MANUAL DE ALIMENTACIÓN. PLANIFICACIÓN ALIMENTARIA CALVO BRUZOS Socorro Coral ,GÓMEZ CANDELA Carmen ,LÓPEZ NOMDEDEU Consuelo ,LÓPEZ PLAZA Bricia ,2016-03-18 El texto que presentamos tiene como objetivo responder a las inquietudes actuales de la población española en materia de alimentación, nutrición y salud. Para ello se han seleccionado temas que, de forma secuenciada, abordan conocimientos básicos pero esenciales de alimentación, nutrición, promoción de la salud, educación nutricional, planificación de dietas, seguridad alimentaria, estilos de vida, etc., así como el conocimiento de la importancia de la dieta en las diferentes patologías dominantes. Dadas las características del texto y la población diana seleccionada, el desarrollo de los temas se ha tratado con sencillez pero sin superficialidad, primando la actualidad y los retos que se le plantearán a la salud pública en el futuro. Esperamos que este libro sea útil y cumpla los objetivos planteados, tanto para quienes sigan cursos básicos de nutrición como para la población en general y que tenga la capacidad de motivar a los lectores hacia conocimientos más profundos.

Es una herramienta útil, didáctica y de consulta que brinda la información y las prácticas necesarias para dominar las particularidades de la evaluación nutrimental.

Pobreza, hambre y seguridad alimentaria en Centroamérica y Panamá Arturo León,2004 La inseguridad alimentaria y el hambre están estrechamente asociadas a la pobreza extrema. La preocupación por este tema se ha manifestado claramente en formulaciones de políticas nacionales de seguridad alimentaria y nutricional. En los países centroamericanos son varias las instancias que han respaldado estas iniciativas y el principal desafío ha sido otorgarles alta prioridad en la agenda política de los países. Las interrogantes que trata de abordar este documento plantean en qué medida los objetivos tendientes a mitigar el hambre se están alcanzando y cuáles son las causas y consecuencias particulares que caracterizan al fenómeno en los países centroamericanos.

Tubérculos andinos Neidy Clavijo Ponce,2014-10-14 Este libro plasma los resultados de un proceso de investigación participativa, que desde una perspectiva agroecológica, tuvo como propósito fomentar la conservación y uso de tres especies nativas de la zona andina: la ibia, el cubio y la ruba. Estos tubérculos han persistido desde la época precolombina en sistemas productivos indígenas y campesinos, y hoy forman parte de las denominadas especies infrautilizadas, dada la marginalidad a la cual han sido sometidas durante el último siglo, no obstante su importancia en la diversificación alimentaria y el sustento de poblaciones locales en los Andes. En Turmequé y Ventaquemada, dos municipios del Departamento de Boyacá en Colombia, un grupo de familias agricultoras, junto con la Pontificia Universidad Javeriana y la Corporación PBA, emprendieron un trabajo que permitió reconocer la variabilidad morfológica de estas especies, así como las características de los sistemas productivos diversificados en los cuales se encuentran inmersas, junto a sus prácticas de cultivo, sus usos y valoraciones respecto a nutrición y seguridad alimentaria, aspectos que los agricultores consideran bastión principal para su conservación.
