Tech Wars Daniel M. Gerstein, 2022-09-13 This book explores the evolution of the current U.S. research and development enterprise, asks whether this organization remains appropriate to the challenges we face today, and proposes strategies for better preparing for the global technology race shaping our future. Across the globe, nation states and societies, as well as corporations, technology developers, and even individuals, find themselves on the front lines of a global technology race. In the third decade of this century, the outlines of the contest have become clear. R&D spending, new methods such as innovation centers, and powerful technologies in governments and society are rapidly proliferating. Technology winners and losers are emerging. How did we arrive at this global technology fight? How and where will it be waged? What can we do to prepare for the future? Tech Wars examines the conditions that have led us to this point and introduces new strategies, organizational changes, and resource allocations that will help the United States respond to the challenges on the horizon.

The ^AOxford Handbook of Space Security P.J. Blount, 2023-09-01 The Oxford Handbook of Space Security focuses on the interaction between space technology and international and national security processes. Saadia M. Pekkanen and P.J. Blount have gathered a group of key scholars who bring a range of analytical and theoretical perspectives to take an analytically-eclectic approach to assessing space security from an international relations (IR) theory perspective. Bringing together scholarship from a group of leading experts, this volume explains how these contemporary changes will affect future security in, from, and through space.

Securing U.S. Innovation Darren E. Tromblay, Robert G. Spelbrink, 2016-09-08 As experienced by the United States, competition has played out in three distinct types of threat activity: sabotage (the destruction of capabilities), espionage (the theft of specific capabilities), and defection (the carrying of knowledge out of the country). Today, the changing innovation environment has created new challenges. Significant advances are being made in start-ups as well as larger companies who no longer rely on U.S. government contracts. Not only does this place a key element of national power in the hands of the private sector, but it often leaves Washington at an informational disadvantage in understanding technologies. This book analyzes these concepts from the perspective of the United States' experience in the field of innovation security. Historical and recent examples illustrate the threats to innovation, the various approaches to mitigating them, and how the evolution of

the innovative process now requires rethinking how the United States can benefit from and preserve its cutting edge human capital.

Beyond Ukraine Tim Sweijs, Jeffrey H. Michaels, 2024-05-01 Russia's large-scale invasion of Ukraine has sparked a major shift in thinking about the future of war. This book offers a comprehensive examination of its impact on visions of conflict.

2023 Culture & Conduct Risk in the Banking Sector Stephen Scott, 2023-06-07 The Compendium is a publication of Starling Insights, a membership-based platform that is a resource for and by the community of leaders, experts, and practitioners working to bring new ideas and tools to the governance and supervision of cultural, behavioral, and other nonfinancial risks and performance outcomes. Readers will find discussion throughout this report, in articles by and interviews with dozens of contributors, among them: regulators, supervisors, central bankers and policymakers; standard setting bodies and industry associations; industry executives and peers from other sectors; prominent legal thinkers and practicing attorneys; as well as renowned scholars from various disciplines. We are humbled by their continued collective generosity and hope that our 2023 Compendium is found to be as valuable to readers as its predecessors.

The Intelligence Community Tyrus G. Fain, Tyrus Gerard Fain, Katharine C. Plant, Ross Milloy, 1977

Discovery and Innovation Donna Fossum, 2000 This report, based largely on the RaDiUS database developed by RAND, allows policymakers and the public for the first time to break down the complex federal R&D portfolio into its component state and local elements. It details the full range of federal R&D activities in terms of the individual laboratories, centers, universities, and companies performing the research, doing the studies, and conducting the analyses. It reveals that virtually every community in the nation has a direct stake in the federal R&D enterprise.--BOOK JACKET.

Fostering Innovation in the Intelligence Community Craig W. Gruber, Benjamin Trachik, 2023-09-12 In response to the increasingly ubiquitous, asynchronous, and pervasive use of cyber technology in everyday life, unique threats to cybersecurity (CS) have emerged requiring innovative and systemic solutions. Of the potential threats, Ubiquitous Technical Surveillance (UTS) presents one of the most acute generalized vulnerabilities facing the broader Intelligence Community (IC), Department of Defense (DoD), and United States Government. While security systems and networks have attempted to adapt to meet these evolving threats, internal organizational structures, culture, and human behavior often lag behind due to the inherent challenges in changing these dynamic variables. It is crucial that scientific disciplines identify systemic and innovative behavioral countermeasures that are informed by sub-disciplines of the psychology and CS literature. Innovative strategies involve collaboration amongst experts from the domains of social psychology, game theory, Bayesian statistics, and the IC, which will be discussed in-depth. A special issue that pulls from cross-disciplinary professionals will have a broad impact for the IC and DOD eliciting wide readership and spurring needed innovation. _____ Cultivating a culture of innovation, though

difficult, is important for any enduring organization. It's downright essential for the US Intelligence Community, which must stay one step ahead of adversaries on surveillance technologies and tradecraft to be effective. This collection of articles brings together insightful research and analysis from diverse domains, moving us closer to the deeper appreciation of innovation and culture that is so urgently needed.
