Pulse Waves Paolo Salvi, 2012-04-27 Recently, several studies have shown the crucial role of viscoelastic properties of the aorta and large arteries in determining blood pressure values. A good knowledge of cardiovascular pathophysiology and vascular hemodynamics is necessary to understand these phenomena. However, available texts on this topic are very complex and difficult for medical practitioners to understand. The aim of this book is to enable the reader to comprehend the relation between cardiovascular pathophysiology and vascular hemodynamics and to become familiar with the more recent guidelines. While very complex physical concepts are involved, care has been taken to ensure that the explanations are as straightforward as possible. Complex analyses are presented separately and can be skipped by the reader without impairment of understanding. It is envisaged that the knowledge imparted will prove invaluable in improving the approach to hypertensive patients.

Oxygen Transport to Tissue XIV Wilhelm Erdmann,Duane F. Bruley,2012-12-06 The International Society on Oxygen Transport to Tissue (IS OTT) was founded in 1973 as a scientific society providing a forum for bioengineers, basic scientists (physiologists, biochemists and physicists) and clinicians (including anesthesiologists, intensive care specialists, pediatricians, neonatologists, internists, surgeons and other specialists) to facilitate the exchange of scientific information among those interested in any aspect of the transport and/or utilization of oxygen in tissues. From the ranks of its members, many fundamental discoveries and inventions have been made involving the many aspects of oxygen transport and utilization by biological tissues. The ISOTT proceedings, now in its 14th edition, has become a standard work in the field as witnessed by the inclusion in the Science Citation Index of all volumes published so far. The 19th ISOTT Meeting was held in Curaçao from August 24th through August 30th, 1991. The Curaçao Meeting attracted 145 registrants and 45 accompanying persons. The format originated by Dr. Ian Llngmuir in 1985, consisting of posters accompanied by an abbreviated oral summary, was again successfully handled with slight modifications. The meeting was introduced by 6 review lectures covering the whole field of oxygen transport from bioengineering, the problem of diffusion in lung, blood and tissue through pathology of oxygen uptake in the lung, oxygen supply dependency of the critically ill to artificial oxygen carriers. A special session dealt with oxygen supply under ambient pressure changes.
