, environmental scientists, paleoclimatologists, as well as researchers in physics and earth sciences. - Provides a synthesis that highlights the main similarities or differences, through both space and time, during the Last Deglaciation of Europe - Features research from experts in quaternary, geomorphology, palaeoclimatology, palaeoceanography and palaeoglaciology on the Last Deglaciation in Europe during Termination 1 and the important Late Pleistocene-Holocene transition - Includes detailed colour figures and maps, providing a comprehensive overview of the glacial landscapes of Europe during the last deglaciation

Climates, Landscapes, and Civilizations Liviu Giosan, Dorian Q. Fuller, Kathleen Nicoll, Rowan K. Flad, Peter D. Clift, 2013-02-25 Published by the American Geophysical Union as part of the Geophysical Monograph Series, Volume 198. Climates, Landscapes, and Civilizations brings together a collection of studies on the history of complex interrelationships between humans and their environment by integrating Earth science with archeology and anthropology. At a time when climate change, overpopulation, and scarcity of resources are increasingly affecting our ways of life, the lessons of the past provide multiple reference frames that are valuable for informing our future decisions and action plans. Volume highlights include discussions of multiple connotations of the Anthropocene, landscapes as a link between climate and humans, synoptic approaches to explore large-scale cultural patterns, regional studies for contextualizing cultural complexity, and environmental determinism and social theory. Straddling the fields of Earth sciences, anthropology, and archaeology and presenting research from across several continents, Climates, Landscapes, and Civilizations will appeal to a wide readership among scientists, scholars, and the public at large.

*Attack Surface* Cory Doctorow, 2020-10-13 Cory Doctorow's *Attack Surface* is a standalone novel set in the world of New York Times bestsellers *Little Brother* and *Homeland*. Most days, Masha Maximow was sure she'd chosen the winning side. In her day job as a counterterrorism wizard for an transnational cybersecurity firm, she made the hacks that allowed repressive regimes to spy on dissidents, and manipulate their every move. The perks were fantastic, and the pay was obscene. Just for fun, and to piss off her masters, Masha sometimes used her mad skills to help those same troublemakers evade detection, if their cause was just. It was a dangerous game and a hell of a rush. But seriously self-destructive. And unsustainable. When her targets were strangers in faraway police states, it was easy to compartmentalize, to ignore the collateral damage of murder, rape, and torture. But when it hits close to home, and the hacks and exploits she's devised are directed at her friends and family--including boy wonder Marcus Yallow, her old crush and archrival, and his entourage of naïve idealists--Masha realizes she has to choose. And whatever choice she makes, someone is going to get hurt. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

*Geochemical Evaluation of the Younger Dryas Boundary (YDB) Impact Hypothesis, El Carrizal Baja California Sur, Mexico* Matthew William Stone, 2013 The Younger Dryas Boundary (YDB) extraterrestrial impact hypothesis is purported to have triggered the Younger Dryas stadial and coincides with the Pleistocene extinction and disappearance of the Clovis Paleo-Indian culture. Evidence supporting or refuting this hypothesis has great implications for the fields of geology, paleontology, and archaeology. Our field site for testing the YDB ET impact hypothesis is located on the El Carrizal fault, 38 km south of La

Paz, Baja California Sur, Mexico. Sediment samples were collected from a 3 m stratigraphic section at El Carrizal, which spanned the sediments where a mammoth fossil was located. To date we report the results of this investigation and analysis of sediments are inconclusive. We have not found any defendable evidence at the El Carrizal study site to support or oppose the hypothesis for the Younger Dryas extraterrestrial impact.

**Paleoamerican Origins** Robson Bonnicksen,2005 *Paleoamerican Origins: Beyond Clovis* presents 23 up-to-date syntheses of important topics surrounding the debate over the initial prehistoric colonization of the Americas. These papers are written by some of the foremost authorities who are on the trail of the first Americans. The papers are written by some of the foremost authorities who are on the trail of the first Americans. The papers in this volume include a discussion of the archaeological evidence for Clovis and Pre-Clovis sites in North America (11 papers) and South America (2 papers). In addition, papers on the genetic evidence (2 papers) and skeletal evidence (4 papers) provide insights into the origins of the first Americans. Additional papers include ideas on the changing perceptions of Paleoamerican prehistory, public policy and science, and a comprehensive concluding synthesis.

*Patterns in Prehistory* Robert J. Wenke,Deborah Olszewski,2007 Who are we? How did the world become what it is today? What paths did humanity traverse along the way? *Patterns in Prehistory, Fifth Edition*, is a comprehensive and engaging survey of humanity's past three million years. It brings together theories and archaeological examples to pose questions about who we are and the means by which humanity evolved into what it is today. Ideal for introductory courses in world prehistory and origins of complex societies, *Patterns in Prehistory, Fifth Edition*, offers a unified and thematic approach to the four great transformations--or patterns--that characterize humanity's past: the origins and evolution of culture; the origins of modern humans and human behaviors; the origins of agriculture; and the origins of complex societies, civilizations, and pre-industrial states. Integrating theoretical approaches with archaeological data from the Middle East, Mesoamerica, North and South America, Egypt, China, the Indus Valley, and temperate Europe, *Patterns in Prehistory, Fifth Edition*, reveals how archaeologists decipher the past. It demonstrates how theory and method are combined to derive interpretations and also considers how interpretations evolve as a result of accumulating data, technological advances in recording and analyzing data sets, and newer theoretical perspectives. This new edition of *Patterns in Prehistory* provides: \*

Fresh insights with the addition of coauthor Deborah Olszewski, who has carefully reviewed and revamped the material with an eye toward making the text clearly understandable to today's students \* Updated discussions throughout, including expanded information on post-processual archaeology, current methodologies, and technological advances \* Approximately 250 illustrations and maps, more than half of which are new to this edition \* Groundbreaking research on new discoveries of hominin fossils, genetic research, prehistoric migrations, the peopling of the Americas, and theories of the origins of agriculture and the origins of complex societies \* Timelines for all relevant chapters as well as an overarching timeline for the entire book to help students place events in context \* Extensively updated chapter bibliographies and chapter endnotes

The Earth System Lee R. Kump, James F. Kasting, Robert G. Crane, 2004 The Earth System, Second Edition employs a systems-based approach to examine Earth science at the global level. This text explores how: Earth's processes have connections to the past and to each other Seemingly small-scale changes to Earth can have large-scale effects Processes that are occurring now are molding the course of the future The second edition incorporates two new chapters: Modeling the Atmosphere-Ocean System--A discussion of why numerical models are necessary, how they are used, what they can tell us about past and future climates, and what their limitations are. A Focus on the Biota: Ecosystems and Biodiversity--Focuses on life's role in the Earth system, how ecosystems function, what biodiversity is, and whether or not biological diversity enhances the stability of ecosystems. Three categories of boxed text are included and offer a deeper study of the topics presented. A Closer Look--Includes more advanced concepts, results from current research, and explanations of interesting phenomena. Important Concepts--In-depth presentations of fundamental concepts from the natural sciences essential to our understanding of the Earth system. Thinking Quantitatively--Demonstrates how simple mathematics can be used to better understand the workings of the Earth system.
