

Wild New World Dan Flores

SJ Ball

Wild New World Dan Flores, 2022-10-25 Winner of the 2023 Rachel Carson Environment Book Award Winner of the 2023 National Outdoor Book Award for Natural History Literature Shortlisted for the 2023 Phi Beta Kappa Society Ralph Waldo Emerson Award A Kirkus Reviews Best Nonfiction Book of 2022 A deep-time history of animals and humans in North America, by the best-selling and award-winning author of *Coyote America*. In 1908, near Folsom, New Mexico, a cowboy discovered the remains of a herd of extinct giant bison. By examining flint points embedded in the bones, archeologists later determined that a band of humans had killed and butchered the animals 12,450 years ago. This discovery vastly expanded America's known human history but also revealed the long-standing danger *Homo sapiens* presented to the continent's evolutionary richness. Distinguished author Dan Flores's ambitious history chronicles the epoch in which humans and animals have coexisted in the "wild new world" of North America—a place shaped both by its own grand evolutionary forces and by momentous arrivals from Asia, Africa, and Europe. With portraits of iconic creatures such as mammoths, horses, wolves, and bison, Flores describes the evolution and historical ecology of North America like never before. The arrival of humans precipitated an extraordinary disruption of this teeming environment. Flores treats humans not as a species apart but as a new animal entering two continents that had never seen our likes before. He shows how our long past as carnivorous hunters helped us settle America, initially establishing a coast-to-coast culture that lasted longer than the present United States. But humanity's success had devastating consequences for other creatures. In telling this epic story, Flores traces the origins of today's "Sixth Extinction" to the spread of humans around the world; tracks the story of a hundred centuries of Native America; explains how Old World ideologies precipitated 400 years of market-driven slaughter that devastated so many ancient American species; and explores the decline and miraculous recovery of species in recent decades. In thrilling narrative style, informed by genomic science, evolutionary biology, and environmental history, Flores celebrates the astonishing bestiary that arose on our continent and introduces the complex human cultures and individuals who hastened its eradication, studied America's animals, and moved heaven and earth to rescue them. Eons in scope and continental in scale, *Wild New World* is a sweeping yet intimate Big History of the animal-human story in America.

Wild on Purpose Sean Gerrity, 2025-11-04 Is it possible to make more nature? In 2001, a small team of ordinary citizens set out on an audacious effort to establish one of the largest wildlife reserves ever created—bigger than Yellowstone and

Glacier National Parks combined. But founding American Prairie was just the beginning. To succeed, they would have to defy conventional wisdom, win over skeptical Montana neighbors, and restore vast areas of temperate grasslands for returning native bison, elk, pronghorn, birds, pollinators, and predators. With humor and humility, Gerrity immerses readers in the obstacles, triumphs, and unwavering commitment that propelled this extraordinary journey. *Wild on Purpose* reveals what it takes to make real, lasting change and challenges us to move beyond saving what's left of nature to making new wild spaces—for animals, the planet, the future, for ourselves.

The Undiscovered Country Paul Andrew Hutton, 2025-08-05 New York Times Bestseller From the author of *The Apache Wars*, the true story of the American West, revealing how American ambition clashed with the realities of violence and exploitation The epic of the American West became a tale of progress, redemption, and glorious conquest that came to shape the identity of a new nation. Over time a darker story emerged—one of ghastly violence and environmental spoliation that stained this identity. *The Undiscovered Country* strips away the layers of myth to reveal the true story of this first epoch of American history. From the forests of Pennsylvania and Kentucky to the snow-crested California Sierras, and from the harsh deserts of the Southwest to the buffalo range of the Great Plains, Paul Andrew Hutton masterfully chronicles a story that defined America and its people. From Braddock's 1755 defeat to the 1890 Wounded Knee massacre, he unfolds a grand narrative steeped in romantic impulses and tragic consequences. Hutton uses seven main protagonists—Daniel Boone, Red Eagle, Davy Crockett, Mangas Coloradas, Kit Carson, Sitting Bull, and William “Buffalo Bill” Cody—as the biographical threads by which to weave a tapestry across seven generations, revealing a story of heroic conquest and dark tragedy, of sacrifice and greed, and of man-made wonders and environmental ruin. The American frontier movement has proven eternally fascinating around the world—the subject of countless books, paintings, poems, television shows, and films. *The Undiscovered Country* reveals the truth behind America's great creation myth.

Ghostwalker Leslie Patten, 2024 After encountering mountain lion tracks near her home outside Yellowstone National Park, Leslie Patten began a journey to learn about these elusive, unseen animals by collecting anecdotal information and then interviewing biologists, professional trackers, houndsmen, and conservationists.

Be Fruitful and Multiply Donald Worster, 2025-10-07 A groundbreaking history that explores how human desires have affected our relationship with the natural world, and why this is a cause for hope Donald Worster looks back over 200,000 years of *Homo sapiens sapiens* to show how human nature, especially the drive for food and sex, has responded to environmental conditions throughout history. Examining how this process led from foraging to the agrarian revolution and then to a capitalist way of life, Worster brings us face to face with a third transformation of human society that is beginning to take shape in China: an ecological civilization. This meticulously researched book explores how human desires have driven us to overrun our environments, and how we have adapted by creating new relationships with the earth. Tying the past to the

future and humans to the planet, Worster acknowledges that we are at a potentially dangerous tipping point. Yet he offers a surprisingly optimistic vision, full of faith in the strength of our human desires, to help us develop exciting futures in a changing world—as we have done time and again—and achieve a good life for the billions of us trying to survive on a finite planet.

Hunger for the Wild Michael L. Johnson, 2007 Americans have had an enduring yet ambivalent obsession with the West as both a place and a state of mind. Michael L. Johnson considers how that obsession originated, how it has determined attitudes toward and activities in the West, and how it has changed over the centuries.

Seeing Nature Through Gender Virginia Scharff, 2003 Environmental history has traditionally told the story of Man and Nature. Scholars have too frequently overlooked the ways in which their predominantly male subjects have themselves been shaped by gender. *Seeing Nature through Gender* here reintroduces gender as a meaningful category of analysis for environmental history, showing how women's actions, desires, and choices have shaped the world and seeing men as gendered actors as well. In thirteen essays that show how gendered ideas have shaped the ways in which people have represented, experienced, and consumed their world, Virginia Scharff and her coauthors explore interactions between gender and environment in history. Ranging from colonial borderlands to transnational boundaries, from mountaintop to marketplace, they focus on historical representations of humans and nature, on questions about consumption, on environmental politics, and on the complex reciprocal relations among human bodies and changing landscapes. They also challenge the ecofeminist position by challenging the notion that men and women are essentially different creatures with biologically different destinies. Each article shows how a person or group of people in history have understood nature in gendered terms and acted accordingly—often with dire consequences for other people and organisms. Here are considerations of the ways we study sexuality among birds, of William Byrd's masking sexual encounters in his account of an eighteenth-century expedition, of how the ecology of fire in a changing built environment has reshaped firefighters' own gendered identities. Some are playful, as in a piece on the evolution of snow bunnies to shred bunnies. Others are dead serious, as in a chilling portrait of how endocrine disruptors are reinventing humans, animals, and water systems from the cellular level out. Aiding and adding significantly to the enterprise of environmental history, *Seeing Nature through Gender* bridges gender history and environmental history in unexpected ways to show us how the natural world can remake the gendered patterns we've engraved on ourselves and on the planet.

Rand, McNally & Co.'s New General Atlas of the World Rand McNally and Company, 1897

Rand McNally and Co.'s New Imperial Atlas of the World Containing Large Scale Colored Maps of Each State and Territory in the United States, Provinces of Canada, the Continents and Their Subdivisions Rand McNally and Company, 1918

Writing for an Endangered World Lawrence Buell, 2001-05-25 Emphasizing the influence of the physical environment

on individual and collective perception, this book provides the theoretical underpinnings for an ecocriticism now reaching full power, and does so in remarkably clear ways. Focusing on 19th- and 20th-century writers, it reimagines city and country as a single complex landscape.

After the Fact James West Davidson, Mark H. Lytle, 2004 Accompanying CD-ROM offers sources directly related to the text's chapters--including documents, images, maps, charts, and documentaries... Three chapters from past editions of the text are also included.
