**The Integrity of the Servant Leader** Robert Sumi, Dana Mesner-Andolšek, 2016-10-04 The impact of the global financial crisis is still being felt today and the deeply unethical behaviour of the top level leaders at those economic and financial organizations, that were at the heart of the crisis, has served to highlight the importance of integrity, and in particular the need for servant leadership, if we are to avoid another major catastrophe in the management of both commercial and non-profit organizations. Servant leadership has many features in common with transformational leadership but is primarily focused on caring about employees and their personal development. Ethical behaviour is one of the most important components of successful leadership yet this remains insufficiently investigated, especially from an interdisciplinary perspective. With the help of theory, empirical analysis and the relevant methodological apparatus, the authors fill the gap in the analysis of integrity and its impact on leadership and locate the significant factors which affect integrity in general. They develop and assess the forces that impact Servant Leadership style, as well as the ability to engender trust. As a starting point they make two assumptions: An important element in leading is the ethical dimension of leadership; The ratio of factors that affect leading and the servant leadership style is complex, but the integrity of leaders is the most important among them. The authors examine four integrated scientific areas: ethics and business ethics, human resource management and psychology and focus on the analysis of the process of leadership and the factors within that process of leading that influence its success and its ethical dimension.

The Integrity of Governance L. Huberts, 2014-06-30 In the first book of its kind, Leo Huberts provides a critical synthesis of cutting-edge research on public sector integrity exploring issues such as the definition and importance of public sector integrity, the various methodological approaches to the field as well as considering the causes of for the violation of values associated with integrity.

**Cases on Global Leadership in the Contemporary Economy** Chirino-Klevans, Ivonne, 2019-08-28 Organizations who want to keep their competitive advantage in global markets need to be able to successfully operate across cultures. The challenge is that there are currently not many cases that integrate elements of global competency that represent the challenges and idiosyncrasy of operating in multicultural business environments. Cases on Global Leadership in the Contemporary Economy is a critical reference source that focuses on cases that present scenarios of organizations or

individuals who are immersed in environments that are impacted by cultural factors and how these factors affect skills related to global leadership. It presents research on the impact of cultural dimensions in leadership, the importance that understanding culture can have on the effectiveness of international business strategies, and how motivation is perceived differently across cultures. Featuring coverage on a broad range of topics such as knowledge management, social enterprise, and global business, this book is ideally designed for managers, executives, human resources officials, government officials, students, professionals, and researchers.

Leadership, Learning, Well-being, and Justice in Educational Organizations José Matias Alves ,Mireia Tintoré, Lúcia Jesus Pecegueiro Serra,2025-03-21 Educational leadership is a pivotal factor influencing student learning, second only to direct classroom instruction. Leaders in educational settings are tasked with shaping a collective vision for inclusion and fostering a school culture centered on social justice and well-being, ensuring success for every student. The role of leadership in mobilizing and inspiring purposeful, interdependent action through a shared vision is crucial for leveraging teachers' professional capital, fostering a climate of innovation and inclusion, and enhancing teachers' agency and learning cultures within educational organizations. Despite the diversity of leadership styles — ranging from toxic to transformational, laissez-faire to instructional, and charismatic to servant — understanding their effects is essential, especially given the pressing need to construct new, inclusive educational environments. Current research highlights the importance of educational leadership practices that promote personal, professional, organizational, and social well-being, yet there remains a significant gap in comprehensively understanding how these practices can be optimized to foster quality teaching and inclusive learning.

*Development of a Compassionate Leadership Program* Svenja Mennerich, 2024-02-29 Master's Thesis from the year 2023 in the subject Leadership and Human Resources - Management Styles, grade: 1,0, Academy for health and sport, language: English, abstract: The demand for leadership development in corporate organizations is increasing. This is strongly driven by after effects of the COVID-19 pandemic, political unrest and technological advancements that lead to ongoing change. High stress levels among employees require innovative approaches in leadership. This study explores the potential of a compassionate leadership program to alleviate workplace stress. Compassionate leadership, characterized by a balance between care for individuals and the courage to tackle challenging tasks, has shown promise in improving employee satisfaction and psychological well-being. However, there is a deficiency of research on developing and deploying a compassionate leadership program within corporate settings. This study aims to bridge this gap by presenting a two-phased programmatic approach that integrates group training and individual coaching, the latter to encounter the problem of training transfer, the extent to which learning is applied back in the workplace. The first phase involves a three-hour on-site training focused on the dimensions and benefits of compassionate leadership. The second phase includes a sixty-minute one-on-one virtual coaching session utilizing the GROW coaching model. Participants are supported by a self-reflection journal to enhance individual reflection and learning successes. To optimize organizational resources and time, the program's total time investment has been kept to a minimum of four hours per leader. This exploratory study evaluates the extent of knowledge enhancement in compassionate leadership and individual perceived training transfer following the coaching session with twenty-seven leaders through pre- and post-surveys. The training demonstrated promising outcomes, exhibiting an increase in the mean value from 3.3 pre-training to 4.7 post-training. A positive assessment of training transfer through individual coaching sessions could only be confirmed partly. Insights gained from this research can guide organizations in efficiently implementing compassionate leadership programs, ultimately leading to more people-centered workplaces and empowering leaders to cultivate self-care and overall well-being. The theoretical framework, program development, pilot deployment, and evaluation phases are discussed, before limitations and recommendations are addressed further. To test the effectiveness and longitude of the compassionate leadership program, future research is required.
