What Is a Person? Christian Smith, 2010 The task of understanding human beings, what we ourselves are, our constitution and condition, is a perennial problem in philosophy and related disciplines. Smith argues here that our understanding of human persons is threatened by technological development and capricious academic theories alike, seeking to deny or relativize the personhood of humanity. Smith's book puts a stake in the ground, in defense of a view of the human that is genuinely humanistic in the traditional sense and capable of sustaining with intellectual coherence things like modern human rights and universal benevolence.

Creating Human Nature Benjamin Gregg, 2022-10-20 Human genetic enhancement, examined from the standpoint of the new field of political bioethics, displaces the age-old question of truth: What is human nature? This book displaces that question with another: What kind of human nature should humans want to create for themselves? To answer that question,

this book answers two others: What constraints should limit the applications of rapidly developing biotechnologies? What could possibly form the basis for corresponding public policy in a democratic society? Benjamin Gregg focuses on the distinctly political dimensions of human nature, where politics refers to competition among competing values on which to base public policy, legislation, and political culture. This book offers citizens of democratic communities a broad perspective on how they together might best approach urgent questions of how to deal with the socially and morally challenging potential for human genetic engineering.

Introduction to the Origins of Biolaw. A European Perspective Stefan Kirchner,2015-12-21 Scientific Essay from the year 2014 in the subject Law - European and International Law, Intellectual Properties, , language: English, abstract: In a society which practically values commercial productivity above almost all else, the right to life and human dignity of the weak, sick and infirm is increasingly at risk. This leads to an increasing debate of the concept of human dignity. Deeply rooted in philosophical, moral and religious ideas, human dignity is a concept which can be difficult to access for lawyers. At the same time it has been given pride of place in a number of legal systems, including in Article 1 of the German Constitution, the basic law. It also provides the fundament of international human rights treaties such as the European Convention on Human Rights. In this essay, some of the ideas behind human dignity as a concept are explained against the backdrop of both modern biolaw and international human rights.

Human Rights in Africa Richard Amoako Baah,2000-10-18 Human Rights in Africa is an in depth examination of the concept of human rights as it is applied in the world today, with a focus on Africa. Though the goals of human rights are to benefit mankind, the concept is not devoid of ideology and a particular social orientation. The ethos of the concept as formulated today in a world of disproportionate resources, avarice, competition, and greed, makes it difficult to implement in certain societies. The intellectualization of the concept has made it easy for many to lose sight of the fact that human rights should ultimately be linked to how best human dignity can be protected in a particular society given the realities of that society, as opposed to an artificial imposition of a rigid regime on peoples who do not understand what the concept means.

In einer vergleichenden Studie werden die Ausgestaltung der Grundrechte und -freiheiten in den Menschenrechtskatalogen (bills of rights) der Verfassungen Tansanias, Kenias und Ugandas, auch im Lichte der bestimmenden historischen, politischen, ökonomischen und sozialen Faktoren, untersucht. Mit seiner detaillierten Analyse der Gerichtsentscheidungen in bezug auf die Durchsetzung der verfassungsrechtlichen Individualrechte und die Einbeziehung sowohl internationaler Menschenrechtskonventionen als auch ausländischer Rechtsprechung in der Praxis der Gerichte ist das Buch zugleich ein Beitrag zur Verfassungsrechtsvergleichung. Der Band zeigt Entwicklungen, Defizite und Alternativen auf und ist damit wichtig sowohl für vergleichende Rechtswissenschaftler in Europa als auch für Verfassungsrechtler und Rechtsanwälte in Übersee. Exploring the World of Human Practice Aurel Kolnai, Zoltán Balázs, Francis Dunlop, 2004-12-10 Aurel Kolnai was born in Budapest, in 1900 and died in London, in 1973. He was, according to Karl Popper and the late Bernard Williams, one of the most original, provocative, and sensitive philosophers of the twentieth century. Kolnai's moral philosophy is best described in his own words as intrinsicist, non-naturalist, non-reductionist, which took its original impetus from Scheler's value ethics, and was developed by using a natural phenomenologist method. The unique combination of linguistic analysis and phenomenology yields highly original ideas on classical fields of moral theory, such as responsibility and free will, the meaning of right and wrong, the universalisability of ethical norms, the role of moral emotions, internalism vs externalism, to mention a few. The volume presents a selection of essays by Kolnai, including his main political theoretical work, *What is Politics About*, available in English here for the first time. The second half of the book Kolnai's work is analyzed in a series of essays by eminent scholars
