*Un-American* John J. Pitney Jr., 2020-04-28 A Scathing Indictment of Donald Trump on the Eve of the 2020 Election Un-American? President Donald J. Trump has been called many names, but how can this term apply to a candidate and president whose slogan is “make America great again?” How can such a term apply to the “America First” president? In this book, John J. Pitney Jr., one of America’s most incisive conservative commentators exposes a core irony of Trump’s presidency: that a man who is quick to question the patriotism of his critics is himself deeply unpatriotic. Pitney argues that real Americanism is about ideas and ideals: truth, equality, the rule of law, patriotic service, and the hope that America can serve as an example to the rest of the world. By words and actions, Trump has disparaged all of these things. Through an examination of his record, this book tells how Trump subverts genuine American greatness.

*Firebird* Tony Rothman,2015-03-31 Rothman's novel is filled with scientific discussions on everything from the equipment used to the different types of fusion, like cold or laser, complete with corresponding jargon. But Rothman turns all of it, even a convoluted conspiracy, into a diverting, worthwhile story... Intelligent in its technical details, but also refined and delightfully complex in its storytelling. -- Kirkus The world is moving towards alternative energy. Two giant laboratories, one in France, one in Texas, are engaged in a contest to give mankind a limitless source of energy-fusion, the energy source of stars. In France, the European Union is constructing the colossal ITER project. At CFRC, the Controlled Fusion Research Center near Austin, a scientists have constructed a machine they call Prometheus to challenge ITER. When the director of the Austin lab attempts to achieve fusion on the day of Prometheus' dedication, a near-fatal accident ensues, and in an instant the rivalry between ITER and CFRC becomes a race to change the future of the world. But was it an accident, or sabotage? Prominent physicist and writer Tony Rothman, PhD, uses his technical expertise to create a rare and timely novel based on genuine science. Not science fiction, the science of *Firebird* is as real as the collision between science and politics it portrays. Rothman, who has taught physics at Princeton and Harvard Universities, is the author of eleven books. He has won numerous writing awards and has been nominated for the Pulitzer Prize.
