Handbook of Research on Ergonomics and Product Design Hernández Arellano, Juan Luis, Maldonado Macías, Aide Aracely, Castillo Martínez, Juan Alberto, Peinado Coronado, Porfirio, 2018-04-06 Product design is an important field where ergonomics and human factors should be applied. To achieve this goal, effective strategies for process improvement must be researched and implemented. The Handbook of Research on Ergonomics and Product Design is a critical scholarly resource that provides new theories, methodologies, and applications of ergonomics and product design and redesign. Featuring a broad range of topics such as additive manufacturing, product analysis, and sustainable packing development, this book is geared towards academicians, practitioners, and researchers seeking current research on new theories, methods, and applications related to ergonomics and product design.

Ingeniería de métodos. Movimientos y tiempos - 1ra edición Luis Carlos Palacios Acero, 2009-01-01 Métodos: Es la técnica para eliminar desperdicios de mano de obra, máquinas, materiales, instalaciones, y dinero. busca eficiencia, productividad y rentabilidad de las empresas, los directivos, los profesionales y el recurso humano en general. Movimientos: Todo lo que puede hacer una máquina no lo debe ejecutar una persona ya que conviene aprovechar su inteligencia y capacidad en actividades más productivas evitando la fatiga y trabajos degradantes. Tiempos: Son el indicador para monitorear el desempeño de las personas, cumplir los compromisos con los clientes, disminuir los costos para ser rentables, competitivos, sostenibles y crecer.

Advances in Social and Organizational Factors Peter Vink, 2020-07-19 An exploration of how ergonomics can contribute to the solution of important societal and engineering challenges, *Advances in Social and Organizational Factors* discusses the optimization of sociotechnical systems, including their organizational structures, policies, and processes. It includes coverage of communication, crew resource management, work design, design of working times, teamwork, participatory design, community ergonomics, cooperative work, new work paradigms, organizational culture, virtual organizations, telework, and quality management. The book provides research on urban infrastructures and how to shape urban spaces, including stadiums and museums. It covers warning systems in cars, voice-based interfaces, and the positive effects on manufacturing

processes available from health informatics and management systems. Several chapters examine the role human factors can play in counter-terrorism efforts and in interpreting deceptive behaviors. They provide suggestions on how to improve enterprise resource planning systems and stress the importance of lifelong learning, personalized learning, and work-life balance. The book also highlights issues with special populations, detailing how to design and adapt products and work situations for these groups. In addition to exploring the challenges faced in optimizing sociotechnical systems, the book underlines themes that play a role in all the challenges and how they are linked to each other. It concludes with an exploration of emotional ergonomics and the important positive effects of making people happy and healthy. With authors from around the globe, the book supplies a broad look at current challenges and possible solutions.

Information Technology and Systems Álvaro Rocha, Carlos Ferrás, Paulo Carlos López-López, Teresa Guarda, 2021-01-30 This book is composed by the papers written in English and accepted for presentation and discussion at The 2021 International Conference on Information Technology & Systems (ICITS 21), held at the Universidad Estatal Península de Santa Elena, in Libertad, Ecuador, between the 10th and the 12th of February 2021. ICITS is a global forum for researchers and practitioners to present and discuss recent findings and innovations, current trends, professional experiences and challenges of modern information technology and systems research, together with their technological development and applications. The main topics covered are information and knowledge management; organizational models and information systems; software and systems modelling; software systems, architectures, applications and tools; multimedia systems and applications; computer networks, mobility and pervasive systems; intelligent and decision support systems; big data analytics and applications; human-computer interaction; ethics, computers & security; health informatics; and information technologies in education.

Introducción a la Ingeniería Industrial Gabriel Baca Urbina, Margarita Cruz Valderrama, Isidro Marco Antonio Cristóbal Vázquez, Gabriel Baca Cruz, Juan Carlos Gutierrez Matus, Arturo Andrés Pacheco Espejel, Igor Antonio Rivera González, Angel Eustorgio Rivera González, 2014-10-21 La ingeniería industrial se considera una de las ingenierías más versátiles y completas. Con base en su preparación, el ingeniero industrial posee la habilidad para desarrollarse en las áreas de recursos humanos, compras, logística u ocupar alguna dirección administrativa o del estudio del trabajo, entre otras áreas. Esta es la razón principal por la que el estudiante de ingeniería industrial que inicia su carrera, adquiera un panorama amplio acerca de las diferentes asignaturas que forman parte de sus estudios profesionales. En esta nueva edición de *Introducción a la ingeniería industrial*, el lector ampliará sus horizontes en su preparación, ya que en el capítulo 13 se desarrolla magistralmente el novedoso tema de la ergonomía, lo que lo convierte en un texto único en su tipo. Por la diversidad de sus contenidos, cada capítulo fue desarrollado por un especialista con amplios conocimientos en el tema

exponiéndolo de forma amena, clara y sencilla y empleando conceptos básicos necesarios para su formación.

Continuing Engineering Education for a Sustainable Future Patricia Caratozzolo, Angeles Dominguez, Bente Nørgaard, Guillermo M. Chans, 2025-08-06 The World Economic Forum stated in its 2023 “Future of Jobs” report that 44% of workers' skills will change in the next five years. Additionally, six out of ten workers will require training before 2027, and only half will have adequate training opportunities. With this in mind, the three most pressing challenges currently facing the Continuing Engineering Education (CEE) community include: 1. The shifting skill requirements dictated by the job market. Engineering roles in various sectors are evolving, demanding a mix of Knowledge, Skills, and Abilities (KSA) that is difficult to predict with certainty. In addition, the pace of Digital Transformation will highly influence these requirements. 2. The climate change mitigation and adaptation. Engineers must reskill and adapt to changing sustainability requirements, and educational programs must support this transition. 3. The underrepresentation of minorities. Women, racial and ethnic minorities, and individuals with disabilities face disparities in opportunities, mentorship, and inclusion.

Advances and Applications in Computer Science, Electronics and Industrial Engineering Jyrki Nummenmaa, Federico Pérez-González, Bruno Domenech-Lega, Jean Vaunat, Félix Oscar Fernández-Peña, 2019-10-23 This book presents the proceedings of the Conference on Computer Science, Electronics and Industrial Engineering (CSEI 2019), held in Ambato in October 2019, with participants from 13 countries and guest speakers from Chile, Colombia, France, Japan, Spain, Portugal, and United States. Featuring 23 peer-reviewed papers, it discusses topics such as the use of metaheuristic for non-deterministic problem solutions, software architectures for supporting e-government initiatives, and the use of electronics in e-learning and industrial environments. It also includes contributions illustrating how new approaches on these converging research areas are impacting the development of human societies around the world into Society 5.0. As such, it is a valuable resource for scholars and practitioners alike.

Advances in Information and Communication Kohei Arai, 2021-04-12 This book aims to provide an international forum for scholarly researchers, practitioners and academic communities to explore the role of information and communication technologies and its applications in technical and scholarly development. The conference attracted a total of 464 submissions, of which 152 submissions (including 4 poster papers) have been selected after a double-blind review process. Academic pioneering researchers, scientists, industrial engineers and students will find this series useful to gain insight into the current research and next-generation information science and communication technologies. This book discusses the aspects of communication, data science, ambient intelligence, networking, computing, security and Internet of things, from classical to intelligent scope. The authors hope that readers find the volume interesting and valuable; it gathers chapters addressing state-of-the-art intelligent methods and techniques for solving real-world problems along with a vision of

the future research.

Industria de la moda producción y materiales Carlos Fernando Rojas Navia,2014-01-01 Esta obra trata a profundidad la administración de la producción y las operaciones para el desarrollo de una colección en la industria de la confección y la moda; cuyo fin es ser una herramienta de trabajo para que los lectores puedan materializar una propuesta de vestuario de manera ordenada y rentable para evitar pérdidas económicas por desconocimiento en la gestión de producción Prêt-à-porter (expresión francesa que significa textualmente 'Listo para llevar', son prendas que se producen en serie para satisfacer la necesidad y expectativa de la demanda). Al desarrollar una colección se debe pensar no solo en lo creativo o novedoso que se puede ser, es necesario tener claro que la gestión tiene que generar rentabilidad y beneficiar el proceso que se está llevando a cabo en la programación de materiales y la producción del vestuario. Finalmente, lo que se pretende en toda compañía es alcanzar las metas propuestas en ventas, producción y reconocimiento de marca para ser competitivos.
