

Critical Theory Of Education

Raymond Allen Morrow, Carlos Alberto Torres

The Palgrave Handbook on Critical Theories of Education Ali A. Abdi, Greg William Misiaszek, 2022-09-13 This handbook brings together a range of global perspectives in the field of critical studies in education to illuminate multiple ways of knowing, learning, and teaching for social wellbeing, justice, and sustainability. The handbook covers areas such as critical thought systems of education, critical race (and racialization) theories of education, critical international/global citizenship education, and critical studies in education and literacy studies. In each section, the chapter authors illuminate the current state of the field and probe more inclusive ways to achieve multicentric knowledge and learning possibilities.

A Critical Theory of Education Robert E. Young, 1989

Critical Theories in Education Thomas S. Popkewitz, 1999 First Published in 1999. Routledge is an imprint of Taylor & Francis, an informa company.

Critical Theory and Pedagogy Douglas Kellner, 2022 Critical Theory and Pedagogy articulates a metatheory for a philosophy of education aimed toward democratizing, reconstructing, and decolonizing education to meet the challenges of a global and technological society.

Becoming a Critical Educator Patricia H. Hinchey, 2004 Many American educators are all too familiar with disengaged students, disenfranchised teachers, sanitized and irrelevant curricula, inadequate support for the neediest schools and students, and the tyranny of standardizing testing. This text invites teachers and would-be teachers unhappy with such conditions to consider becoming critical educators - professionals dedicated to creating schools that genuinely provide equal opportunity for all children. Assuming little or no background in critical theory, chapters address several essential questions to help readers develop the understanding and resolve necessary to become change agents. Why do critical theorists say that education is always political? How do traditional and critical agendas for schools differ? Which agenda benefits whose children? What classroom and policy changes does critical practice require? What risks must change agents accept? Resources point readers toward opportunities to deepen their understanding beyond the limits of these pages.

Habermas, Critical Theory and Education Mark Murphy, Ted Fleming, 2010-04-26 This book delivers a definitive contribution to the understanding of Habermas's oeuvre as it applies to education. The authors examine Habermas's contribution to pedagogy, learning and classroom interaction; the relation between education, civil society and the state;

forms of democracy, reason and critical thinking; and performativity, audit cultures and accountability.

Critical Theory and Classroom Talk Robert Young,1992 An application of Young's Habermasian critical theory of education to classroom communication problems of teachers in schools, with a special focus on the question/answer cycle and its educational role. The book uses classroom transcripts extensively in the analysis.

Finding Freedom in the Classroom Patricia H. Hinchey,2010 Since its introduction in 1998, *Finding Freedom in the Classroom* has impacted countless educators and preservice teachers by providing provocative questions about taken-for-granted educational routines as well as an alternative, imaginative view of what classrooms might become. This revised edition brings the conversation to the present day with contemporary examples and references to the best current thinking and writing on relevant issues. By defining terms in everyday language and demonstrating their relevance to everyday life in and out of the classroom, the book demystifies such formidable concepts as hegemony, epistemology, and praxis for readers with little or no background in educational philosophy. Each chapter in this edition ends with several thought-provoking discussion questions and an annotated list of suggestions for further reading, which together provide a sturdy bridge between the theoretical and the practical. *Finding Freedom in the Classroom* can help teachers both imagine and build new classroom worlds, empowering students and teachers alike to actively shape - rather than passively accept - their fates.

Critical Theory and Educational Research Peter McLaren,James M. Giarelli,1995-01-01 Applies European critical theory to North American educational research.

Critical Theory and Education Rex Gibson,1986-01-01

Toward a Critical Theory of Education Douglas Kellner,2013

The Critical Turn in Education Isaac Gottesman,2016-03-17 The *Critical Turn in Education* traces the historical emergence and development of critical theories in the field of education, from the introduction of Marxist and other radical social theories in the 1960s to the contemporary critical landscape. The book begins by tracing the first waves of critical scholarship in the field through a close, contextual study of the intellectual and political projects of several core figures including, Paulo Freire, Samuel Bowles and Herbert Gintis, Michael Apple, and Henry Giroux. Later chapters offer a discussion of feminist critiques, the influx of postmodernist and poststructuralist ideas in education, and critical theories of race. While grounded in U.S. scholarship, *The Critical Turn in Education* contextualizes the development of critical ideas and political projects within a larger international history, and charts the ongoing theoretical debates that seek to explain the relationship between school and society. Today, much of the language of this critical turn has now become commonplace—words such as hegemony, ideology, and the term critical itself—but by providing a historical analysis, *The Critical Turn in Education* illuminates the complexity and nuance of these theoretical tools, which offer ways of understanding the intersections between individual identities and structural forces in an attempt to engage and overturn

social injustice.

Social Theory and Education Raymond Allen Morrow, Carlos Alberto Torres, 1995-03-09 This book summarizes the body of knowledge about sociology of education and cultural studies as it informs educational research and critical pedagogy. It synthesizes the most relevant work in social and cultural reproduction published in the last three decades in English, French, German, Spanish, and Portuguese. The authors document and critique the theoretical discussion in developments in both advanced societies and peripheral ones, and link macro-sociological issues with social psychological ones. The book introduces theories of the state to underscore a political sociology of education, and highlights an agenda for theory building, research, and practice in sociology of education.

Educational Leadership and Critical Theory Charles L. Lowery, Chetanath Gautam, Robert White, Michael E. Hess, 2023-11-16 This book shows how critical theory can help school leaders and administrators to prepare students for the ever-changing political, cultural, economic, and societal conditions of the world. The contributors use ideas from critical theorists including Adorno, Fromm, Marcuse and Habermas and connect them with contemporary theories and debates in educational leadership from moral education to critical theories on race, to culturally relevant practice. Educational Leadership and Critical Theory challenges the misconceptions of many present-day educators about the analytical lens offered by the Frankfurt School theorists which is often dismissed by policymakers and practitioners. Written by leading scholars based in the UK, USA, and Canada, the contributors emphasize and explain the importance of educational aesthetics, dialectics, education and civilization, the structural transformation of education's place in the public sphere, and education as revolution and enlightenment.

Beyond Critique Bradley A. Levinson, Jacob P. K. Gross, Christopher Hanks, Julia Heimer Dadds, Kafi Kumasi, Joseph Link, 2015-12-03 This book introduces educational practitioners, students, and scholars to the people, concepts, questions, and concerns that make up the field of critical social theory. It guides readers into a lively conversation about how education can and does contribute to reinforcing or challenging relations of domination in the modern era. Written by a group of experienced educators and scholars, in an engaging style, Critical Social Theories and Education introduces and explains the preeminent thinkers and traditions in critical social theory, and discusses the primary strands of educational research and thought that have been informed and influenced by them.

The Routledge International Handbook of Critical Education Michael W. Apple, Wayne Au, Luís Armando Gandin, 2009 This title provides a comprehensive analysis of the relationship between power, knowledge, education, and schooling.

Educational Leadership and Critical Theory Chetanath Gautam, Michael E. Hess, Charles L. Lowery, Robert White, 2023 This book shows how critical theory can help school leaders and administrators to prepare students for the ever-changing political, cultural, economic, and societal conditions of the world. The contributors use ideas from critical theorists

including Adorno, Fromm, Marcuse and Habermas and connect them with contemporary theories and debates in educational leadership from moral education to critical theories on race, to culturally relevant practice. Educational Leadership and Critical Theory challenges the misconceptions of many present-day educators about the analytical lens offered by the Frankfurt School theorists which is often dismissed by policymakers and practitioners. Written by leading scholars based in the UK, USA, and Canada, the contributors emphasize and explain the importance of educational aesthetics, dialectics, education and civilization, the structural transformation of education's place in the public sphere, and education as revolution and enlightenment.

The Practical Critical Educator Karyn Cooper, Robert E. White, 2006-06-10 I am delighted to have the opportunity to write this foreword for Karyn Cooper's and Robert White's splendid and compelling edited text on *The Practical Critical Educator*. Critical practice in education is grounded in two bodies of thought and action: critical theory and critical pedagogy. Drawing on classical Marxism and its articulation of how oppression and injustice arose through capitalism's economic exploitation of labour, critical theories of society took a cultural turn in the writings of Adorno and Horkheimer, European Jewish refugees who fled to America, where they articulated how the power relations and oppressive forces of capitalism expressed themselves in the alienating symbolic forces of culture, music and art. When booming demographics and an economic surplus fuelled the student movement of the late 60s, and in to the 70s, in many Western nations, new forms of cultural Marxism were added to this body of critical theory, extending beside but also far beyond the classical Marxist preoccupations with economic equalities of social class. British writers, such as the articulate and elegant cultural Marxist Raymond Williams, revived and refined the "lost" work of Italian Marxist, Antonio Gramsci from the 1920s, and his concern with the influence of what he called hegemony – the force through which ruling classes could maintain existing structures of domination by defining, through language, media and culture, what was normal, natural, true, beautiful and defensible, and what was eccentric, unreasonable, or unworthy of serious consideration.

For Education Carr, Wilfred, 1995-02-01 In this text, Carr provides a justification for reconstructing educational theory and research as a form of critical inquiry. In doing this, he confronts such philosophical questions as: what is educational theory?; what is an educational practice?; and how are theory and practice related?

The Curriculum of the Future Michael F. D. Young, 2002-01-04 In this important book the author looks back on the 'knowledge question'. What knowledge gets selected to be validated as school knowledge or as part of the school curriculum, and why is it selected? Looking forward, Young discusses how most developed countries have high levels of participation in post-compulsory education, but still use curricula designed for a time when only the elite pursued further education. He argues the need to rethink post-16 education to shift focus onto vocational education, school-work issues and lifelong learning.
