Hypersonic Missile Nonproliferation Richard H. Speier, George Nacouzi, Carrie Lee, Richard M. Moore, 2017-09-27

This report examines the implications of the proliferation of hypersonic missiles and possible measures to hinder it. This report first explores some of the potential strategic implications of the proliferation of hypersonic missile technology beyond the three major powers, the United States, Russia, and China. It then examines the process of such proliferation. And finally, it discusses possible means for hindering such proliferation.

Shock Waves Zonglin Jiang, 2010-05-30 The 24th International Symposium on Shock Waves (ISSW24) was held at the Beijing Friendship Hotel during July 11-16, 2004, in Beijing. It was a great pleasure for the Local Organizing Committee to organize the ISSW in China for the first time, because forty-seven years have passed since the First Shock Tube Symposium was held in 1957 at Albuquerque. The ISSW24 had to be postponed for one year because of the SARS outbreak in Beijing shortly before the Symposium was scheduled to be held in 2003, but it has achieved success due to the continuous support and kind understanding from all the delegates. It is very heart-warming to have had such an experience and I am very happy to have served as chairman for the Symposium. I would like to thank all for the contributions and help that they have given us over the past three years, without which we would not have had the Symposium. A total of 460 abstracts were submitted to the ISSW24. Each of the abstracts was evaluated by three members of the Scientific Review Committee and the decision on acceptance was made based on the reviewers' reports. 195 oral papers, including 9 plenary lectures, were accepted to be presented in three parallel sessions, and 135 poster papers in three dedicated poster sessions. Topics discussed in these papers cover all aspects of shock wave research.

Not Dead Yet Renate Klein, Susan Hawthorne, 2021-07-01 What was it like to participate in the Women's Liberation Movement? What made millions of women step forward from the 1960s onwards and join it in different ways? Many of the fifty women in this book were there. They describe how they have contributed in multitudinous ways across politics, the arts, health, education, environmentalism, economics and science and created wonderfully subversive activism. And how they continue this activism today with determined grittiness. Here are women - all over 70 years of age - still railing against the patriarchal systemic oppression of women, still fighting back. Don't Call Me Sweetie, Never Waste a Good Crisis and Still

Here, Still Clear and Still Lesbian are what they want us to know. The contributors to Not Dead Yet have created new analyses with new language and new kinds of organisations always aware of the ways in which the system is stacked against them, particularly against radical lesbian feminists. But they persist. They share the revolutionary zest they have carried with them over many decades. There is history, there is subversion and there are many extraordinary acts of courage. The language is full of irony and wit – as well as deadly serious. The Women's Liberation Movement had a profound effect on the lives of millions of women and in turn those women have changed the world. Young women in particular might enjoy reading the inspirational tales by their foremothers in Not Dead Yet and let their wisdom guide their own paths.

Shock Waves Klaus Hannemann,Friedrich Seiler,2009-04-01 The 26th International Symposium on Shock Waves in Göttingen, Germany was jointly organised by the German Aerospace Centre DLR and the French-German Research Institute of Saint Louis ISL. The year 2007 marked the 50th anniversary of the Symposium, which first took place in 1957 in Boston and has since become an internationally acclaimed series of meetings for the wider Shock Wave Community. The ISSW26 focused on the following areas: Shock Propagation and Reflection, Detonation and Combustion, Hypersonic Flow, Shock Boundary Layer Interaction, Numerical Methods, Medical, Biological and Industrial Applications, Richtmyer Meshkov Instability, Blast Waves, Chemically Reacting Flows, Diagnostics, Facilities, Flow Visualisation, Ignition, Impact and Compaction, Multiphase Flow, Nozzles Flows, Plasmas and Propulsion. The two Volumes contain the papers presented at the symposium and serve as a reference for the participants of the ISSW 26 and individuals interested in these fields.
