Educación ambiental de maestros para maestros José Manuel Pérez Martín, 2022-11-24 Para trabajar las problemáticas de sus propuestas, se requiere fomentar la reflexión y el pensamiento crítico de los estudiantes; con el fin de que tomen conciencia de los factores involucrados (sociales, económicos, culturales, éticos, biológicos, etc.), y de promover la toma de acción en la medida de las posibilidades de cada uno. En resumen, las propuestas contienen actividades de presentación de contenidos (alfabetización), que, con la reflexión adecuada, conducen a la sensibilización. Además, en todos los casos, hay un interés por dedicar tiempo a la propuesta de soluciones, paso previo y necesario para poder tomar acciones que cambien la situación.

Science Teaching and a New Teacher Culture Mario Roberto Quintanilla Gatica, Agustín Adúriz-Bravo, 2024-03-29 This edited volume discusses various epistemological positions about science teaching and the complex processes of understanding and learning in the classroom. Including discussions around Natural Sciences teacher training models, as well

as the development of logics of reflection on practice based on critical and dialogic interpretative visions guiding higher level competency learning. It brings together contributions from researchers promoting a coherent and robust methodological analysis, theoretically based on the systematization of evidence in different contexts within Europe and Latin America. While supporting innovation in teacher training and science teaching, it offers specific contributions and suggestions for classroom work in the subjects of Physics, Chemistry and Biology. It includes didactic guidelines for experimental practices, for the evaluation of scientific learning, as well as for the use of epistemology and the history of science in teaching. In addition, it's considered an important contribution to the challenge of rebuilding science education programs as well as its correct implementation in schools and universities. This book is a translation of an original Spanish publication. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation.

Hacia el fomento de las TIC en el sector educativo en Colombia Elías Said Hung, 2015 El actual contexto tecnológico y la apertura de nuevos escenarios digitales de comunicación y acceso al conocimiento ha generado cambios sustanciales en el sector educativo a nivel global. Los maestros y las instituciones educativas no pueden limitarse solo a proporcionar las clásicas estrategias de seguimiento y apoyo al aprendizaje del alumno; por el contrario, deben basarse en el fomento y promoción de mecanismos más sistemáticos y continuados al momento de llevar a cabo dicha labor, con el fin de promover mayor autonomía en los procesos de enseñanza-aprendizaje que lideran.

Ecología integral Ramírez González, Alberto, 2023-07-02 La ecología surgió como ciencia a finales del siglo XIX al escindirse de la biología y definir un objeto de estudio específico relativo a la relación de los seres vivos con su entorno. Debido a la degradación del medio físico y a la destrucción de los ecosistemas naturales por acción de la especie humana durante el siglo XX, en las últimas décadas el estudio de la ecología ha tenido lugar bajo otras ciencias y disciplinas relativas a los subsistemas físicos, bióticos y sociales. Esto ha demandado de la disciplina una mirada inter- y transdisciplinar, necesaria para analizar de forma coligada la complejidad de la biósfera, dando así origen a la ecología integral. Este libro aborda el papel que desempeñan las distintas disciplinas en esta ciencia naciente, a la vez que expone los problemas ambientales más delicados que debe afrontar la humanidad durante el siglo XXI, como garantizar la seguridad energética y alimentaria, que resultan insostenibles a causa del crecimiento poblacional y el cambio climático ocasionado por el ser humano. Así mismo, desde la teoría de sistemas, el libro expone una visión e integración holística de los subsistemas referidos y da cuenta de procesos metodológicos cualitativos y cuantitativos, tanto desde un punto de vista teórico como

aplicado, para emprender esta nueva ciencia. Precisamente, el último capítulo del libro se ocupa de Colombia como estudio de caso, con el fin de ilustrar cómo se puede abordar desde la ecología integral su situación socioecológica en los últimos cincuenta años.
