Researching Irish Australians Brian Trainor,1998 This directory provides short histories of some 5,000 of the Irish who settled in Australia in the last century. Included also are over 500 abstracts of Irish-Australian wills taken from the printed Irish will calendars 1858-1900. High and low in society are to be found there ranging from a State Governor like Sir Arthur Kennedy of Queensland down to John Augustin Martin, a billiard marker of Inverell, New South Wales, whose estate was valued at £250 when he died in 1892. Significantly, over 80 abstracts relate to women, an important feature since documentation about individual women is meagre.

The Iris Family Peter Goldblatt,John C. Manning,2008-01-01 Irises and their relatives are lily-like plants related to the orchid and narcissus families, with whom they share a propensity for large, brightly colored, attractive flowers. Many have longlasting flowersÑIris, Gladiolus, and Freesia are among the most important cut-flower crops in the world. The intricate flowers of the iris family are finely adapted for pollination by a variety of animals, including hummingbirds, sunbirds, beetles,

butterflies, moths, wasps, and bees. This intimate connection between flower form and pollination biology reveals how the marvelous range of flower colors, shapes, and scents are vital to the lives of the species. The diversity of Iridaceae is illustrated in more than 200 superb photographs supplemented by expert line drawings. A lifetime of work by the world's expert on Iridaceae is distilled in this definitive account. Botanists, ecologists, naturalists, and gardeners will find this an essential reference.
