Textbook of Nursing Education - E-Book Latha Venkatesan, Poonam Joshi, 2015-10-31 It was a long-time desire of nursing fraternity to have a textbook on nursing education that has the content for all the units of the INC-prescribed syllabus. This book pointedly deals with all the contents specified by the INC curriculum. The book has been written keeping in mind the requirements of the modern Indian nurse educators—what they need to know and practice in the classroom. This book provides comprehensive study material and practice exercises on Nursing Education the way it is used in day-to-day conversations in the hospital environment. • Comprehensive, exhaustive and well-structured coverage • Lucid presentation with easy language for ease of comprehension • Practical approach with relevant theoretical perspectives answering common questions and issues that arise while learning the subject • Ample number of examples, tables and other learning aids • All the essential elements of communication in modern-day nursing practice like nursing reports, records, etc., discussed, analysed and exemplified • Examples from real-life health care communications provided • Exhaustive end-of-chapter exercises • Solutions for all objective type exercises given

The Function of Conference Organisers and the Marketing for Information Technology Seminars of Small and Medium-Sized Industries Karin Schneider, 1999-09-03 Inhaltsangabe: Abstract: As the European Union (EU) is getting bigger and the movement of people, capital, goods and services across the 15 participating countries is simplified, the European conference scene has been boosted with this enlarged competition. The latest knowledge and information have become vital economic assets of the information-driven society. While there are numerous ways to obtain this information, seminars are particularly attractive because they communicate desired knowledge quickly in a compact form. The major destination cities show increasing business, allied with enhanced competition, a toughening attitude amongst organisers and meeting planners as well as the need for improved marketing techniques. The use of cyberspace has gained an important influence on this sector. Due to increasing competition, services are under pressure to be improved, and the whole business of meeting is searching for higher standards. Definition of the subject Information systems have /.../ aided the growth of multinational organizations by providing a technical infrastructure to smooth over the constraints of time and distance. /.../ The IT world is changing rapidly and the basic components of an IT infrastructure have grown in power and sophistication. This means looking at how the technology should operate in the organization and who should have responsibility for it. Especially in the liberalisation of

the EU (and the connected internationalisation - addition C. S.) IT is at the forefront of achieving competitive advantages. In the fast changing world of data processing not only IT managers, but also the business managers who work with computer technology and decide about the implementation of an IT system in their business have to be informed about the latest technical developments. An IT seminar is one of the most effective ways to gain this knowledge. Although the conference and seminar line has been booming on the national and international basis for several years, the research about it was difficult as a sufficient literature is still not available in this sector. Scientific material about fundamental questions or single problems is relatively rare. Continuing statistical data is very seldom found and a definition of the various meeting types do not exist. Several brochures with simple descriptions of the congress organisers and sites had to be taken into account. Process of the examination After comparing different [...]

African Researchers and Decision-makers. Building Synergy for Development Abdoulaye Ndiaye, 2009 For the International Development Research Centre (IDRC) and its partners, the link between research and policy is of paramount importance in their goal to improve social, economic and environmental conditions in developing countries. The nature of the collaboration between researchers and decision-makers, however, is complex, multifaceted and often difficult to implement. Moreover, research is very often designed and carried out without regard for its potential users or beneficiaries. How should

research agendas be developed? What is the role of the private sector in developing research? Which actors are involved in knowledge production and utilization? How can the dialogue between researchers and decision-makers be improved? This short and accessible book records the reflections, opinions and recommendations which emerged from six national workshops organised between 2004 and 2007 in West and Central Africa on the synergy between researchers and decision-makers. Abdoulaye Ndiaye is a Senegalese expert and international consultant in development. He edited this book as a member and on behalf of the IDRC Council of Regional Advisors for West and Central Africa which organized the series of workshops throughout the sub-region.
