**Katharine A. Phillips, Michael B. First, Harold Alan Pincus**

**Obsessive-compulsive Disorder** Christopher Pittenger, 2017 Obsessive-compulsive disorder (OCD) affects one person in 40 and can cause great suffering. This volume provides the first comprehensive summary of our understanding of this enigmatic condition, summarizing current work ranging from genetics and neurobiology through cognitive psychology, treatment, personal experiences, and societal implications.

**Diagnosing and Treating Children and Adolescents** Brandé Flamez, Carl J. Sheperis, 2015-10-05 A guide to treating mental health issues in children and adolescents Diagnosis and Treatment of Children and Adolescents: A Guide for Mental Health Professionals is a resource tailored to the particular needs of current and future counselors, behavioral healthcare clinicians, and other helping professionals working with this vulnerable population. With in-depth content broken into two sections, this book first provides a foundation in the diagnostic process by covering the underlying principles of diagnosis and treatment planning, and then applies this framework to the DSM-5 categories related to children and adolescents. With research continually reshaping our understanding of mental health, it is critical mental health professionals make decisions based on evidence-based pathways that include the specialized research around children and adolescents. The leading experts who contributed to this book share contemporary perspectives on developmental considerations, assessment information, presenting symptoms, comorbidity, levels of severity, prevalence data, and other relevant factors. Structured content of chapters provides a crosswalk between the DSM-5 and this book Updated content based upon the changes, additions, and revisions to the DSM-5 that affect diagnosis, assessment, and treatment Pedagogical features, such as learning objectives, case studies, guided practice exercises, and additional resources, to support effective learning Diagnosis and Treatment of Children and Adolescents: A Guide for Clinical and School Settings is a critical resource for mental health practitioners and graduate students working toward a career in a mental health profession.

**Obsessive-Compulsive Spectrum Disorders** Eric Hollander, Joseph Zohar, Paul J. Sirovatka, Darrel A. Regier, 2010-05-28 The five-year process of preparing for the revision of the Diagnostic and Statistical Manual (DSM) has been organized around a series of conferences convened by the American Psychiatric Association, in collaboration with the World Health Organization and the U.S. National Institutes of Health, to address the future of psychiatric diagnosis. Obsessive-Compulsive Spectrum Disorders: Refining the Research Agenda for DSM-V is the fruit of one of those conferences

and presents the most academically sound, thought-provoking, and timely papers from the proceedings. As the conference and book demonstrate, recent advances in psychiatric diagnosis suggest a new approach to obsessive-compulsive disorder (OCD) classification: Research into the pathogenesis of OCD increasingly supports reclassification out of the anxiety disorders and into a separate group of obsessive-compulsive-related disorders (OCDs). The relationships among OCDs may be better defined, delineated, and understood if the current categorical diagnostic approach is supplemented with a dimensional approach which assesses obsessive-compulsive symptom domains. Obsessive-compulsive disorders are believed to be underdiagnosed in patients who complain of broad symptoms of anxiety, and reclassification of OCD as an OCD would promote more careful examination of distinct obsessive-compulsive symptoms, yield more accurate diagnosis, and result in more effective treatments. Reclassification may facilitate future research directions in examining the biological underpinnings of these disorders. In addition to examining the genetic, neurological, and ethno-cultural bases for OCDs, the book gives special attention to disorders that cross current diagnostic categories, including: Body dysmorphic disorder (BDD) Tourette's syndrome and trichotillomania Impulse-control disorders The process leading to publication of DSM-V is by its nature an exhaustive and complex one, and the conferences play a critical role in reviewing relevant research, assessing the status of scientific knowledge, and advancing that knowledge base. Obsessive-Compulsive Spectrum Disorders: Refining the Research Agenda for DSM-V represents the cutting-edge thinking that will culminate in new diagnoses, classifications, and standards of practice for this debilitating set of disorders. Clinicians and academicians will be fascinated by this glimpse into the next generation of the DSM-V.

**A Research Agenda for DSM-V** David J. Kupfer, Michael B. First, Darrel A. Regier, 2002 Produced as a partnership between the American Psychiatric Association and the National Institute of Mental Health, the National Institute on Alcohol Abuse and Alcoholism and the National Institute on Drug Abuse, this thought-provoking collection of white papers: Examines nomenclature issues. Reviews genetic, brain imaging, postmortem, and animal model research and includes strategic insights for a new research agenda Outlines recent progress in developmental neuroscience, genetics, psychology, psychopathology, and epidemiology, focusing on the turbulent first two decades of life. Suggests a research agenda for personality disorders that uses a dimensional rather than the current categorical approach to diagnosis. Proposes a research agenda to evaluate the clinical utility and validity of adding relational disorders to DSM-IV. Reevaluates the relationship between mental disorders and disability, proposing that diagnosis and disability be uncoupled. Examines the importance of culture in psychopathology and the main cultural variables at play in the diagnostic process.
