Self-Directed Learning and the Academic Evolution From Pedagogy to Andragogy Hughes, Patrick, Yarbrough, Jillian, 2021-12-24 Self-directed learning is a concept that has been in circulation for centuries, though the topic experiences lulls and surges as contemporary theories identify advantages or improvements to better align the topic with contemporary learning environments. Self-directed learning is an instructional strategy where students accept a leadership role in their own learning practice and an increasingly significant learning technique for undergraduate students performing in a technologically and globally advanced college arena. Self-Directed Learning and the Academic Evolution From Pedagogy to Andragogy is an essential reference book that supports a student shift from passive pedagogical learning to active andragogical exploration and specifically shift from seeking mastery of basic skills to recognizing and reassessing the structure of personal assumptions, expectations, feelings, and actions. It fills the gap between theory-laden academic books designed to help academic faculty incorporate self-directed learning activities into their courses and the self-help books designed to help motivate individuals to learn new skills. This book is designed to specifically empower college students to accept a leadership role in their academic journey. Covering topics such as self-directed learning, lifelong learning, educational leadership, and competency-based education, this book is a foundational resource for teachers, instructional designers, administrators, curriculum developers, academicians, researchers, and students.

**Advancing Self-Directed Learning in Higher Education** Mncube, Dumsani Wilfred, Maphalala, Mncedisi Christian, 2023-05-01 Self-directed learning (SDL) is considered a core concept in problem-based learning (PBL) and student-centered learning. More importantly, the current face-to-face model of curriculum implementation faces many challenges that seem to question its dominance over other models. The violent nature of the COVID-19 pandemic has again vindicated SDL practitioners and research enthusiasts to continue seeking solutions that will enhance skills to cope in a rapidly changing technological, globalized world. However, the higher education sector is challenged when promoting SDL due to a slow pace of digital integration since the education system is not fully transformed. This has necessitated an urgent need for

global discourse on how universities globally are implementing SDL strategies to enhance the quality of curriculum delivery. *Advancing Self-Directed Learning in Higher Education* provides insight into various strategic approaches that could be adopted for the successful implementation of SDL in higher education. It is written for professionals who want to improve their understanding of how to improve student teaching and learning and the quality of curriculum implementation in higher education. In this realm, this book provides ideas to its readers about the approaches pertaining to strategy and innovative measures, practical implementations, and tools in the field of curriculum and SDL. Covering topics such as educational technology, intentional education practice theory, and student experience, this premier reference source is an essential resource for teachers, policymakers, lecturers, research scholars, students of higher education, administrators, librarians, academicians, and researchers.

*European Views of Self-directed Learning* Gerald A. Straka, 1997 Following an Introduction by editor Gerald A. Straka that posits various definitions of self-directed learning and discusses the views of the various authors in the text, this book consists of nine papers addressing issues and conceptions of self-directed learning in Europe. The following are included: Self-Directed Learning in Continuing Education--A Report from Switzerland (Christoph Metzger); Self (-Directed) Learning in France (Philippe Carre); Self-Learning Activities in the French Community of Belgium (Brigitte Denis); Self-Directed Learning in the Netherlands (Marcel R. van der Klink, Wim J. Nijhof); Self-Directed Learning among Adults in the United Kingdom (Keith Percy); Self-Directed Learning in Portugal (Maria Joao Malheiro Filgueiras); Learning, Working and Social Practices: History and Future Trends in Italy (Cristina Zuccheromaglio); Self-Directed Learning in Greece (Nicholas Iliadis); and Self-Directed Learning in Germany: From Instruction to Learning in the Process of Work (Gerald A. Straka). (Each paper contains references.) (KC)

**Theoretical and Historical Evolutions of Self-Directed Learning** Caleb Collier, 2023-04-14 This book analyzes the deep historical and theoretical roots of self-directed learning models in order to put forward a new conceptual understanding of self-directed learning. It utilizes philosophical methods to present arguments, both historical and contemporary, in favor of shifting education toward self-directed models and away from a view of education that places teachers, administration, curriculum, and standards at the center of the learning endeavor. This book demonstrates that self-directed learning has proven to be effective in numerous contexts and builds on this history to present a new philosophy of education termed Eudemonic Self-Directed Learning, for individual and societal flourishing. Exploring exemplars from different cultural and historical settings to inform post-pandemic pedagogies and policies, this book will appeal to scholars and researchers of the history and philosophy of education, with interests in self-directed learning and its potential for contemporary practice.

**The Learner-Directed Classroom** Diane B. Jaquith, Nan E. Hathaway, 2012-08-24 Educators at all levels want their students to develop habits of self-directed learning and critical problem-solving skills that encourage ownership and growth.

In The Learner-Directed Classroom, practicing art educators (PreK-16) offer both a comprehensive framework for understanding student-directed learning and concrete pedagogical strategies to implement student-direct learning activities in school. In addition, research-based assessment strategies provide educators with evidence of student mastery and achievement. Teachers who structure self-directed learning activities can facilitate effective differentiation as students engage in the curriculum at their level. This book provides evidence-based, practical examples of how to transform the classroom into a creative and highly focused learning environment.
