George Gordon Byron Baron Byron

Quantitative Intertextuality Christopher W. Forstall, Walter J. Scheirer, 2019-07-10 This book introduces quantitative intertextuality, a new approach to the algorithmic study of information reuse in text, sound and images. Employing a variety of tools from machine learning, natural language processing, and computer vision, readers will learn to trace patterns of reuse across diverse sources for scholarly work and practical applications. The respective chapters share highly novel methodological insights in order to guide the reader through the basics of intertextuality. In Part 1, “Theory”, the theoretical aspects of intertextuality are introduced, leading to a discussion of how they can be embodied by quantitative methods. In Part 2, “Practice”, specific quantitative methods are described to establish a set of automated procedures for the practice of quantitative intertextuality. Each chapter in Part 2 begins with a general introduction to a major concept (e.g., lexical matching, sound matching, semantic matching), followed by a casestudy (e.g., detecting allusions to a popular television show in tweets, quantifying sound reuse in Romantic poetry, identifying influences in fan fiction by thematic matching), and finally the development of an algorithm that can be used to reveal parallels in the relevant contexts. Because this book is intended as a “gentle” introduction, the emphasis is often on simple yet effective algorithms for a given matching task. A set of exercises is included at the end of each chapter, giving readers the chance to explore more cutting-edge solutions and novel aspects to the material at hand. Additionally, the book’s companion website includes software (R and C++ library code) and all of the source data for the examples in the book, as well as supplemental content (slides, high-resolution images, additional results) that may prove helpful for exploring the different facets of quantitative intertextuality that are presented in each chapter. Given its interdisciplinary nature, the book will appeal to a broad audience. From practitioners specializing in forensics to students of cultural studies, readers with diverse backgrounds (e.g., in the social sciences, natural language processing, or computer vision) will find valuable insights.

Epistolary Entanglements in Film, Media and the Visual Arts Teri Higgins, Catherine Fowler, 2025-10-01 This collection departs from the observation that online forms of communication—the email, blog, text message, tweet—are actually haunted by old epistolary forms: the letter and the diary. By examining the omnipresence of writing across a variety of media, the collection adds the category of Epistolary Screens to genres of self-expression, both literary (letters, diaries, autobiographies) and screenic (romance dramas, intercultural cinema, essay films, artists’ videos and online media). The category

Epistolary encapsulates an increasingly paradoxical relation between writing and the self: first, it describes selves that are written in graphic detail via letters, diaries, blogs, texts, emails and tweets; second, it acknowledges that absence complicates communication, bringing people together in an entangled rather than ordered way. The collection concerns itself with the changing visual/textual texture of screen media and examines what is at stake for our understanding of self-expression when it takes Epistolary forms. The collection *Auto/graphic Screens: Epistolary Entanglements in Film, Media and Visual Culture* is the first to interrogate the presence of epistolary forms of writing on screen. It adds the new category of 'Auto/graphic screens' to genres of self-expression and provides a broad perspective upon epistolary forms of writing on-screen, by studying romance dramas and intercultural cinema, essay films, artist's filmmaking and online media.

The New Female Antihero Sarah Hagelin, Gillian Silverman, 2022-01-25 *The New Female Antihero* examines the hard-edged spies, ruthless queens, and entitled slackers of twenty-first-century television. The last ten years have seen a shift in television storytelling toward increasingly complex storylines and characters. In this study, Sarah Hagelin and Gillian Silverman zoom in on a key figure in this transformation: the archetype of the female antihero. Far from the sunny, sincere, plucky persona once demanded of female characters, the new female antihero is often selfish and deeply unlikeable. In this entertaining and insightful study, Hagelin and Silverman explore the meanings of this profound change in the role of women characters. In the dramas of the new millennium, they show, the female antihero is ambitious, conniving, even murderous; in comedies, she is self-centered, self-sabotaging, and anti-aspirational. Across genres, these female protagonists eschew the part of good girl or role model. In their rejection of social responsibility, female antiheroes thus represent a more profound threat to the status quo than do their male counterparts. From the devious schemers of *Game of Thrones*, *The Americans*, *Scandal*, and *Homeland*, to the joyful failures of *Girls*, *Broad City*, *Insecure*, and *SMILF*, female antiheroes register a deep ambivalence about the promises of liberal feminism. They push back against the myth of the modern-day super-woman—she who “has it all”—and in so doing, they give us new ways of imagining women’s lives in contemporary America.

Engendering Karl Fugelso, 2024 *Essays on the post-modern reception and interpretation of the Middle Ages*. Though *Studies in Medievalism* has hosted many essays on gender, this is the first volume devoted specifically to that theme. The first part features four short essays that directly address manifestations of sexism in postmedieval responses to the Middle Ages: gender substitutions in a Grail Quest episode of the 2023 television series *Mrs. Davis*, repurposed misogyny in the last two episodes of *Game of Thrones* (2011-19), traditional gender stereotypes in Capital One's credit card commercials from 2000 to 2013, and shaggy medievalism in Robert Eggers' 2022 film *The Northman*. The second part contains ten longer essays, which collectively continue to demonstrate the ubiquity of gender issues and the extraordinary flexibility of approaches to them. The authors discuss the misogynistic sexualization of Grendel's mother in Parke Godwin's 1995 fantasy novel *The Tower of Beowulf*, in Graham Baker's 1999 film *Beowulf*, in three episodes from the television series *Xena: Warrior*

Princess, and in Robert Zemeckis's 2007 film *Beowulf*; gender substitution in David Lowery's 2021 film *The Green Knight* and in Kinoku Nasu's and Takashi Takeuchi's anime series *Fate* (2004-); female authorship of three early-nineteenth-century plays about court ladies' medieval empowerment; extraordinary violence in medievalist video games; nationalism in fake nineteenth-century medievalist documents and in contemporary online fora; racial discrimination in video gaming and in Jim Crow literature; and the condemnation of racism in Maria Dahvana Headley's 2018 novel *The Mere Wife*.
