**Generations** Neil Howe, William Strauss, 1992-09-30 Hailed by national leaders as politically diverse as former Vice President Al Gore and former House Speaker Newt Gingrich, *Generations* has been heralded by reviewers as a brilliant, if somewhat unsettling, reassessment of where America is heading. William Strauss and Neil Howe posit the history of America as a succession of generational biographies, beginning in 1584 and encompassing every-one through the children of today. Their bold theory is that each generation belongs to one of four types, and that these types repeat sequentially in a fixed pattern. The vision of *Generations* allows us to plot a recurring cycle in American history -- a cycle of spiritual awakenings and secular crises -- from the founding colonists through the present day and well into this millennium. *Generations* is at once a refreshing historical narrative and a thrilling intuitive leap that reorders not only our history books but also our expectations for the twenty-first century.

Summary of The Fourth Turning Alexander Cooper, 2021-03-26 Summary of *The Fourth Turning* *The Fourth Turning* is a book by William Strauss and Neil Howe. It outlines the foundation for what is now known as Strauss-Howe generational theory. The main tenet of the book is that American and global history follows a generational cycle. The cycle is defined by four Turnings," each lasting about 20 years. Generational archetypes play a crucial role in historical events, and these archetypes recur. The cycle of the four Turnings is called a saeculum" and is roughly the length of human life. The book offers a detailed description of the underlying philosophy. The key idea is seasonality. The authors offer their findings from nature and history to claim that the cyclical nature of time permeates all life, including American history. Furthermore, the authors analyze Anglo-American history to find patterns in a generational attitude. They then correlate these characteristics to the historical events of significance. The evidence that the authors present focuses on their interpretation of key historical figures, as well as societal attitudes. The cyclical generational attitudes are the prime factor in analyzing history and politics, according to Strauss and Howe. The authors claim that race, gender, economic class, religion, and political beliefs are all less influential in determining the course of history. This claim is controversial, and authors reflect on their stance against other prominent academics, offering some comparison with several secondary sources. Overall, the evidence that the authors present is highly subjective and is not sufficiently bolstered with verifiable sources. Each generation is presented as having a unified voice, with few acknowledgments of a diversity of thought within each generational group. Therefore, the predictions

are not based on solid evidence. Rather, the book puts forward a theory of generational seasonality. The authors explore what this theory could mean, but they do not offer a sufficient basis for their findings. Millennials in Architecture Darius Sollohub, 2019-06-28 Much has been written about Millennials, but until now their growing presence in the field of architecture has not been examined in depth. In an era of significant challenges stemming from explosive population growth, climate change, and the density of cities, Millennials in Architecture embraces the digitally savvy disruptors who are joining the field at a crucial time as it grapples with the best ways to respond to a changing physical world. Taking a clear-eyed look at the new generation in the context of the design professions, Darius Sollohub begins by situating Millennials in a line of generations stretching back to early Modernism, exploring how each generation negotiates the ones before and after. He then considers the present moment, closely evaluating the significance of Millennial behaviors and characteristics (from civic-mindedness to collaboration, and time management in a 24/7 culture), all underpinned by fluency in the digital world. The book concludes with an assessment of the profound changes and opportunities that Millennial disruption will bring to education, licensure, and firm management. Encouraging new alliances, Millennials in Architecture is an essential resource for the architectural community and its stakeholders.

**The Heavens Are Telling the Glory of God** Laurie Brink, OP, 2022-01-19 Building on the work of Teilhard de Chardin, the New Cosmology integrates scientific facts and theories, including discoveries about the expanding universe and evolution, and proposes that creation is developing into greater complexity. But how are we to understand concepts like “original sin” and “redemption” if creation isn’t complete and humanity is still in process? How does one “retrofit” religious tradition and Scripture into this scenario? Is there room for the historical Jesus in the New Cosmology? While a ready concern for all Christians, this question has unique implications for women religious whose lives are centered on the person and mission of Jesus Christ. How is a Catholic sister to understand her vows of poverty, chastity, and obedience in light of a cosmology in which the need for redemption and the role of Jesus are significantly redefined? The Heavens Are Telling the Glory of God probes these questions and offers possible answers. Beginning with the experiences of women religious and their encounter with the New Cosmology or Universe Story, this book seeks to mediate among the various perspectives and proposes how informed and reflective engagement with science, tradition, and theology can bridge the generational divides and foster a spirituality that is both emergent and incarnational. Access to online discussion and reflection questions is included.

*Harnessing the Potential of Digital Post-Millennials in the Future Workplace* Alan Okros, 2019-08-02 This book offers strategic leaders with essential information for their most important role: the change management function of positioning the organization for success into the future. To do so, leaders need to sort through a myriad of forecasts, predictions and weak indicators of change to make timely decisions. This volume addresses the most critical factor for future success: people and, specifically, harnessing the potential the current youth cohort will bring when they join the full-time workforce. Drawing on multi-disciplinary analyses by 37 researchers, the book presents an integrative assessment of the characteristics that those in the current youth cohort are likely to bring to the workplace. The focus is on those born after 2005 with an examination of the implications of this cohort being raised from birth immersed in an increasingly omnipresent digital environment which extends far beyond social media. The authors see the coming 'digital tsunami' as creating disruptive effects across major elements of our economy and even society however optimistically conclude that the digital environment and the development of 21st Century skills in schools will equip the next generation with essential competencies, attitudes, social skills and work goals. The key to harnessing the potential of this generation will be to modify current human resources and workplace practices which will mean sweeping away much of the 'boomer' legacy that this cohort has imprinted on organizations. To assist leaders, the book goes beyond presenting a rich portrait of who these youth may become by providing practical recommendations for the changes that need to start now in order to position the organization to benefit from what they will bring. As the astute strategic leader knows: objects in the future can be closer than they appear.

**Gender and Family Entrepreneurship** Vanessa Ratten, Veland Ramadani, Leo-Paul Dana, Robert D. Hisrich, Joao Ferreira, 2017-07-20 This book focuses on gender and family entrepreneurship, as they are interrelated concepts particularly important in today's global society. The book highlights the significance of the role of gender in the development and growth of family businesses. It helps readers understand the role of family dynamics in business, particularly in terms of succession planning, strategic development and internationalization. Often, both gender and family entrepreneurship are studied

independently, but this book aims to marry both perspectives with a novel approach. This creates a synergy between gender and family entrepreneurship that increases the potential value to entrepreneurship scholarship, policy and business practice. This edited book is a useful and insightful addition to the entrepreneurship field.

**Rethinking Generational Theory** Elizabeth Penna, 2022 Behavior is influenced by many factors in an individual's life such as society, culture, familial structure, and history. William Strauss and Neil Howe's generational theory is built on their observations of a recurring pattern in American history where society goes through a recurring cycle of turnings and archetypes every 80 years. However, other than an individual's age location in history, their theory does not account for many forces that affect behavior. The emergence of technology has rapidly shifted lifestyles, behavior, and the rate of progress in America. This analysis aims to dispute the Strauss-Howe Generational Theory by uncovering the ways the pace of innovation and mass adoption of technology has influenced society and behavior.

**The Fourth Turning Is Here** Neil Howe, 2023-07-18 Twenty-five years ago, Neil Howe and the late William Strauss dazzled the world with a provocative new theory of American history. Looking back at the last 500 years, they'd uncovered a distinct pattern: modern history moves in cycles, each one lasting roughly eighty to one hundred years, the length of a long human life, with each cycle composed of four eras--or turnings--that always arrive in the same order and each last about twenty years. The last of these eras--the fourth turning--was always the most perilous, a period of civic upheaval and national mobilization as traumatic and transformative as the New Deal and World War II, the Civil War, or the American Revolution. Now, right on schedule, our own fourth turning has arrived. And so Neil Howe has returned with an extraordinary new prediction. What we see all around us--the polarization, the growing threat of civil conflict and global war--will culminate by the early 2030s in a climax that poses great danger and yet also holds great promise, perhaps even bringing on America's next golden age. Every generation alive today will play a vital role in determining how this crisis is resolved, for good or ill.

Millennials Rising Neil Howe, William Strauss, 2000-09-05 By the authors of the bestselling 13th Gen, an incisive, in-depth examination of the Millennials--the generation born after 1982. In this remarkable account, certain to stir the interest of educators, counselors, parents, and people in all types of business as well as young people themselves, Neil Howe and William Strauss provide the definitive analysis of a powerful generation: the Millennials. Having looked at oceans of data, taken their own polls, talked to hundreds of kids, parents, and teachers, and reflected on the rhythms of history, Howe and Strauss explain how Millennials have turned out to be so dramatically different from Xers and boomers. Millennials Rising provides a fascinating narrative of America's next great generation.

**The Fourth Turning** William Strauss, Neil Howe, 1997-12-29 NATIONAL BESTSELLER • Discover the game-changing theory of the cycles of history and what past generations can teach us about living through times of upheaval—with deep insights into the roles that Boomers, Generation X, and Millennials have to play—now with a new preface by Neil Howe. First

comes a High, a period of confident expansion. Next comes an Awakening, a time of spiritual exploration and rebellion. Then comes an Unraveling, in which individualism triumphs over crumbling institutions. Last comes a Crisis—the Fourth Turning—when society passes through a great and perilous gate in history. William Strauss and Neil Howe will change the way you see the world—and your place in it. With blazing originality, *The Fourth Turning* illuminates the past, explains the present, and reimagines the future. Most remarkably, it offers an utterly persuasive prophecy about how America's past will predict what comes next. Strauss and Howe base this vision on a provocative theory of American history. The authors look back five hundred years and uncover a distinct pattern: Modern history moves in cycles, each one lasting about the length of a long human life, each composed of four twenty-year eras—or “turnings”—that comprise history's seasonal rhythm of growth, maturation, entropy, and rebirth. Illustrating this cycle through a brilliant analysis of the post-World War II period, *The Fourth Turning* offers bold predictions about how all of us can prepare, individually and collectively, for this rendezvous with destiny.

**Higher Education for Democratic Innovation** Sjur Bergan, Tony Gallagher, Ira Harkavy, 2015 Democracy is increasingly the standard against which societies are measured. The term democratic culture designates the set of attitudes and behaviours that citizens need to have for democratic institutions and laws to function in practice. This is an important development from older perceptions of democracy, which focused on institutions, laws and procedures. It is a recognition that democracy will not function unless citizens want it to function. In all countries there are committed individuals aspiring to make their societies better democracies. As the Secretary General of the Council of Europe, Thorbjørn Jagland, has said on several occasions, our societies seek to address 21st-century issues through 19th-century institutions. Through contributions by authors from Europe, North America and other parts of the world, this book explores how higher education can help find new ways to develop commitment to public space and societal engagement and make democracy more vibrant.
