Stephen Bell,Andrew Hindmoor

Masters of the Universe, Slaves of the Market Stephen Bell,Andrew Hindmoor,2015-03-09 Stephen Bell and Andrew Hindmoor compare banking systems in the U.S. and UK to those of Canada and Australia and explain why the system imploded in the former but not the latter. Canadian and Australian banks were able to make profits through traditional lending practices, unlike their competition-driven, risk-taking U.S. and UK counterparts.

Mergers and Acquisitions Kevin K. Boeh,Paul W. Beamish,2007 Mergers and Acquisitions: Text and Cases provides guiding frameworks and information on Mergers and Acquisitions (M&A), complemented by a set of well-matched cases. The purpose is not to rehash the existing set of M&A books, but to provide real-world examples of situations that allow the reader to utilize the core concepts and processes in M&A. The authors present a process-based framework of M&A, within which the reader is given in-depth information about the steps in doing deals. The reader then has the ability to apply these concepts and frameworks to the full-length cases. The book can be used as a stand-alone text because it provides good coverage of the entire M&A process. In order to more specifically focus on any particular aspect of M&A, the text can easily be supplemented with focused materials.

Greening the Bond Market David Ramos Muñoz,Agnieszka Smoleńska,2023-10-19 Green bond issuance has surged in recent years in response to growing investor appetite and borrowers' needs as they embark on the sustainability transition.

The EU leads the way, with over 40% of all sustainable bond issuances denominated in euro. The EU's 'Regulation on European Green Bonds and optional disclosures for bonds marketed as environmentally sustainable and sustainability-linked bonds' is the first comprehensive legislative text covering such issuance, and a cornerstone of EU's Sustainable Finance strategy. This book explores in an interdisciplinary way the challenges and opportunities of green bonds and sustainable finance from a legal, regulatory and economic perspectives. First, it analyses green bonds as a new financial instrument in the context of the existing capital markets law. Second, it studies green bond impact on the market and on investor protection. Third, it assesses green bonds' relevance for prudential supervision and central banking. The variety of viewpoints ensures a highly comprehensive analysis of green bonds' impact in a European and global context.

The Nature of Inquisitorial Processes in Administrative Regimes Laverne Jacobs, Sasha Baglay, 2016-03-03 'Inquisitorial processes' refers to the inquiry powers of administrative governance and this book examines the use of these powers in administrative law across seven jurisdictions. The book brings together recent developments in mixed inquisitorial-adversarial administrative decision-making on a hitherto neglected area of comparative administrative process and institutional design. Reaching important conclusions about their own jurisdictions and raising questions which may be explored in others, the book's chapters are comparative. They explore the terminology and scope of the concept of inquisitorial process, justifications for the use of inquiry powers, the effectiveness of inquisitorial processes and the implications of the adoption of such powers. The book will set in motion continued dialogue about the inherent challenges of balancing policy goals, fairness, resources and institutional design within administrative law decision-making by offering theoretical, practical and empirical analyses. This will be a valuable book to government policy-makers, administrative law decision-makers, lawyers and academics.

The 2006 Federal Budget Charles M. Beach, Thomas A. Wilson, Michael Smart, 2007 The 2006 federal budget was the first for a new Conservative minority government led by a prime minister from the west. As a platform for implementing distinctive election promises, the 2006 budget offered ample opportunity for rethinking fiscal priorities in Canada, such as cutting the GST, addressing fiscal imbalance with the provinces, and finding a different approach to childcare and child benefits. The papers in this volume examine the political and economic context informing the 2006 budget as well as lessons

from recent U.S. tax policy debates and a quantitative evaluation of the impact of the overall budget package on the Canadian economy. Special attention is devoted to alternative federal tax structures, fiscal imbalance, and the recent federal Blue Ribbon report. Contributors also look at the new federal policy on childcare and child benefits, how the budget relates to productivity and competitiveness, and general sustainability of the new fiscal plan.
