Ethics and Medical Technology Matthew C. Altman,David Schwan,2025-08-24 This book provides a comprehensive survey of ethical issues raised by advanced medical technologies. The field's leading authorities explore how artificial intelligence, telehealth, robot caregivers, genetic therapies and enhancement, stem cell research, neurotechnology,

electronic health records, data collection, and digital nudging are reshaping the landscape of medical practice. Organized around core ethical themes, the chapters consider how new and emerging technologies transform personal identity, the provider-patient relationship, privacy and autonomy, and social equity. Contributors clarify the complex values involved in medical innovation and practice, and explore what is at stake in the current ethical debates around these issues. While offering a valuable introduction for advanced students, professional philosophers, medical ethicists, and policymakers, this book also advances the scholarly discussion by presenting original theses and arguments, making it essential reading for specialists.

Internet Children's Television Series, 1997-2015 Vincent Terrace, 2016-08-22 Created around the world and available only on the web, internet television series are independently produced, mostly low budget shows that often feature talented but unknown performers. Typically financed through crowd-funding, they are filmed with borrowed equipment and volunteer casts and crews, and viewers find them through word of mouth or by chance. The fifth in a series focusing on the largely undocumented world of internet TV, this book covers 573 children's series created for viewers 3 to 14. The genre includes a broad range of cartoons, CGI, live-action comedies and puppetry. Alphabetical entries provide websites, dates, casts, credits, episode lists and storylines.
