**America's Other Muslims** Muhammad Fraser-Rahim, 2020-01-08 America's Other Muslims: Imam W.D. Mohammed, Islamic Reform, and the Making of American Islam explores the oldest and perhaps the most important Muslim community in America, whose story has received little attention in the contemporary context. Muhammad Fraser-Rahim explores American Muslim Revivalist, Imam W.D. Mohammed (1933–2008) and his contribution to the intellectual, spiritual, and philosophical thought of American Muslims as well as the contribution of Islamic thought by indigenous American Muslims. The book details the intersection of the Africana experience and its encounter with race, religion, and Islamic reform. Fraser-Rahim spotlights the emergence of an American school of Islamic thought, which was created and established by the son of the former Nation of Islam leader. Imam W.D. Mohammed rejected his father's teachings and embraced normative Islam on his own terms while balancing classical Islam and his lived experience of Islam in the diaspora. Likewise his interpretations of Islam were not only American – they were also modern and responded to global trends in Islamic thought. His interpretations of Blackness were not only American, but also diasporic and pan-African.

**Finding W.D. Fard** John Andrew Morrow, 2019-01-14 Since his arrival in Detroit on July 4, 1930, W.D. Fard, known also as Wallace Fard Muhammad and over fifty other aliases, has elicited an enormous amount of curiosity. Who was this man who claimed that he was both the Messiah and the Mahdi, and who was identified as God in Person by his disciple, Elijah Muhammad, whom he reportedly appointed as his Final Messenger? The people who actually met him, and the scholars who have studied him, have suggested that he was variously an African American, an Arab from Syria, Lebanon, Algeria, Morocco or Saudi Arabia, a Jamaican, a Turk, an Afghan, an Indo-Pakistani, an Iranian, an Azeri, a white American, a Bosnian, a Mexican, a Greek or even a Jew. In an attempt to determine the origins of W.D. Fard, most scholars have relied on his teachings as passed down, and perhaps modified, by Elijah Muhammad. Some have suggested that he was a member of the

Moorish Science Temple of America or the Ahmadiyyah Movement. Others have suggested that he was a Druze or a Shiite. Finding W.D. Fard: Unveiling the Identity of the Founder of the Nation of Islam provides an overview of the scholarly literature related to this mysterious subject and the theories concerning his ethnic and racial origins. It provides the most detailed analysis of his teachings to date in order to identify their original and multifarious sources. Finding W.D. Fard considers the conflicting views shared by his early followers to decipher the doctrine he actually taught. Did W.D. Fard really profess to be Allah, or was he deified after his death by Elijah Muhammad? The book features a meticulous study of any and all subjects who fit the profile of W.D. Fard, and provides the most detailed information regarding his life to date. It also offers an overview of turn-of-the-20th-century Islam in the state of Oregon, demonstrating how much W.D. Fard learned about the Muslim faith while residing in the Pacific Northwest. The work finishes with a series of conclusions and suggestions for further scholarship.

**Metaphysical Africa** Michael Muhammad Knight, 2021-11-30 The Ansaru Allah Community, also known as the Nubian Islamic Hebrews (AAC/NIH) and later the Nuwaubians, is a deeply significant and controversial African American Muslim movement. Founded in Brooklyn in the 1960s, it spread through the prolific production and dissemination of literature and lecture tapes and became famous for continuously reinventing its belief system. In this book, Michael Muhammad Knight studies the development of AAC/NIH discourse over a period of thirty years, tracing a surprising consistency behind a facade of serial reinvention. It is popularly believed that the AAC/NIH community abandoned Islam for Black Israelite religion, UFO religion, and Egyptosophy. However, Knight sees coherence in AAC/NIH media, explaining how, in reality, the community taught that the Prophet Muhammad was a Hebrew who adhered to Israelite law; Muhammad's heavenly ascension took place on a spaceship; and Abraham enlisted the help of a pharaonic regime to genetically engineer pigs as food for white people. Against narratives that treat the AAC/NIH community as a postmodernist deconstruction of religious categories, Knight demonstrates that AAC/NIH discourse is most productively framed within a broader African American metaphysical history in which boundaries between traditions remain quite permeable. Unexpected and engrossing, Metaphysical Africa brings to light points of intersection between communities and traditions often regarded as separate and distinct. In doing so, it helps move the field of religious studies beyond conventional categories of "orthodoxy" and "heterodoxy," challenging assumptions that inform not only the study of this particular religious community but also the field at large.

**Probability, Choice, and Reason** Leighton Vaughan Williams, 2021-09-15 Much of our thinking is flawed because it is based on faulty intuition. By using the framework and tools of probability and statistics, we can overcome this to provide solutions to many real-world problems and paradoxes. We show how to do this, and find answers that are frequently very contrary to what we might expect. Along the way, we venture into diverse realms and thought experiments which challenge

the way that we see the world. Features: An insightful and engaging discussion of some of the key ideas of probabilistic and statistical thinking Many classic and novel problems, paradoxes, and puzzles An exploration of some of the big questions involving the use of choice and reason in an uncertain world The application of probability, statistics, and Bayesian methods to a wide range of subjects, including economics, finance, law, and medicine Exercises, references, and links for those wishing to cross-reference or to probe further Solutions to exercises at the end of the book This book should serve as an invaluable and fascinating resource for university, college, and high school students who wish to extend their reading, as well as for teachers and lecturers who want to liven up their courses while retaining academic rigour. It will also appeal to anyone who wishes to develop skills with numbers or has an interest in the many statistical and other paradoxes that permeate our lives. Indeed, anyone studying the sciences, social sciences, or humanities on a formal or informal basis will enjoy and benefit from this book.
