Learning Disorders Peter Westwood,2017-07-14 What are learning disorders? How can schools endeavour to address these disorders in today's inclusive classrooms? This book answers these important questions in practical terms and discusses in detail the instructional needs of students with dyslexia, dysgraphia, dyscalculia, dyspraxia and other significant disorders that affect learning. Peter Westwood draws on international research literature to provide supporting evidence of best practices. The book is unique in linking the teaching methods recommended for overcoming learning problems directly to each of the three tiers of support in the Response-to-Intervention Model. It presents examples of effective whole-class teaching, intensive small group instruction and individual tutoring, as well as addressing key topics such as: educational progress of students with learning disorders; principles for teaching dyslexic students; difficulties with writing and spelling; developing students' numeracy skills; specific intervention strategies; nonverbal learning disabilities. Learning Disorders will be of interest to practising teachers, trainee teachers, teaching assistants, educational psychologists, school counsellors and

parents. It will also provide valuable insights for any school planning to upgrade its support system for students with special educational needs.

Exploring Psychology in Modules with DSM5 Updates David G. Myers, 2014-02-12 This modules-based version of Myers' *Exploring Psychology* breaks down the book's 15 chapters into 43 short modules. Myers was inspired to create this text by the memory research in "chunking" (showing that shorter reading assignments are more effectively absorbed than longer ones), as well as by numerous students and instructors who expressed a strong preference for textbooks with more, shorter chapters. Each self-standing module can be read in a single sitting, and instructors can assign any combination of modules, in any order they want. DSM 5 Updates Available for Fall 2014 classes, this update version features new content from David Myers in response to the release of the DSM-5. This new content is integrated into the text without changing pagination or the structure of the chapters. A special DSM 5 Supplement by the David Myers is available for Fall 2013 and Spring and Summer 2014 courses.
