The ^AMaking of European Music in the Long Eighteenth Century D. R. M. Irving,2024-09-03 In this book, author D. R. M. Irving traces the emergence of such large-scale categories as European music and Western music, showing how they originate from self-fashioning in contexts of intercultural comparison outside the European continent rather than the resolution of national aesthetic differences within it. Taken as a whole, this study demonstrates how reductive labels for the musics of a continent or a hemisphere often imply homogeneity and essentialism, and how a renewed critique of primary sources can help dismantle historiographical constructs that arose within narratives of musical pasts involving Europe.

Musical Theory in the Renaissance CristleCollins Judd,2017-07-05 This volume of essays draws together recent work on historical music theory of the Renaissance. The collection spans the major themes addressed by Renaissance writers on music and highlights the differing approaches to this body of work by modern scholars, including: historical and theoretical perspectives; consideration of the broader cultural context for writing about music in the Renaissance; and the dissemination of such work. Selected from a variety of sources ranging from journals, monographs and specialist edited volumes, to critical editions, translations and facsimiles, these previously published articles reflect a broad chronological and geographical span, and consider Renaissance sources that range from the overtly pedagogical to the highly speculative. Taken together, this collection enables consideration of key essays side by side aided by the editor's introductory essay which highlights ongoing debates and offers a general framework for interpreting past and future directions in the study of historical music theory from the Renaissance.

Palgrave Concise Historical Atlas of Central Asia R. Abazov,2016-04-30 This atlas graphically illuminates the region's history tracing back to the 8th-7th century B.C. From the spread of Islam to the invasion of the Mongols, the area has been at the crossroads of some of the world's most important developments, all succinctly explained in this book.

The Making of Modern South-East Asia: The European conquest D. J. M. Tate,1971 Volume two of The Making of Modern South-East Asia, this text focuses on economic and social change.

A History of Russia, Central Asia and Mongolia, Volume II David Christian,2018-01-08 Provides an all-encompassing look at the history of Russia, Central Asia, and Mongolia Beginning with the breakup of the Mongol Empire in the mid-thirteenth century, Volume II of this comprehensive work covers the remarkable history of "Inner Eurasia," from 1260 up to modern

times, completing the story begun in Volume I. Volume II describes how agriculture spread through Inner Eurasia, providing the foundations for new agricultural states, including the Russian Empire. It focuses on the idea of “mobilization”—the distinctive ways in which elite groups mobilized resources from their populations, and how those methods were shaped by the region’s distinctive ecology, which differed greatly from that of “Outer Eurasia,” the southern half of Eurasia and the part of Eurasia most studied by historians. This work also examines how fossil fuels created a bonanza of energy that helped shape the history of the Communist world during much of the twentieth century. Filled with figures, maps, and tables to help give readers a fuller understanding of what has transpired over 750 years in this distinctive world region, *A History of Russia, Central Asia and Mongolia: Volume II: Inner Eurasia from the Mongol Empire to Today, 1260-2000* is a magisterial but accessible account of this area’s past, that will offer readers new insights into the history of an often misunderstood part of the world. Situates the histories of Russia, Central Asia, and Mongolia within the larger narrative of world history Concentrates on the idea of Inner Eurasia as a coherent ecological and geographical zone Focuses on the powerful ways in which the region’s geography shaped its history Places great emphasis on how “mobilization” played a major part in the development of the regions Offers a distinctive interpretation of modernity that highlights the importance of fossil fuels Offers new ways of understanding the Soviet era *A History of Russia, Central Asia and Mongolia: Volume II* is an ideal book for general audiences and for use in undergraduate and graduate courses in world history. The Blackwell History of the World Series The goal of this ambitious series is to provide an accessible source of knowledge about the entire human past, for every curious person in every part of the world. It will comprise some two dozen volumes, of which some provide synoptic views of the history of particular regions while others consider the world as a whole during a particular period of time. The volumes are narrative in form, giving balanced attention to social and cultural history (in the broadest sense) as well as to institutional development and political change. Each provides a systematic account of a very large subject, but they are also both imaginative and interpretative. The Series is intended to be accessible to the widest possible readership, and the accessibility of its volumes is matched by the style of presentation and production.

Reshaping the Boundaries Song Gang, 2016-11-01 *Reshaping the Boundaries: The Christian Intersection of China and the West in the Modern Era* brings new material and new insight to deepen our understanding of the multilayered, two-way flow of words, beliefs, and experiences between the West and China from 1600 to 1900. The seven essays taken together illustrate the complex reality of boundary-crossing interactions between these cultures and document how hybrid ideas, images, and identities emerged in both China and the West. By focusing on “in-betweenness,” these essays challenge the existing Eurocentric assumption of a simple one-way cultural flow, with Western missionaries transmitting and the Chinese receiving. Led by Song Gang, the contributors to this volume cover many specific aspects of this cultural encounter that have received little or no scholarly attention: official decrees, memoirs, personal correspondences, news, rumors, musical instruments, and

miracle stories. Grounded in multiple intellectual disciplines, including religious studies, history, arts, music, and Sinology, *Reshaping the Boundaries* explores how each of the major Christian traditions—Catholic, Protestant, and Eastern Orthodox—bridged the West and the East in unique ways. “These fascinating essays offer new insightful perspectives on the artistic and cultural relations between China and Europe. Each contribution convincingly illustrates the distinctive feature of ‘in-betweenness’ in the specific two-way ‘boundary-crossing’ exchange of knowledge. This remarkable, richly documented collection fundamentally challenges traditional interpretations of the Sino-Western cultural encounter.” —R. G. Tiedemann, School of History and Culture, Shandong University, China “*Reshaping the Boundaries* brings together new and helpful research on the interactions in religion, printing, art, literature, and music. It interweaves both Chinese and Western perspectives to capture the productive nature of these cross-cultural exchanges during the late imperial era. This exciting volume successfully illustrates how the process of boundary-crossing included mutual influence and, consequently, reciprocal reshaping.” —Christopher A. Daily, SOAS, University of London; author of *Robert Morrison and the Protestant Plan for China*
