Audubon's Birds of America Coloring Book John James Audubon,1974-01-01 Including the red-winged blackbird, painted bunting, wood duck, great blue heron, ruby-throated hummingbird, purple finch, and blue jay, 46 different species of birds from all parts of the United States are included in this book. The pictures have been faithfully redrawn by Paul E. Kennedy from originals by John James Aububon (1785-1851), the most famous American painter-naturalist. For each species, the caption supplies the modern common and scientific names and the current range (by general region). No distinction is made between breeding range and winter range. Only the area of the United States, exclusive of Alaska and Hawaii, is considered. The birds shown are usually adult males when the caption does not give the information on age and sex. Audubon's original plates, numbered to correspond to the pages of the book, have been reproduced in color on the covers. If you follow them, you will not only have a great deal of coloring pleasure, but you will also learn how to identify many important birds.

The Birds of America John James Audubon,Joel Oppenheimer,2013-10-01 A never-before-published edition of the rare chromolithographic Audubon prints of American birds. John James Audubon is arguably America's most widely recognized and collected artist. His *Birds of America* has been reproduced often, beginning with the double elephant folio printed by Havill in England, followed by a much smaller "Octavo" edition printed in Philadelphia and sold by subscription. After Audubon's death, his family arranged with the New York printer Julius Bien to produce another elephant folio edition, this time by the new chromolithographic process. It too would be sold by subscription, but the venture, begun in 1858, was brought to an abrupt end by the Civil War. Only 150 plates were produced, and the number remaining today is slight; they are among the rarest and most sought after Audubon prints. Bound in cloth with a full cloth slipcase, this beautifully produced book is the first complete reproduction of Bien chromolithographs and will become the centerpiece of any bird lover's library.

The Birds of America John James 1785-1851 Audubon,John T Ca 1801-1856? ornithological study and remains an enduring testament to Audubon's dedication and skill. It is a must-have for ornithologists, art historians, and anyone with an appreciation for the natural world. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work.
