*Psychology and Law* Andreas Kapardis, 2009-12-21 Fully revised and expanded, this third edition of *Psychology and Law: A Critical Introduction* is a discussion of contemporary debates at the interface between psychology and criminal law. Features new sections on restorative justice, police prejudice and discrimination, terrorism and profiling offenders. Other topics include critiques of eyewitness testimony, the role of the jury, sentencing as a human process, the psychologist as expert witness, persuasion in the courtroom, detecting deception, and psychology and the police. Each chapter is supported by case studies and further reading. Andreas Kapardis draws on sources from Europe, North America and Australia to provide an expert investigation of the subjectivity and human fallibility inherent in our systems of justice. He suggests ways for minimising undesirable influences on crucial judicial decision-making. International and broad-ranging, this book is the authoritative work on psycho-legal enquiry for students and professionals in psychology, law, criminology, social work and law enforcement.

**Criminal Profiling** Brent E. Turvey, 2011-03-09 Focused on Behavioral Evidence Analysis (BEA), a method of criminal profiling developed and refined by the author over the past 15 years, the fourth edition of *Criminal Profiling* maintains the same core foundation that made previous editions best sellers in the professional and academic community worldwide. Written from practicing behavioral analysts and aspiring students alike, this work emphasizes an honest understanding of crime and criminals. Newly updated, mechanisms for the examination and classification of both victim and offender behavior have been improved. In addition to refined approaches towards victimology, crime scene analysis, motivation and case linkage, a chapter on sexual deviance has been added as well. With prior edition in wide use as a primary text in criminal justice, law, criminology, and behavioral science programs around the world, *Criminal Profiling, Fourth Edition* remains essential for students and professionals alike. - Outlines the scientific principles and practice standards of BEA-oriented criminal profiling, with an emphasis on applying theory to real cases - Contributing authors from law enforcement, academic, mental health and forensic science communities provide a balance perspective - Complete glossary of key terms Companion Web site includes all appendices from previous volumes and figure collection at <http://www.elsevierdirect.com/companions/9780123852434> - Manual Web site provides an instructor's manual for each chapter, powerpoint slideshows, and case reports from Brent Turvey's work

**Profiling Violent Crimes** Ronald M. Holmes, Stephen T. Holmes, 2008-12-01 As in previous editions, this book is appropriate for criminal investigation, forensic psychology, criminal behavior and interpersonal violence courses, generally as a supplement to a core text or as one of several paperbacks. The authors continuing research and involvement in field investigation are a source of relevant and often high profile case studies to illustrate theory and application of methods shown. Chapters include Arson, Pedophilia and Psychological Profiling and Rape. This edition features a new chapter on Lizzie Borden, analyzing this historic murder case with fresh insight and a unique analysis. The text is particularly readable and engaging, making frequent use of illustrative tables, figures and occasional photos.
