The Acheulian Site of Gesher Benot Ya'aqov Volume IV Naama Goren-Inbar, Nira Alperson-Afil, Gonen Sharon, Gadi Herzlinger, 2018-03-15 This manuscript is the 4th Volume of the Gesher Benot Ya'aqov (GBY) monograph sub-series. The goal of the book is to publish the lithic assemblages originating in the excavations of the Acheulian site at Gesher Benot Ya'aqov (GBY), Israel. The authors provide the readers with detailed descriptions of the lithic assemblages, illustrations (maps, photographs, drawings) and complete inventory of the artifacts that were excavated during the seven field seasons of 1989-1997 (two in 1997) under the directorship of Prof. Naama Goren-Inbar. This manuscript includes the classification of Large Cutting Tools (bifaces: handaxes and cleavers), Cores and Core Tools, and Flake Tools made of three different raw materials (flint, basalt and limestone). This major classification system enables, in addition to the characterization of the assemblages, intra and inter assemblage analyses and comparisons. It forms the foundation and means with which the GBY cultural sequence can be investigated and compared with other Levantine, African and Asian Acheulian entities. From a methodological perspective the authors apply a detailed attribute analysis to all lithic items, a method that integrates morpho-technological and stylistic observations culminating in better understanding of the Acheulian realm as documented by the analysis. This analysis is aimed to refine and improve the understanding beyond that of types and their technology and to allow describing the reduction sequence (chaîne opératoire) of some of the major components of the lithic assemblages. The unique record of diverse data from GBY provides insight into hominin behavior (through time) along the margins of the paleo-Lake Hula, and sheds light on processes that led to the colonization of other parts of Eurasia. The book will be of interest to academics and students in all disciplines of Quaternary studies, and to archaeologists using GIS for intra-site spatial analysis.

**Water and Peace for the People** Jon Martin Trondalen, 2008-01-01 This book proposes practical and objective solutions to the entrenched water conflicts in the Middle East. The author reveals and clarifies the complexity of the water conflicts, drawing on years of experience facilitating and chairing water negotiations in the region. The bottom line is: Unless the countries involved co-operate, the consequences will be devastating. The lack of plentiful and clean water for the people will not only result in severe human suffering, but could also have grave geopolitical consequences. The book covers four critical areas: the Euphrates and Tigris Rivers, where new documentation reveals alarming trends; the politically sensitive Golan Heights, with its water disputed by Israel and Syria; the Hasbani water dispute between Lebanon and Israel; the

longstanding water resource dispute between the Israelis and Palestinians

*Fountains of Wisdom* Gerbern S. Oegema, Loren T. Stuckenbruck, Henry W. Morisada Rietz, 2022-01-27 Leading international contributors on biblical texts, including the New Testament and the Dead Sea Scrolls, intersect with the work of James H. Charlesworth and examine Charlesworth's vast contribution to the field of biblical studies, honoring the work of one of the most significant biblical scholars of his generation. Divided into five sections, this volume begins with a section on the Hebrew Bible and the New Testament texts, with particular focus on the Gospel of John and Jesus studies. The contexts of these texts are considered, with a focus on the Greco-Roman and Jewish worlds, and the varying intersections between texts and the worlds that created them. The contributors then focus on the most significant body of Charlesworth's work, the apocrypha/pseudepigrapha and the Dead Sea Scrolls, and the journey concludes with an assessment of the history of scholarship on the core areas addressed across the book.

**Water Using Conflicts in the Lower Jordan River Basin** Kathrin Stärk, 2007 Diploma Thesis from the year 2007 in the subject Geography / Earth Science - Physical Geography, Geomorphology, Environmental Studies, grade: 1,0, University of Passau, language: English, abstract: Die Arbeit beschäftigt sich mit der nachhaltigen Wasserversorgung des Trockenraums des Unteren Jordantals und ist in drei Hauptkapitel untergliedert. Im ersten Teil wird das Untere Jordantal im physischen sowie sozio-ökonomischen Kontext behandelt. Das zweite Kapitel konzentriert sich auf die Aspekte, die zur aktuellen Situation geführt haben. Dabei wird zunächst ein historischer Abriss über die Entwicklung der heutigen Landnutzung, insbesondere der Bewässerungswirtschaft, gegeben. Das Lower Jordan River Basin beheimatet ca. 80 % der jordanischen Bevölkerung und verbraucht entsprechend auch etwa 80 % der nationalen Wasserressourcen. Während die Bewässerungslandwirtschaft weniger als 5 % des BIP ausmacht, verbraucht sie doch nahezu 70 % des nationalen Wasserbedarfs. Einem sich erneuernden natürlichen Wasserdargebot von 780 MMC steht ein Verbrauch von 1,35 MMC entgegen. Dieses Ungleichgewicht wird sich aufgrund des Bevölkerungswachstums und des steigenden Wasserbedarfs in den kommenden Jahren weiterhin dramatisch verschlechtern. Im dritten Kapitel werden verschiedene Optionen für eine künftige Sicherstellung des Wasserbedarfs erörtert. Neben möglichen technischen Einsparungen im Agrarbereich werden auch die Möglichkeiten von Mehrfachwasserverwendung diskutiert, ohne die Jordanien in der Zukunft nicht auskommen wird. Allerdings wird auch kritisch hinterfragt, inwieweit die Einsicht für ein integriertes Wassermanagement mit der Realität korreliert. Erste Schritte hin zu einer nachhaltigen Wasserversorgung wurden bereits vollzogen, doch das angestrebte Ziel ist noch weit entfernt. Notwendige Schritte sind nicht nur im Bereich des Wassermanagements erforderlich, auch die Bewertung des Gutes Wasser und den damit verbundenen Kosten sowie eine langfristige Umorientierung der jordanischen

*The Archeology of the New Testament* Jack Finegan, 2014-07-14 The Archeology of the New Testament is the authoritative illustrated account of what is presently known about the chief sites and monuments connected with the life of

Jesus and the history of the early church. To follow the order of the New Testament, it first investigates sites connected with John the Baptist and then proceeds to Bethlehem and Nazareth, Samaria and Galilee, Jerash, Caesarea, Jericho, the Mount of Olives, Jerusalem, and Emmaus. Each site is illustrated, and the accompanying text, numbered to facilitate cross-reference, contains a bibliography. This edition has been completely revised to reflect the most recent scholarship and excavations, and it contains many new entries. Anyone concerned with the historical, geographical, and cultural background of the New Testament will want to study this classic work as it retraces the steps of Jesus. The definitive handbook. Finegan's comprehensive treatment of almost every problem in the field of New Testament archeology as well as his judicious evaluation of the evidence makes this book indispensable to every serious student of the Bible.--The New York Times Book Review Originally published in 1993. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.
