Connecting the Library to the Curriculum Lynette Torres,Fiona Salisbury,Barbara Yazbeck,Sharon Karasmanis,Janice Pinder,Caroline Ondracek,2022-01-20 This book shares the experiences of the Monash University and La Trobe University libraries in Melbourne, Australia, regarding the paths taken to transform and reposition these libraries within their institutions. The book showcases the respective frameworks used to enhance library skill development programs and addresses central topics such as partnerships, pedagogy, curriculum, emerging skill agendas and student success. It offers a theoretical and practical approach to overcoming persistent challenges and discusses several pertinent areas, e.g., establishing library-faculty partnerships, explicitly and coherently developing students' research skills with discipline-specific content and transforming perceptions of academic libraries' educative role. The book highlights the current issue of enhancing students' research skills, which is forcing many academic libraries to reassess their established practices and adopt pedagogical approaches that will more readily resonate with faculty. Chapters 3 and 19 are available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Evidence-based Health Policy Vivian Lin,Brendan Gibson,2003 Health policy is a highly contested arena where there have been increasing calls for policy to be more 'evidence based'. A central question remains 'is evidence-based health policy possible?' This book offers a critical perspective on the interplay between generation and policy formulation. The purpose of this book is to critique the notion that evidence-based medicine can make an unproblematic transformation into evidence approach to health policy that makes use of the best available research in an explicit, rigorous and accountable way. The book is illustrated by eleven case studies of health policy making that elucidate how evidence is used in particular policy making contexts. These case studies provide unique insights from the people who have been involved in the policy process. They reveal the complex nature of evidence-based research. The premise of the book is that although the idea of evidence-

based health policy holds considerable promise, it will not be realised without substantial evaluation of the problems, conceptual and practical, that beset it.

Health Policy in Australia Heather Gardner, Simon Barraclough, 2002 This text provides details of the Australian health system and of the main political influences and the theoretical and conceptual underpinning for decisions and trends in health and health care.

Early Intervention for Children with Disabilities Macquarie Univ., North Ryde (Australia). Special Education Centre, 1988 In the Australian context, early intervention is now accepted as part of the generic services provided for young people with disabilities and their families. This volume comprises a set of reports on services available in each State, descriptions of model programs and discussions of issues currently being addressed in this important field. Contributions to the book were invited from representative groups involved in the field of early intervention across Australia and these highlight the variety of ways in which different organisations and individuals have responded to meet the needs of these children.

Austral-Asian Who's who Jasbeer Singh, 1991 This second edition of a reference book first published in 1987 provides 1135 profiles of prominent Australians of Asian origin. Arrangement is by general professional categories. Also includes a listing of useful organisations which deal with the Asian community and an index of names.

Rethinking ADHD Ruth Schmidt Neven, Vicki Anderson, Tim Godber, 2002 A comprehensive and balanced approach to diagnosis and treatment is provided in this guide to ADHD. With the number of children diagnosed with ADHD increasing each year, the book suggests that doctors and parents too often rely on drugs without discussing long-term effects or treating contributing factors. This fresh analysis acknowledges that external factors such as the quality of long-term childcare facilities, the frenetic pace of modern life, social disadvantage, and emotional disruption caused by divorce and family dysfunction all contribute to children's ability to learn, concentrate, and self-regulate behavior. Case studies and practical recommendations for working in partnership with parents and children with behavioral and attention problems are included.

Beneficial for teachers, psychologists, therapists, childcare workers, counselors, social workers, and parents, this resource provides a deeper understanding of children with attention and behavior problems.

Complementary Therapies in Nursing and Midwifery Pauline McCabe,2001 The therapies described in this book include nutrition, aromatherapy, relaxation techniques, music therapy, pet therapy, therapeutic touch and massage. They can be used in nursing practice to induce relaxation, help create a healing environment, increase comfort, reduce pain and address troublesome symptoms, but they also have a role in empowering both nurses and patients to maintain their own health.-- Cover.
