Images of Women in Hispanic Culture Teresa Fernandez Ulloa,2016-08-17 This book studies the ways traditional polarized images of women have been used and challenged in the Hispanic world, especially during the 20th century and the beginning of the 21st century by writers and the media, but also in earlier time periods. The chapters analyze the image of women in specific political periods such as Francoism or the Kirchners' administration, stereotypes of women in films in Mexico and Chile, and the representation of women in textbooks, among other topics. Contributions also show how two women writers, in the 17th and the 19th centuries, viewed the role of women in their society.

Aportes de la biología del suelo a la agroecología Marina Sánchez de Prager,2018-06-06 La agroecología es la ciencia de encuentro de los sistemas biológicos y sociales en torno a la planificación, diseño y construcción de agroecosistemas sostenibles. Su práctica, ciencia y movimiento social trasciende las fincas y se inserta en la tierra viva desde diferentes perspectivas en lo local, territorial, regiones, países y globalmente. Ahora comprendemos que la vida surge sobre la cooperación y las sinergias antes que sobre la competencia. La evolución del suelo-tierra vivo ilustra ampliamente esta enseñanza. Le es inherente la biodiversidad, propia de la complejidad ecosistémica, imitada por los campesinos y agricultores al establecer agroecosistemas ecológicos. El suelo vivo es espacio de innovaciones metabólicas y de comportamientos que propician la homeóstasis agro y ecosistémica.
