

Omi And Winant 1994

Sabine Zange

Racial Formation in the United States Michael Omi, Howard Winant, 1994 Discusses racial formation theory, the idea that race is a constructed identity dependent upon social, economic, and political factors.

New Faces in a Changing America Loretta I. Winters, Herman L. DeBose, 2003 *New Faces in a Changing America* is a comprehensive, penetrating, authoritative, and provocative examination of what it means to be multiracial in this country. With contributions by the leading thinkers, activists, and researchers on the subject, it admirably links theory and the powerful lived experiences of mixed-race people. This book will be the most important reference source on the subject for many years. -- James P. Allen, California State University, Northridge Not since the work of Root has there been as important of an anthology as *New Faces in a Changing America*. This book explores the reality of multiracial people from a variety of theoretical and conceptual perspectives. It is a must read for anybody who want to understand the multiracial movement and the multiracial people who lead that movement. Any teacher who wants to introduce the concept of multiraciality to his/her class must also have this book. Winters and DeBose are to be commended for putting together this first-rate academic examination of an important social phenomenon. -- George Yancey, University of North Texas How multiracial people identify themselves can have major consequences on their positions in their families, communities and society. Even the U.S. Census has recognized the rapidly increasing numbers of those who consider themselves multiracial, adding a new racial category to the 2000 Census form: two or more races. *New Faces in a Changing America: Multiracial Identity in the 21st Century* examines the multiracial experience, its history and the political issues and consequences surrounding biracial and multiracial identity, bringing together top names in the field to give readers cutting edge views and insights gained from contemporary research. This important new text follows the trail blazed by Maria Root, who contributes its opening chapter. An introduction places the issues of multiracial identity into context via a discussion of U.S. Census data and debates, providing an overview of the varied readings to come covering such topics as: Race as a social, rather than biological, construction The Multiracial Movement Racial/Ethnic Groups in America and Beyond Race, Gender & Hierarchy Gang Affiliation and Self-Esteem Black/White Interracial Couples and the Beliefs that Help Them to Bridge the Racial Divide The book concludes with *The Multiracial Movement: Harmony and Discord*, by co-editor Loretta Winters, an epilogue putting the readings into perspective according to three models in the multiracial identity literature: the Multiracial Movement model,

the Counter Multiracial movements model and the Ethnic Movement model. Timely and comprehensive in its range of topics, this is an important resource for many audiences: students in Ethnic Studies, Race Relations and related courses; human service professionals including psychologists, counselors, social workers and school personnel and, importantly, multiracial individuals themselves.

The Handbook of Political Sociology Thomas Janoski, Robert R. Alford, Alexander M. Hicks, Mildred A. Schwartz, 2005-05-23 This Handbook provides a complete survey of the vibrant field of political sociology. Part I explores the theories of political sociology. Part II focuses on the formation, transitions, and regime structure of the state. Part III takes up various aspects of the state that respond to pressures from civil society.

Racial Formation in the New Millennium Michael Omi, Howard Winant, 2008 First published in 1986, and then again in 1994, Omi and Winant's *Racial Formation in the United States* is considered a classic text on race and ethnicity. *Racial Formation in the New Millennium* builds upon the ideas set forth in Omi and Winant's classic text-providing a sophisticated and up-to-date overview of race and ethnicity in the United States. In this volume, they include current issues and controversies related to racism, race/ class / gender interrelationships, modern life, and racial politics.

Hopeful Girls, Troubled Boys Nancy Lopez, 2020-07-24 This book is an ethnographic study of Caribbean youth in New York City to help explain how and why schools and cities are failing boys of color.

Critical Race Theory in Education Adrienne D. Dixon, Celia K. Rousseau Anderson, Jamel K. Donnor, 2016-08-25 Appropriate for both students curious about Critical Race Theory (CRT) and established scholars, *Critical Race Theory in Education* is a valuable guide to how this theoretical lens can help better understand and seek solutions to educational inequity. While CRT has been established as a vital theoretical framework for understanding the ways race-neutral policies and laws sustain and promote racial inequity, questions around how to engage and use CRT remain. This second edition of *Critical Race Theory in Education* evaluates the role of CRT in the field of higher education, answering important questions about how we should understand and account for racial disparities in our school systems. Parts I and II trace the roots of CRT from the legal scholarship in which it originated to the educational discourse in which it now resides. A much-anticipated Part III examines contemporary issues in racial discourse and offers all-important practical methods for adopting CRT in the classroom.

Understanding Racism Hephzibah Strmic-Pawl, 2020-08-25 This text examines the theories and theorists that have contributed the most to our contemporary understanding of racism in its various forms. Each of the 13 chapters in *Theories of Racism* describes the emergence of a particular theory and the problem it addresses; discusses the scholars who are most closely associated with the theory; and explores the strengths and limitations of the theory. The book's systematic organization and pedagogical features will help students think theoretically about race and racism at different levels of

analysis, and learn how to compare and contrast the theories--

Race and Racialization Tania Das Gupta, 2007 This provocative volume will influence the way people think of race and racialization. It provides a thorough examination of these complex and intriguing subjects with historical, comparative, and international contributions. Edited as a theoretically strong, cohesive whole, this book unites a remarkable ensemble of academic thinkers and writers from a diversity of backgrounds. Themes of ethnocentrism, cultural genocide, conquest and colonization, disease and pandemics, slavery, and the social construction of racism run throughout.

Dismantling White Privilege Nelson M. Rodriguez, Leila E. Villaverde, 2000 *Dismantling White Privilege* critically interrogates whiteness across contexts, from the experiential level to the different ways in which whiteness is deployed in contemporary cultural politics. The editors and contributors contend that marking whiteness is an important step in dismantling white privilege within the context of concerns for equity and social justice. Significant to this anthology is linking analyses of whiteness to the discourse of critical pedagogy, especially around constructing pedagogies of whiteness. Investigating whiteness in its many manifestations, *Dismantling White Privilege* represents a necessary advance concerning the intersection among race, culture, and pedagogy.--Page 4 of cover.

Handbook of Child Psychology, Theoretical Models of Human Development William Damon, Richard M. Lerner, 2006-03-31 Part of the authoritative four-volume reference that spans the entire field of child development and has set the standard against which all other scholarly references are compared. Updated and revised to reflect the new developments in the field, the *Handbook of Child Psychology, Sixth Edition* contains new chapters on such topics as spirituality, social understanding, and non-verbal communication. Volume 1: *Theoretical Models of Human Development*, edited by Richard M. Lerner, Tufts University, explores a variety of theoretical approaches, including life-span/life-course theories, socio-culture theories, structural theories, object-relations theories, and diversity and development theories. New chapters cover phenomenology and ecological systems theory, positive youth development, and religious and spiritual development.

Native American DNA Kimberly TallBear, 2005 *Native American DNA* intrigues scientists and non-scientists alike from the high-tech anthropology lab, to the genetic genealogist's treasured personal archive, to the glossy world of corporate or made-for-television science. But what is Native American DNA? In technical language, it is a set of genetic markers (nucleotides) that appear at different frequencies among different populations: the highest frequencies of so-called Native American markers have been observed by scientists in unadmixed native populations in North and South America. But Native American DNA should not be understood simply as an objective molecular thing. It is simultaneously a conceptual apparatus through

which humans constitute and deploy life-organizing narratives: historical and national narratives, narratives about race and ethnicity, family and tribe. Sometimes genetic narratives border on the religious, exploring the origins of peoples or explaining who individuals really are. I provide a condensed history of the science of race, tracing a genealogy of Native American DNA as a research object and a tool for categorizing both molecules and human beings. I then turn ethnographer to study an on-line community of genetic genealogists who use DNA to help trace family histories. From there, I cross into a strange hybrid world where science meets corporate marketing. I mine rich language and imagery--narratives of origins, race, and tribe--woven into the World Wide Web by several DNA testing companies and by the Genographic Project. Mostly, I do not study Native American or tribal perspectives on DNA. I study those who are under-studied, yet culturally influential: scientists and financially-able lovers of science, who incorporate knowledge of particular molecular sequences into their understandings of Native American. Crucially, such extra-tribal understandings do not require any reference to the historical-regulatory paradigm of US tribal governance. While I do not study tribes, I address them. Native American DNA testing embeds non-tribal philosophical assumptions that may undermine tribal governance and identities. I close with suggestions for how indigenous methodologies offer a way to challenge genetics as the ultimate way of knowing about race, tribe, kinship, and individual identity.

Mixed Messages David L. Brunsma, 2006 The experiences and voices of multiracial individuals are challenging current categories of race, profoundly altering the meaning of racial identity and in the process changing the cultural fabric of the nation. Exploring this new reality, the authors of *Mixed Messages* examine what we know about multiracial identities - and the implications of those identities for fundamental issues of justice and equality.

Race, Ethnicity, and Inequality in the U.S. Labor Market George Wilson, 2007-03-26 What patterns of racial and ethnic stratification are emerging in the American labor market as representation of racial and ethnic minorities continues to increase in the new millennium? The articles in this special volume of *The Annals* demonstrate that in the 21st century the labor market is neither race-neutral nor color blind. Race and ethnicity continue as salient factors in determining life-chance opportunities in the American labor market. The volume focuses on the range of issues sociologists are addressing as they explore racial and ethnic inequality in the labor market. It also examines the methodological strategies used to analyze the subtle dynamics associated with inequality in the labor market. Taken together, these articles move us ahead in understanding the incidence, causes, and consequences of persisting inequities.

Rewriting North American Borders in Chicano and Chicana Narrative Monika Kaup, 2001 Kaup (English, U. of Washington, Seattle) offers a study of the manifestations and transformations of the important theme of the border between the US and Mexico in Chicano narrative since 1960. Three topics are discussed in detail: the history of native origins in the borderlands, the (im)migration experience, and the Chicana experience. Theory is presented, along with detailed readings of many major and some minor Chicana and Chicano writers, including Gloria Anzaldua, Norma Cantu, Ana Castillo, Sandra Cisneros, Rolando Hinojosa, Ruben Martinez, and others.
