**Learning, Teaching, and Assessment Methods for Contemporary Learners** K. G. Srinivasa,Muralidhar Kurni,Kuppala Saritha,2022-10-29 This textbook tackles the matter of contemporary learners' needs, and introduces modern learning, teaching, and assessment methods. It provides a deeper understanding of these methods so that the students and teachers can create teaching and learning opportunities for themselves and others. This textbook showcases various modern learning, teaching, and assessment methods for contemporary learners in an increasingly digital environment. **Iris Murdoch and Early Childhood Education** Andrea Delaune,2025-10-30 What relevance does the philosophy of Iris Murdoch have to offer to our understanding of early childhood education? In *Iris Murdoch and Early Childhood Education*, Andrea Delaune establishes the importance of attention, moral imagination, and moral vision for early childhood pedagogy. The book challenges limited behaviouristic or technicist views of education to assert teaching as a richly imaginative undertaking built from the slow and incremental practice of attention. Early childhood teaching can be enriched by Murdoch's central philosophical question, How can we make ourselves better?, which does not prompt a uniform or hegemonic ideal practice and instead invites us to appreciate the 'little peering efforts' of the moral imagination to build a more expansive, comprehensive, and pedagogically impactful approach to educational practice. Drawing extensively on Murdoch's philosophy, this insightful book provides a hopeful, practical, and accessible vision for change in the everyday pedagogy of early childhood educators and educationalists. Through the lens of love and justice, Delaune shows how teachers and educationalists can extend their moral vision of early childhood education through a broad examination of topics such as intentional teaching, neuroscience, and affection. The text promotes and explains the practicalities of attention as a reflective tool for reappraising both practice and simplistic understandings of early childhood education. By addressing central tenets of education that have remained topical throughout history, such as ethics in education, teacher-child relationships, and the role of the teacher, this book will resonate with a wide range of individuals. Delaune presents critical examinations of policy,

pedagogy, and values for teaching, as well as practical examples of attention in action that will be of interest to teachers and educationalists alike. The text will be particularly relevant to those engaged in the study of early childhood education, including both those pursuing initial teacher education and currently working in the field.

Young Children's Community Building in Action Louise Gwenneth Phillips, Jenny Ritchie, Lavina Dynevor, Jared Lambert, Kerry Moroney, 2019-07-04 Rethinking the concepts of citizenship and community in relation to young children, this groundbreaking text examines the ways in which indigenous understandings and practices applied in early childhood settings in Australia and New Zealand encourage young children to demonstrate their care and concern for others and so, in turn, perceive themselves as part of a larger community. Young Children's Community Building in Action acknowledges global variations in the meanings of early childhood education, of citizenship and community building, and challenges widespread invisibility and disregard of Indigenous communities. Through close observation and examination of early years settings in Australia and New Zealand, chapters demonstrate how practices guided by Aboriginal and Māori values support and nurture children's personal and social development as individuals, and as citizens in a wider community. Exploring what young children's citizenship learning and action looks like in practice, and how this may vary within and across communities, the book provides a powerful account of effective pedagogical approaches which have been long excluded from mainstream dialogues. Written for researchers and students of early childhood education and care, this book provides insight into what citizenship can be for young children, and how Indigenous cultural values shape ways of knowing, being, doing and relating.

**Science in Early Childhood** Coral Campbell, Wendy Jobling, Christine Howitt, 2018-05-08 This third edition has been substantially updated to include current research, written by a team of respected science education researchers. It complements the Australian Early Years Learning Framework and the Australian Curriculum: Science. Concepts are brought to life through case studies, practical tasks and activity plans.

**Handbook of Early Childhood Education** Robert C. Pianta, W. Steven Barnett, Laura M. Justice, Susan M. Sheridan, 2012-02-23 Comprehensive and authoritative, this forward-thinking book reviews the breadth of current knowledge about early education and identifies important priorities for practice and policy. Robert C. Pianta and his associates bring together foremost experts to examine what works in promoting all children's school readiness and social-emotional development in preschool and the primary grades. Exemplary programs, instructional practices, and professional development initiatives—and the systems needed to put them into place—are described. The volume presents cutting-edge findings on the family and social context of early education and explores ways to strengthen collaboration between professionals and parents.

Number Sense and Operations in the Primary Grades Carne Barnett-Clarke, 2003 Provides practice-based materials for teaching mathematic concepts in grades K-2. Addresses many hard to teach and learn concepts including place value,

number sentences, basic facts, addition, subtraction, and regrouping.

Introduction to Early Childhood Education Marian Marion, 2010 Armed with the mantra knowledge before action, this introduction to early childhood education allows teachers to first understand the development of the whole child and then to plan an environment and curriculum that will allow them to learn and thrive. Using a largely developmental approach, this first edition text explores both time-honored theories of early childhood development and current models and modern research in the field. Part One of the text discusses the history and theories of childhood development, while Part Two instructs teachers how to support children's emotional, social, cognitive, and physical development. The final section of the book explains how to assessment and guidance to support children and how to implement developmentally appropriate curriculum in the classroom. This text is supplemented with a number of features and ancillaries that make learning easier for students and teaching easier for instructors. Students will benefit from the many boxed activities and aides as well as by the online features contained in MyEducationLab.
